A Beach Less Traveled Aug 20 2021 What originated in a family vacation on the beach eventually became an unlikely but thriving business—a perfumery on the French-Dutch island of Saint Martin. Though he chose a career in law, John Berglund's passion lay in the chemistry sets of his youth and his lifelong fascination with perfume. Berglund eventually built a full-fledged lab in the basement of his home in Atlanta, where he spent countless hours of free time experimenting with new concoctions. He began to dream of opening a perfumery in a tranquil island paradise and ultimately set out to make it happen—no matter what. Berglund's account of his Caribbean adventure is a fun-filled, factual tale of conflicts, contrasts, and celebrations. As he and his wife, Cyndi, embed themselves in the eccentric French-side community of Grand Case, they learn incredible

lessons about business, success, and themselves. Their story may just inspire others, too, to follow in their footsteps, trading business casual attire for a pair of shorts and flip-flops.

With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, canutils, and ChipWhisperer, The Car Hacker’s Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you’re curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker’s Handbook your first stop.

Lemon-Aid New Cars and Trucks 2012 Oct 29 2019 Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway) Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers) GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago) You can save \$2,000 by cutting freight fees and "administrative" charges) Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea) Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki
