[Evaluation and Stance in War News](#) Oct 27 2019 In a world in which advanced communication technologies have made the reporting of disasters and conflicts (also in the form of breaking news) a familiar and 'normalised' activity, the information we present here about television news reporting of the 2003 war in Iraq has implications that go beyond this particular conflict. Evaluation and Stance in War News functions as a tool kit for the critical evaluation of language in the news, both as raw data in need of interpretation and as carefully packaged products of 'information management' in need of 'unpacking'. The chapters offer an array of theoretical and empirical instruments for revealing, identifying, sifting, weighing and connecting patterns of language use that construct messages. These messages carry with them world views and value systems that can either create an ever wider divide or serve to build bridges between peoples and countries.

[Ubiquitous Computing and Ambient Intelligence](#) Nov 28 2019 This book constitutes the refereed proceedings of the 6th International Conference on Ubiquitous Computing and Ambient Intelligence, UCAmI 2012, held in Vitoria-Gasteiz, Spain, in December 2012. The 70 research papers were carefully reviewed and selected from various submissions. The main focus of this book has been to explore how Ambient Intelligence can contribute towards smarter but still more sustainable environments. Beyond sustainable computing the proceedings also include research work describing progress on other key research topics for AmI such as human environment mobile-mediated (through NFC or AR) interaction, artificial intelligence techniques to foster user- and context-aware environment adaptation, future internet trends such as social networks analysis, linked data or crowd-sourcing applied to AmI, internet-connected object ecosystems collaborating to give place to smarter environments.

[Pro JavaScript Development](#) Mar 25 2022 Pro JavaScript Development is a practical guide for front-end web developers who are experienced at building web pages with HTML, CSS, and JavaScript, and now wish to advance their JavaScript skills to a higher level. You will learn how to build large, well-structured, high quality, mobile-optimized web sites and apps, using the latest supported browser APIs, language features, and tools. This book teaches and shows you in practical hands-on terms how you can: Master the performance, reliability, stability, and code manageability of your JavaScript Understand and write efficient object-oriented and prototypal code, including full understanding of the 'this' keyword Boost the performance of your JavaScript code Architect large web applications using common design patterns Write high quality JavaScript code and avoid the pitfalls most likely to cause errors Manage code dependencies with AMD and RequireJS Develop for mobile, build games, and set up a real-time video chat using modern APIs such as Geolocation, Canvas and WebRTC Document your code as the professionals do Write command-line and web server applications in JavaScript with Node.js, Use build tools, such as Grunt and Gulp, to automate repetitive tasks and improve your development workflow Using real-world examples and applications that you'll build yourself, Pro JavaScript Development has unique, practical content that will make you a better JavaScript developer. Become a master of the latest JavaScript coding techniques and tools, and harness its best capabilities today.

[Music therapy in mental health for illness management and recovery](#) Jun 03 2020 Many music therapists work in adult mental health settings after qualifying. For many, it will be a challenging and even daunting prospect. Yet until now, there has been no psychiatric music therapy text providing advice on illness management and recovery. This essential book fills the gap in the literature, providing the necessary breadth and depth to inform readers of the psychotherapeutic research base and show how music therapy can effectively and efficiently function within a clinical scenario. The book takes an illness management and recovery approach to music therapy specific to contemporary group-based practice. It is also valuable for administrators of music therapy, providing innovative theory-based approaches to psychiatric music therapy, developing and describing new ways to conceptualize psychiatric music therapy treatment, educating music therapists, stimulating research and employment, and influencing legislative policies. An important aim of the book is to stimulate both critical thought and lifelong learning concerning issues, ideas, and concepts related to mental illness and music therapy. Critical thinking and lifelong learning have been - and will likely continue to be - essential aspirations in higher education. Moreover, contemporary views concerning evidence-based practice rely heavily upon the clinician's ability to think critically, seek a breadth of contradicting and confirmatory evidence, implement meta-cognition to monitor thoughts throughout processes, and synthesize and evaluate knowledge to make informed clinical decisions relevant and applicable to idiosyncratic contextual parameters. For both students and clinicians in music therapy, this is an indispensable text to help them learn, develop, and hone their skills in music therapy.

[Guidelines for the Use of Oral Presentations](#) Apr 13 2021

[The Code of Federal Regulations of the United States of America](#) Jan 23 2022 The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government.

