*Writing and Literature* Jul 05 2020 In the age of Buzzfeeds, hashtags, and Tweets, students are increasingly favoring conversational writing and regarding academic writing as less pertinent in their personal lives, education, and future careers. Writing and Literature: Composition as Inquiry, Learning, Thinking and Communication connects students with works and exercises and promotes student learning that is kairotic and constructive. Dr. Tanya Long Bennett, professor of English at the University of North Georgia, poses questions that encourage active rather than passive learning. Furthering ideas presented in Contribute a Verse: A Guide to First-Year Composition as a complimentary companion, Writing and Literature builds a new conversation covering various genres of literature and writing. Students learn the various writing styles appropriate for analyzing, addressing, and critiquing these genres including poetry, novels, dramas, and research writing. The text and its pairing of helpful visual aids throughout emphasizes the importance of critical reading and analysis in producing a successful composition. Writing and Literature is a refreshing textbook that links learning, literature, and life.

**Soul of the Sea** Jun 15 2021 SOUL OF THE SEA IN THE AGE OF THE ALGORITHM draws upon the fields of science, economics and business strategy to chart the future of humankind's relationship to the ocean. The underlying principle is that a healthy ocean provides the basis for a prosperous world, and that oceans have been largely ignored as a driver of human well-being until now. Ocean health has been in a serious state of decline for the past 100 years from a range of pressures including human population growth, energy consumption and use of natural resources. We will exceed our planetary boundaries, the resources and environmental conditions we need to exist, within the next century if we do not change. This message is not new. What is new about this book is that the solutions lie not only in traditional resource conservation management, but in new fields of technology, governance and innovation.

**Antistatic Sprays** Aug 25 2019 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

**Complex Analysis** Sep 18 2021 This unusual and lively textbook offers a clear and intuitive approach to the classical and beautiful theory of complex variables. With very little dependence on advanced concepts from several-variable calculus and topology, the text focuses on the authentic complex-variable ideas and techniques. Accessible to students at their early stages of mathematical study, this full first year course in complex analysis offers new and interesting motivations for classical results and introduces related topics stressing motivation and technique. Numerous illustrations, examples, and now 300 exercises, enrich the text. Students who master this textbook will emerge with an excellent grounding in complex analysis, and a solid understanding of its wide applicability.

The Sumerians Oct 20 2021 The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal
