Timeless Service in Gamma Sigma Omega Chapter Oct 23 2021 Since the beginning in 1943, the mission of the Gamma Sigma Omega Chapter of Alpha Kappa Alpha Sorority has been to cultivate scholastic and ethical standards, to promote unity and friendship among college women, and to be of service to all mankind. *Timeless Service in Gamma Sigma Omega Chapter* chronicles the history of the women who sojourned in the life of one chapter of the first Black female Greek letter organization and the events that impacted their journey in Savannah, Georgia, from 1943 to 2012. Emma Jean Hawkins Conyers, former president of the GSO Chapter, begins with the story of Adeline Graham, a white philanthropist who bequeathed funds to the chapter for use in establishing an orphanage for Negro children, and reveals how the chapter responded to the challenge. As she continues the chapter's history through the years, Conyers shares notable details on members, awards, community projects, and events that helped to preserve a legacy that endures to this day. *Timeless Service in Gamma Sigma Omega Chapter* captures the spirit of unity, sisterhood, and service that still drives the sorority to fulfill the mission after commencing nearly seven decades ago.

Brothers and Sisters Jun 18 2021 The 1950s are arguably the watershed era in the civil rights movement with the landmark Supreme Court decision of *Brown v. Board of Education* in 1954, the Montgomery Bus Boycott in 1955, and the desegregation of Little Rock (Arkansas) High School in 1957. It was during this period--1955 to be exact--that sociologist Alfred M. Lee published his seminal work *Fraternities without Brotherhood: A Study of Prejudice on the American Campus*. Lee's book was the first and last book to explore diversity within college fraternal groups. More than fifty years later, Craig L. Torbenson and Gregory S. Parks revisit this issue more broadly in their edited volume *Brothers and*

Sisters: Diversity in College Fraternities and Sororities. This volume draws from a variety of disciplines in an attempt to provide a holistic analysis of diversity within collegiate fraternal life. It also brings a wide range of scholarly approaches to the inquiry of diversity within college fraternities and sororities. It explores not only from whence these groups have come but where they are currently situated and what issues arise as they progress.

The Kappa Sigma Book Aug 01 2022 Excerpt from The Kappa Sigma Book: A Manual of Descriptive, Historical, and Statistical Facts Concerning the Kappa Sigma Fraternity One of the American universities of which our country should be most proud has recently celebrated with rejoicing the beginning of an era in her affairs, in the inauguration of her first president. New occasions now teach her new duties, larger opportunity leads her to take up tasks unthought-of even by her great first founder, but by virtue of her unique history, her matchless situation, her spirit of truth and honor, and most of all by the example of consecration to a worthy cause which those men afford who have served her so long and so faithfully for so small a material reward, she remains a blessing and a hope to all the region which receives good in unces from her benign hand. She will continue to in unce all that great civilization which has owed in a stream from Virginia across the South and West, as Harvard and Yale have in unced that civilization which has gone out from New England to the Northwest, and met the other upon the Pacific coast. African American Fraternities and Sororities Jul 20 2021 The rich history and social significance of the "Divine Nine" African American Greek-letter organizations is explored in this comprehensive anthology. In the long tradition of African American benevolent and secret societies, intercollegiate African American fraternities and sororities have strong traditions of fostering brotherhood and sisterhood among their members, exerting considerable influence in the African American community and being in the forefront of civic action, community service, and philanthropy. Dr. Martin Luther King, Jr., Toni Morrison, Arthur Ashe, and Sarah Vaughn are just a few of the trailblazing members of these organizations. African American Fraternities and Sororities places the history of these organizations in context, linking them to other movements and organizations that predated them and tying their history to the Civil Rights movement. It explores various cultural aspects of the organizations, such as auxiliary groups, branding, calls, and stepping, and highlights the unique role of African American sororities.

The University of Illinois, 1894-1904 Jun 06 2020 The distinguished historian Winton U. Solberg presents a detailed case study of one institution's transformation into a modern American university. The years 1894 to 1904 mark the stormy tenure of Andrew S. Draper as president of the University of Illinois. Draper, a successful superintendent of schools with no college or university experience and no credentials as a post-secondary administrator, presided over many crucial improvements in the university's physical plant, curricula, and other areas. However, he failed to infuse the university with a spirit of cohesion, and his term as president was fraught with conflict. From his inauguration on, the autocratic Draper collided with deans and faculty who opposed both the substance of his changes and the manner in which he presented and implemented them. This volume closely examines the Draper years from the perspectives of faculty, students, and administrators. Solberg outlines the administrative, faculty, staff, and physical infrastructure. He also reveals a vibrant and varied student life, including a whirl of social activities, literary societies, intercollegiate debate and athletics, hazing, religion, and increasingly prominent fraternities. A sharply delineated and detailed picture of a university in transition, The University of Illinois, 1894-1904 traces the school's shift from an institution known primarily as a training ground for engineers to a full-fledged university poised to compete on the national level.