[Groupware: Design, Implementation, and Use](#) Aug 25 2019 This book constitutes the refereed proceedings of the 12th International Workshop on Groupware, CRIWG 2006. The book presents 21 revised full papers and 13 revised short papers, carefully reviewed and selected from 99 submissions. Topical sections include collaborative applications and group interaction, group awareness, computer supported collaborative learning, languages and tools supporting collaboration, groupware development frameworks and toolkits, collaborative workspaces, web-based cooperative environments, mobile collaborative work, and collaborative design.

[Research Anthology on Developing Effective Online Learning Courses](#) Aug 30 2022 In the current educational environment, there has been a shift towards online learning as a replacement for the traditional in-person classroom experience. With this new environment comes new technologies, benefits, and challenges for providing courses to students through an entirely digital environment. With this shift comes the necessary research on how to utilize these online courses and how to develop effective online educational materials that fit student needs and encourage student learning, motivation, and success. The optimization of these online tools requires a deeper look into curriculum, instructional design, teaching techniques, and new models for student assessment and evaluation. Information on how to create valuable online course content, engaging lesson plans for the digital space, and meaningful student activities online are only a few of many current topics of interest for promoting student achievement through online learning. The Research Anthology on Developing Effective Online Learning Courses provides multiple perspectives on how to develop engaging and effective online learning courses in the wake of the rapid

digitalization of education. This book includes topics focused on online learners, online course content, effective online instruction strategies, and instructional design for the online environment. This reference work is ideal for curriculum developers, instructional designers, IT consultants, deans, chairs, teachers, administrators, academicians, researchers, and students interested in the latest research on how to create online learning courses that promote student success. *Your Space Level 3* Jan 29 2020 Your Space is a three-level course for teenagers, designed to motivate students as they change and grow. With a wide range of varied activities, the Workbook provides extra skills practice focusing on listening, reading, writing and speaking. The accompanying Audio CD contains extra listening material for practice at home. CEF: A2-B1.

Design, User Experience, and Usability: Theory, Methodology, and Management Jun 15 2021 The three-volume set LNCS 10288, 10289, and 10290 constitutes the proceedings of the 6th International Conference on Design, User Experience, and Usability, DUXU 2017, held as part of the 19th International Conference on Human-Computer Interaction, HCII 2017, in Vancouver, BC, Canada, in July 2017, jointly with 14 other thematically similar conferences. The total of 1228 papers presented at the HCII 2017 conferences were carefully reviewed and selected from 4340 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 168 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this three-volume set. LNCS 10288: The 56 papers included in this volume are organized in topical sections on design thinking and design philosophy; aesthetics and perception in design; user experience evaluation methods and tools; user centered design in the software development lifecycle; DUXU education and training. LNCS 10289: The 56 papers included in this volume are organized in topical sections on persuasive and emotional design; mobile DUXU; designing the playing experience; designing the virtual, augmented and tangible experience; wearables and fashion technology. LNCS 10290: The 56 papers included in this volume are organized in topical sections on information design; understanding the user; DUXU for children and young users; DUXU for art, culture, tourism and environment; DUXU practice and case studies.

Semantic Technology Dec 30 2019 This book constitutes the thoroughly refereed proceedings of the 9th Joint International Semantic Technology Conference, JIST 2019, held in Hangzhou, China, in November 2019. The 24 full papers presented were carefully reviewed and selected from 70 submissions. They present applications of semantic technologies, theoretical results, new algorithms and tools to facilitate the adoption of semantic technologies and are organized in topical sections on knowledge graphs; data management; question answering and NLP; ontology and reasoning; government open data; and semantic web for life sciences.

Corpus Analysis Oct 08 2020 The papers published in this volume were originally presented at the Third North American Symposium on Corpus Linguistics and Language Teaching held on 23-25 March 2001 at the Park Plaza Hotel in Boston, Massachusetts. Each paper analyses some aspect of language use or structure in one or more of the many linguistic corpora now available. The number of different corpora investigated in the book is a real testament to the progress that has been made in recent years in developing new corpora, particularly spoken corpora, as over half of the papers deal either wholly or partially with the analysis of spoken data. This book will be of particular interest to undergraduate and graduate students and scholars interested in corpus, socio and applied linguistics, discourse analysis, pragmatics, and language teaching.

