*Global Design to
Gain a Competitive

Recent rapid
globalisation of
manufacturing
industries leads to a
drive and thirst for
rapid advancements
in technological
development and
expertise in the
fields of advanced
design and
manufacturing,
especially at their
interfaces. This
development
results in many
economical benefits

of quality of life for
many people all

Technically

create many
opportunities and
challenges for both
industrialists and
academics, as the
design
requirements and
constraints have
completely changed
in this global design
and manufacture
environment.
Consequently the
way to design,
manufacture and
realise products
have changed as
well. The days of
designing for a
local market and
using local
suppliers in
manufacturing have
gone, if enterprises
aim to maintain
their
competitiveness
and global
expansion leading
to further success.
In this global
context and
scenario, both
industry and the

academia have an
urgent need to
equip themselves
with the latest
knowledge,
technology and
methods developed
for engineering
design and
manufacture. To
address this shift in
engineering design
and manufacture,
