The "People Power" Health Superbook: Book 23. Green Health Guide (People Get Sick & Die from Chemicals & Pollution) Apr 27 2020 The Natural Law of the Universe is be who you were born to be, take what you need and leave the rest. I got sick from the sulphites in lemon juice then I started getting headaches from something. I think it was aspartame in pop. I got Dr. Hulda Clark's book Cure for all Cancers and when I read it, I thought she was obsessed with being pure away from all the chemicals in industrial products but she did what nobody else has done. She catalogs almost every product in existence and tells you what's wrong with it. The modern capitalist industries will not tell you if their products contain materials that are toxic to your health. You have to learn these things for yourself then decide how dangerous all that stuff is and if it's a risk to your longevity and quality of life. For practical books about green living, try #640 or HF5413 at the library. Environmental books are at #304, #333.72-99 or S930 at the library. There may be a few at #363.700 or GE60.

The "People Power" Health Superbook: Book 28. Canadian Medical Guide (Covers Most Topics Including Mental Health) May 29 2020 This book is an extensive listing of websites, phone numbers, addresses and organizations for most entities within the medical and mental health realms throughout Canada including the territories. We're all afraid of getting sick and dying which is why we want our public health care system because we know no matter what happens in our lives, our medical needs will be taken care of but there is a problem, namely that a fully funded public healthcare system without allowance for private, for-profit healthcare providers like they have in Britain, strains the system. Common sense says a two-tiered system is best: Public where everything is free. Private, if you don't want to deal with the public system and want faster service, you pay for it through private clinics.

Chief Kerry's Moose May 21 2022 "... A guidebook to land-use and occupancy mapping, research design and data collection -- into Chinese. Indigenous peoples as far away as Australia are using the reference book. "We adopted the approach that is outlined in this guidebook, and built an inventory of quality information about our historical uses of Tsleil-Waututh territory," says Chief Leonard George. "The resulting maps and documentation are

benefiting our negotiations for co-management of traditional lands, and helping us build the relationships and understanding required for the protection of our Aboriginal title and rights. Our land use maps are thus aiding in the survival and growing strength of our nation, and will benefit future generation." Written by Terry Tobias, the book was published by Ecotrust Canada and the Union of BC Indian Chiefs in response to a need expressed by Aboriginal leaders and researchers across Canada about the poor quality of land-use and occupancy maps, and the absence of instructional materials in the field. "Chief Kerry's Moose is an excellent learning tool for First Nation's environmental and cultural staff who may wish to interview Elders and other experts about Innu life on the land," says Richard Nuna, Manager of Environment, Culture and Conservation for the Innu Nation."--from pub. website.