A Guide to Computer User Support for Help Desk and Support Specialists Feb 09 2021 Equip current and future user-support professionals with the critical people skills and exceptional technical knowledge necessary to provide outstanding support with Beisse's A GUIDE TO COMPUTER USER SUPPORT FOR HELP DESK AND SUPPORT SPECIALISTS, 6E. This useful guide focuses on the informational resources and technical tools students need most to function effectively in a support position. Readers develop the skills to handle troubleshooting and problem solving, successfully communicate with clients, determine a client's specific needs, and train end-users, as well as handle budgeting and other management priorities. Clear, balanced coverage in this edition highlights the latest trends and developments, from Web and e-mail-based support to assistance with Windows 7 and cloud computing. Engaging special features, such as Tips and On the Web Pointers, provide important insights, while new Discussion Questions and Case Projects encourage active participation in the learning process. Leading professional software HelpSTAR and Microsoft Office Project Professional 2010 accompany Beisse's A GUIDE TO COMPUTER USER SUPPORT FOR HELP DESK AND SUPPORT SPECIALISTS, 6E to reinforce the knowledge and skills your students need for success in today's user-support positions. Design and Application of Quantified Self Approaches for Reflective Learning in the Workplace Apr 25 2022

The Special Needs Coordinator as Teacher and Manager Jan 11 2021 This text reflects the shift in the SENCO's role from SEN teacher to manager. Written within the context of the most recent government initiatives, it can be used by both special-needs coordinators and by special-educational-needs trainers and advisory staff. In two parts, it explores the range of skills required for the role of special needs coordinator and offers information and advice to develop those skills. Practical activities enable the user to monitor and evaluate special-needs provision in their own school and to implement a structured process of change in partnership with all those involved in meeting special educational needs.

CAN SELL... WILL SELL May 27 2022 We show you how to: Be an effective face to face and social networker Make effective telephone sales calls Conduct productive meetings Make powerful PowerPoint presentations Successfully negotiate and close the deal There are many guide books that support sales people and small business in advising them of what they should do not what to do. CanSellWillSell aims to give you a single reference point to give you the confidence, tools and techniques to know how to achieve success in sales. This guide is for business owners who don't have a background in sales, but value its importance and for sales people needing a reminder of the basics of effective selling. The content comes from a combination of lessons learned, experiences enjoyed and advice received from over 30 years experience in sales, sales management and sales training. Bringing all this together to provide a step by step guide to the sales process has a simple aim to share best practice in an easily to follow format and support you in your sales activities.

Active Media Technology Apr 01 2020 The past few years have witnessed rapid scientific and technological developments in human-centered, seamless computing environments, interfaces, devices, and systems with applications ranging from business and communication to entertainment and learning. These developments are collectively best characterized as Active Media Technology (AMT), a new area of information technology and computer science that emphasizes the proactive, seamless roles of interfaces and systems as well as new digital media in all aspects of human life. This volume contains the papers presented at the Sixth International Computer Science Conference: Active Media Technology (AMT 2001), the first conference of its kind, capturing the state of research and development in AMT and the latest architectures, prototypes, tools, and embedded systems that demonstrate or enable AMT. The volume is organized into the following eight parts: I. Smart Digital Media; II. Web Personalization; III. Active Interfaces; IV. Autonomous Agent Approaches; V. Facial Image Processing; VI. AMT-Supported Commerce, Business, Learning, and Health Care; VII. Tools and Techniques; and VIII. Algorithms.

Integrated Project Support Environments Sep 06 2020 A major part of software engineering developments involve the use of computing tools which facilitate the management, maintenance, security, and building of long-scale software engineering projects. Consequently, there have been a proliferation of CASE tools and IPSES. This book looks at IPSES in general and the ASPECT project in particular, providing design and implementation details, as well as locating ASPECT in IPSE developments. Survey of integrated project support environments for more efficient software engineering**Description of a large scale IPSE--ASPECT**Evaluation of formal methods in IPSE development (using the Z specification)

The Comprehensive Guide to Successful Conferences and Meetings Aug 06 2020 Abstract: This book is a step-by-step guide to planning productive conferences and meetings. The authors begin with a discussion of conferences and meetings, including definitions of terms commonly used in the planning process. Next, each aspect of designing a conference is presented. Included are the following topics: site selection, meeting rooms, speakers, audiovisuals, food and beverage events, exhibits, marketing, public relations, transportation, entertainment, budgeting, registration, and program books. The authors conclude with chapters on evaluation, conducting the conference, and resources for those who plan conferences and meetings. Each chapter begins with a checklist of

items which should be considered in that particular step of the process and then addresses each of the items on the checklist in more detail.