Supporting Fraternities and Sororities in the Contemporary Era May 06 2020 Supporting Fraternities and Sororities in the Contemporary Era is inspired by sustained and reoccurring professional conversations and scholarship that have suggested that not just change is necessary, but that there ought to be a fundamental shift towards reconceptualizing the construct of fraternities and sororities. The co-editors curate work from scholars and noteworthy practitioners from across higher education to provide an imperative text that reflects the complexity and expansiveness by addressing diversity, programming, and support approaches. This text commences with the understanding that issues will continuously exist, requiring a greater nuanced depth of appreciation to reduce their negative impact. It also summarizes national organizations from authentic, represented voices. Chapters then focus on solutions to support the fraternity and sorority experience, providing strategies and emerging explanations for the issues described in this text. Supporting Fraternities and Sororities seeks to do exactly as the title implies: to

Artificial Intelligence Applications and Innovations Jan 02 2020 Artificial Intelligence applications build on a rich and proven theoretical background to provide solutions to a wide range of real life problems. The ever expanding abundance of information and computing power enables researchers and users to tackle highly interesting issues for the first time, such as applications providing personalized access and interactivity to multimodal information based on preferences and semantic concepts or human-machine interface systems utilizing information on the affective state of the user. The purpose of the 3rd IFIP Conference on Artificial Intelligence Applications and Innovations (AIAI) is to bring together researchers, engineers, and practitioners interested in the technical advances and business and industrial applications of intelligent systems. AIAI 2006 is focused on providing insights on how AI can be implemented in real world applications.

Towards Autonomous, Adaptive, and Context-Aware Multimodal Interfaces: Theoretical and Practical Issues Aug 09 2020 This volume brings together the advanced research results obtained by the European COST Action 2102: "Cross Modal Analysis of Verbal and Nonverbal Communication". The research published in this book was discussed at the 3rd jointly EUCOGII-COST 2102 International Training School entitled "Toward Autonomous, Adaptive, and Context-Aware Multimodal Interfaces: Theoretical and Practical Issues", held in Caserta, Italy, on March 15-19, 2010. The book is arranged into two scientific sections. The 18 revised papers of the first section, "Human-Computer Interaction: Cognitive and Computational Issues", deal with conjectural and processing issues of defining models, algorithms, and strategies for implementing cognitive behavioural systems. The second section, "Synchrony through Verbal and Nonverbal Signals", presents 21 revised lectures that provide theoretical and practical solutions to the modelling of timing synchronization between linguistic and paralinguistic expressions, actions, body movements, activities in human interaction and on their assistance for an effective communication.

American Educational History Journal Jun 26 2019 The American Educational History Journal is a peer-reviewed, national research journal devoted to the examination of educational topics using perspectives from a variety of disciplines. The editors of AEHJ encourage communication between scholars from numerous disciplines, nationalities, institutions, and backgrounds. Authors come from a variety of disciplines including political science, curriculum, history, philosophy, teacher education, and educational leadership. Acceptance for publication in AEHJ requires that each author present a well-articulated argument that deals substantively with questions of educational history. AEHJ accepts papers of two types. The first consists of papers that are presented each year at our annual meeting. The second type consists of general submission papers received throughout the year. General submission papers may be submitted at any time. They will not, however, undergo the review process until January when papers presented at the annual conference are also due for review and potential publication. A Manual of the Excellent Man Jan 26 2022 The Venerable Mahathera Ledi Sayadaw wrote this manual in reply to a layperson requesting guidance in developing insight, clarification of doctrinal aspects, and how to advance from being a blind worldling to a wise and virtuous person, i.e. one who has the eye of knowledge. In clear, concise, vivid language the author explains the perfections, seven aspects of the five aggregates to be perceived, the true peace of Nibbana, how to be mindful while doing a meritorious deed, practicing the three refuges, the four types of Buddhists, and understanding the Four Noble Truths and Dependent Origination. Finally, an exhortation regarding great opportunities: human rebirth, meeting the Buddha, becoming a bhikkhu, having confidence, and hearing the Dhamma.

Paramecium Oct 30 2019 The techniques used to decipher the genetic makeup of species as well as epigenetic mechanisms are essential for explaining life forms and studying their DNA. As a eukaryotic model, Paramecium is well suited for genetic analysis. Taking a rather unconventional view of genetics, Paramecium: Genetics and Epigenetics explores how to use this protozoan as a basis for studying complex cells. The book discusses various aspects of Paramecium, including the cortex, the cytoplasm, nuclei, asexual fission, conjugation, autogamy, macronuclear regeneration, cytogamy, life cycle phases, and behavior. It examines the assorted mating types of the genus and how these mating types are determined. It also elucidates some techniques that identify genetically defined genes with the DNA from a library that comprises those genes and details the genetic, epigenetic, chemical, and molecular facets of several different traits. In addition, the authors chronicle the history and reemergence of investigating RNA and DNA in Paramecium. With many powerful tools now available, Paramecium research is entering a new frontier in molecular biology. A full account of Paramecium genetics, this book presents a wealth of time-consuming observations and remarkable phenomena that will lead to a better understanding of complex cells.
