[The Da Vinci Code](#) Mar 06 2021 MORE THAN 80 MILLION COPIES SOLD Nominated as one of America's best-loved novels by PBS's The Great American Read While in Paris, Harvard symbologist Robert Langdon is awakened by a phone call in the dead of the night. The elderly curator of the Louvre has been murdered inside the museum, his body covered in baffling symbols. As Langdon and gifted French cryptologist Sophie Neveu sort through the bizarre riddles, they are stunned to discover a trail of clues hidden in the works of Leonardo da Vinci—clues visible for all to see and yet ingeniously disguised by the painter. Even more startling, the late curator was involved in the Priory of Sion—a secret society whose members included Sir Isaac Newton, Victor Hugo, and Da Vinci—and he guarded a breathtaking historical secret. Unless Langdon and Neveu can decipher the labyrinthine puzzle—while avoiding the faceless adversary who shadows their every move—the explosive, ancient truth will be lost forever.

**Consumer Perceptions of Tap Water, Bottled Water, and Filtration Devices** Jul 22 2022 The objectives of this project were (1) to measure consumer satisfaction with tap water quality, (2) to investigate demographic trends in consumer satisfaction and consumption of tap water alternatives, (3) to identify the factors that cause consumers to purchase and use bottled water and POU/POEs, and (4) to develop a list of recommendations for water utilities that can improve consumer satisfaction and help bridge gaps between perception and reality. The following are highlights from the research project: Consumption rate of tap water alternatives is highly dependent on geographic location (20% usage rate in the Midwest vs. 80% on the West Coast). Tap water drinkers are more satisfied (20% on average) than tap water alternative drinkers concerning various aspects of tap water (e.g., overall quality, taste, appearance, smell,

safety, healthiness). Tap water quality had limited influence on consumer satisfaction. The highest level of correlation (between satisfaction and water quality) was found to have an R<sup>2</sup> - value of 34%-64% for hardness and total dissolved solids. Safety was the primary motivator for filtered water drinkers. Bottled water drinkers were divided between taste, safety, and healthiness.

**Explaining Hitler** Oct 21 2019 In *Explaining Hitler*, Ron Rosenbaum investigates the meanings and motivations people have attached to Hitler and his crimes against humanity. What does Hitler tell us about the nature of evil? In often dramatic encounters, Rosenbaum confronts historians, scholars, filmmakers, and deniers as he skeptically analyzes the key strains of Hitler interpretation. A balanced and thoughtful overview of a subject both frightening and profound, this is an extraordinary quest, an expedition into the war zone of Hitler theories, "a provocative work of cultural history that is as compelling as it is thoughtful, as readable as it is smart" (New York Times). First published in 1998 to rave reviews, *Explaining Hitler* became a New York Times–bestseller. This new edition is an update of that classic and a critically important contribution to the study of the twentieth century's darkest moment.