Succeeding Through Communication Aug 18 2021 Effective communication is a necessary and sufficient condition for career success and personal happiness. This book leads the readers into building improvised relationships through artful speaking, careful listening and impressive body expression. It emphasises on negotiation as a business process and the need for professional etiquettes. The author analyses cross-cultural communication with a view to establish a holistic approach to the subject-matter. The book aims to guide and appraise the communication skills of the reader.

Social Media in Higher Education: Case Studies, Reflections and Analysis Jun 27 2022 How does social media affect working life in Higher Education? How are universities harnessing its power to aid student learning? This innovative collection brings together academics and those working in professional services to examine these questions and more. The diverse and expert contributors analyse the many ways social media can be used to enhance teaching and learning, research, professional practice, leadership, networking and career development. The impact of social media is evaluated critically, with an eye both to the benefits and the problems of using these new forms of digital communication. This is the first volume to give such detailed attention to this area of high interest. Its innovative approach extends to its creation, with contributors found via their presence on Twitter. The short and impactful chapters are accessible while retaining an academic focus through their application of relevant learning theories and educational context. Social Media and Higher Education is essential reading for any professional working in higher education, including lecturers teaching education courses. It is also significant for researchers looking at more recent developments in the field and what it means to work in a modern higher education environment.

Universal Access in Human-Computer Interaction. Applications and Services Dec 10 2020 The four-volume set LNCS 6765-6768 constitutes the refereed proceedings of the 6th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2011, held as Part of HCI International 2011, in Orlando, FL, USA, in July 2011, jointly with 10 other conferences addressing the latest research and development efforts and highlighting the human aspects of design and use of computing systems. The 72 revised papers included in the fourth volume were carefully reviewed and selected from numerous submissions. The papers are organized in the following topical sections: speech, communication and dialogue; interacting with documents and images; universal access to education and learning; well being, health and rehabilitation applications; and universal access in complex working environments.

The Presenter's Fieldbook Nov 01 2022 Proper presentations have the power to persuade and transform people and organizations. This is a book about the art of presenting.

Code of Federal Regulations Sep 30 2022

New Computing Techniques In Physics Research II - Proceedings Of The Second International Workshop On Software Engineering Artificial Intelligence And Expert Systems In High Energy And Nuclear Physics May 03 2020 A vivid example of the growing need for frontier physics experiments to make use of frontier technology is in the field of Artificial Intelligence (AI) and related themes. By AI we are referring here to the use of computers to deal with complex objects in an environment based on specific rules (Symbolic Manipulation), to assist groups of developers in the design, coding and maintenance of large packages (Software Engineering), to mimic human reasoning and strategy with knowledge bases to make a diagnosis of equipment (Expert Systems) or to implement a model of the brain to solve pattern recognition problems (Neural Networks). These techniques, developed some time ago by AI researchers, are confronted by down-to-earth problems arising in high-energy and nuclear physics. However, similar situations exist in other 'big sciences' such as space research or plasma physics, and common solutions can be applied. The magnitude and complexity of the experiments on the horizon for the end of the century clearly call for the application of AI techniques. Solutions are sought through international collaboration between research and industry.

Introducing Pragmatics in Use May 15 2021 Introducing Pragmatics in Use is a lively and accessible introduction to pragmatics, which both covers theory and applies it to real spoken and written data. Pragmatics is the study of language in context, yet most textbooks rely on invented language examples. This innovative textbook systematically draws on language corpora to illustrate features such as creativity in small talk or how we apologise in English. The authors investigate the pragmatic implications of the globalisation of the English language and focus on the applications of pragmatics for teaching languages. In addition, a practical chapter on researching pragmatics aimed at developing students' research skills is included. With a range of tasks aimed at putting theory into practice and chapter by chapter further reading recommendations, this is the ideal textbook for advanced undergraduate or postgraduate students of pragmatics and corpus linguistics within applied language/linguistics or TEFL/TESOL degrees.

Analyzing and Influencing Search Engine Results Jul 25 2019 Sönke Lieberam-Schmidt analyzes the impact that search engine optimization (SEO) has on the economic goals of Web businesses like e.g. online shops. He structures available SEO means and integrates them in a Website creation process proven to be successful in practice. A model for selecting the right keywords in this context is developed. For search engines, he presents new methods of grouping and presenting results in a clear manner.

