"Shall I Feed My Daughter, Or Educate Her?" Jun 20 2019 "This report concludes that many girls simply have no access to education, including because of a shortage of government schools – especially for girls. Nearly 22.5 million of Pakistan's children – in a country with a population of just over 200 million – are out of school, the majority of them girls. Thirty-two percent of primary school age girls are out of school in Pakistan, compared with 21 percent of boys. By ninth grade, only 13 percent of girls are still in school."--Publisher website.

Why Reading Books Still Matters Apr 11 2021 Bringing together strands of public discourse about valuing personal achievement at the expense of social values and the impacts of global capitalism, mass media, and digital culture on the lives of children, this book challenges the potential of science and business to solve the world's problems without a complementary emphasis on social values. The selection of literary works discussed illustrates the power of literature and human arts to instill such values and foster change. The book offers a valuable foundation for the field of literacy education by providing knowledge about the importance of language and literature that educators can use in their own teaching and advocacy work.