Problem Seeking Nov 20 2021 The classic programming guide for architects and clients—fully updated and revised Architectural programming is a team effort that requires close cooperation between architects and their clients. Problem Seeking, Fifth Edition lays out a five-step procedure that teams can follow when programming any building or series of buildings, from a small house to a hospital complex. This simple yet comprehensive process encompasses the entire range of factors that influence the design of buildings. This Fifth Edition of the only programming guide appropriate for both architect and client features new information related to BIM, integrated practice, and sustainable design when programming. Supplemented with more than 120 illustrations and diagrams updated for this edition, this indispensable resource provides revised technical information and faster, easier access to explanations, examples, and tools, including: Guidance on incorporating the latest technological tools when programming A primer on discounted cash flow analysis and net present value analysis Project statement examples organized by project phase and building type Useful techniques for data management, functional relationship analysis, and more

Computers Helping People with Special Needs Oct 20 2021 Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all continents to ICCHP. The International Programme Committee, encompassing 102 experts from all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the importance of giving access to ICT and AT at a global level. In another keynote by Harold Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond.

PowerPoint 2013 Absolute Beginner's Guide Jun 23 2019 Make the most of PowerPoint 2013—without becoming a technical expert! This book is the fastest way to learn PowerPoint and use it to create dynamic, eye-catching presentations that you can deliver in person or on the Web. Even if you've never used PowerPoint before, you'll learn how to do what you want, one incredibly clear and easy step at a time. PowerPoint has never, ever been this simple! Who knew how simple PowerPoint® 2013 could be? This is the easiest, most practical beginner's guide to using Microsoft's incredibly powerful new PowerPoint 2013 presentation software...simple, reliable instructions for doing everything you really want to do! Here's a small sample of what you'll learn: Quickly move from learning PowerPoint 2013 basics to creating and delivering polished, dynamic presentations Communicate data visually using pictures, shapes, charts, and SmartArt Design sophisticated presentations even faster with themes, variants, and custom layouts Enliven your presentations with animation, audio, and video, including online video from websites such as YouTube Collaborate on presentations using SkyDrive, Microsoft's online file-sharing solution Create MP4 and Windows Media videos from your PowerPoint presentations Publish and deliver your presentations on the Web Create and edit PowerPoint presentations on the go, using the PowerPoint Web App Access your presentations from a tablet or smartphone Expand the power of PowerPoint with third-party tools And much more... Patrice-Anne Rutledge is a business technology author and consultant who specializes in teaching others to maximize the power of new technologies. Patrice has used—and has trained others to use—PowerPoint for many years, designing presentations for meetings, seminars, trade shows, and worldwide audiences. She is also the author of five previous books about PowerPoint for Pearson Education. She can be reached through her website at www.patricerutledge.com. Category: Microsoft Office Covers: PowerPoint 2013 User Level: Beginning

Multi-user Interfaces and Applications Sep 18 2021 Computer networks are covering greater areas, providing higher bandwidths and connecting ever larger numbers of users. Conventional multi-user services such as electronic mail and computer conferencing have been in existence for over two decades. As networks and computer-mediated communication become more widespread, what new types of multi-user applications may we expect in the near future? This volume gives some indication of what may form the next generation of multi-user applications.

Treating Opioid Use Disorder in General Medical Settings Nov 08 2020 This book is an invaluable reference for medical practitioners seeking to integrate opioid use disorder (OUD) treatment into general medical settings, including primary care, the inpatient hospital, and the emergency department. It recognizes opioid-related deaths in the United States as a significant public health crisis and fills the gap in drug use and addiction treatment knowledge for care providers. Timely and concise, opening chapters examine the history of OUD pharmacology and treatment, as well as the principles of care and treatment. Subsequent chapters analyze the shortcomings of current approaches to opioid addiction, including the high cost and low value of acute care delivered by minimally trained providers and the fixation on short-term detoxification and rehab. The book offers specific guidance for practical integration of effective opioid use disorder treatment into a range of healthcare settings. Chapters also discuss the unique complexities of caring for special populations with OUD, such as pregnant people and those involved in the criminal legal system. The book concludes with personal experience from individuals with a history of OUD. Socially conscious and practical, *Treating Opioid Use Disorder in General Medical Settings* serves as a crucial evidence-based resource for physicians, nurse practitioners, physician assistants, nurses, and other healthcare professionals.
