Raspberry Pi 3 Projects for Java Programmers Oct 25 2019 Learn the art of building enticing projects by unleashing the potential of Raspberry Pi 3 using Java About This Book Explore the small yet powerful mini computer in order to run java applications Leverage Java libraries to build exciting projects on home automation, IoT, and Robotics by leveraging Java libraries Get acquainted with connecting electronic sensors to your Raspberry Pi 3 using Java APIs. Who This Book Is For The book is aimed at Java programmers who are eager to get their hands-on Raspberry Pi and build interesting projects using java. They have a very basic knowledge of Raspberry Pi. What You Will Learn Use presence detection using the integrated bluetooth chip Automatic light switch using presence detection Use a centralized IoT service to publish data using RPC Control a robot by driving motors using PWM Create a small web service capable of performing actions on the Raspberry Pi and supply readings Image capture using Java together with the OpenCV framework In Detail Raspberry Pi is a small, low cost and yet very powerful development platform. It is used to interact with attached electronics by the use of it's GPIO pins for multiple use cases, mainly Home Automation and Robotics. Our book is a project-based guide that will show you how to utilize the Raspberry Pi's GPIO with Java and how you can leverage this utilization with your knowledge of Java. You will start with installing and setting up the necessary hardware to create a seamless development platform. You will then straightaway start by building a project that will utilize light for presence detection. Next, you will program the application, capable of handling real time data using MQTT and utilize RPC to publish data to adafruit.io. Further, you will build a wireless robot on top of the zuma chassis with the Raspberry Pi as the main controller. Lastly, you will end the book with advanced projects that will help you to create a multi-purpose IoT controller along with building a security camera that will perform image capture and recognize faces with the help of notifications. By the end of the book, you will be able to build your own real world usable projects not limited to Home Automation, IoT and/or Robotics utilizing logic, user and web interfaces. Style and approach The book will contain projects that ensure a java programmer gets started with building interesting projects using the small yet powerful Raspberry Pi 3. iPhoneography Feb 21 2022 This book introduces you to professional photography and composition principles, tricks and techniques of iphoneography, photosharing, and more. Do you have a smartphone with you right now? If you do, along with this book, you've got everything you need to make amazing photography. The first three chapters of the book use digital photography history to give you an overview of the capabilities that you can employ, and the remainder of the book is focused on hands on techniques of iphoneography so that you are getting professional results. This title uses the iPhone and iPhone apps in its examples; your own smart phone and individual apps may be different, but the techniques you'll gain from this book, and the insights into your own creative potential are not dependent on specific equipment. Maybe you occasionally take a great shot with your smartphone camera but you wonder what you need to keep doing right to make that kind of difference in all your shots. Maybe you're suspecting that you no longer need to lug around a DSLR camera to bring home great photographs. And maybe you just get a charge out of capturing inspired moments and sharing them in all the glory deserve with others. WHAT YOU'LL LEARN: • An understanding of the methods used in DSLR photography vs iPhoneography. • The connection between the iPhone and the artist. • Practical tips and techniques for creating photos and art with your iPhone. • Taking your visions further with discovery and chance explorations.• Connecting with the iPhoneography and iPhone Art community. WHO THIS BOOK IS FOR: The audience is threefold: 1.) Amateur photographers who already sense that their smartphone is the only tool they truly need in order to grow their skills 2.) Serious photographers who are part of the growing "mobile art" movement that emphasizes creative eye over hardware 3.) Anyone with a smartphone who wants to take

better photos (because anyone with a smartphone is already taking photos with regularity anyway)

Regulating Convergence Aug 15 2021 Traditionally, the technologies of telecommunications, broadcasting, satellite, and computing operated independently while the industries associated with each were regulated independently along the same lines. Technological convergence challenges the vertical regulatory models of broadcasting, telecommunications, and computer services while simultaneously challenging the traditional approach to regulation by nation-states. It is time for a critical examination of regulations which support convergence while addressing the realities of the current media environment. This edited volume provides a heuristic analysis of the challenges facing regulators and media institutions. Chapters explore the nature of the laws and regulations straining under the new technological realities, consider the changes already made to accommodate the new media landscape, and examine new directions and approaches to the regulation of convergent media technologies and media institutions. Susan J. Drucker is Professor of Journalism, Media Studies, and Public Relations in the School of Communication at Hofstra University. She is the treasurer of the Urban Communication Foundation and a partner in Communication Landscapers, a consulting firm. She is an attorney, and Series Editor of the Communication Law series for Peter Lang Publishing. She is author and co-editor of over 9 books including The Urban Communication Reader I and II, Voices in the Street: Gender, Media and Public Space, and two editions of Real Law @ Virtual Space: The Regulation of Cyberspace (1999, 2005) with Gary Gumpert. Her work examines the relationship between

media technology and human factors, particularly as viewed from a legal perspective. Gary Gumpert is Emeritus Professor of Communication at Queens College of the City University of New York and President of the Urban Communication Foundation. He is co-founder of Communication Landscapers, a consulting firm. His publications include Talking Tombstones and Other Tales of the Media Age and three edited volumes of Inter/Media: Interpersonal Communication in a Media Age. He is Series Editor of the Urban Communication series for Peter Lang Publishing. His primary research focuses on the nexus of communication technology and social relationships, particularly looking at urban and suburban development, the alteration of public space, and the changing nature of community.

Double Exposure Jun 20 2019 Over the past decade, historians and sociologists have increasingly used visual materials, in particular photographs, in their work. This volume brings together historians, sociologists, anthropologists, and media and visual scholars to articulate how photography, as a practice and as a visual medium, can provide insights into national memory, collective identities, and the historical imagination. This collection allows the reader to trace parallel conceptual developments occurring in the sociology and anthropology of memory and in the history and theory of photography, and to illustrate the unique "angles of vision" these disciplines offer. Photographic images commonly accompany historical accounts, from documentaries to family scrapbooks, and since the early days of commercial photography, pictures have been viewed as tools to capture memories. Later critical writing has challenged this equation by inverting it: photos, along with other archival practices, were often viewed as falling short of their supposed function as vessels of memory and at times even denounced as devices that distorted memories. How does photography participate in the formation and maintenance of collective identities and shared memory discourses, from the family to the nation? Furthermore, how can we begin to conceptualize photography's effects on the historical imagination of individuals and groups? Double Exposure endeavors to answer these questions by calling attention to the variety of contexts in which images circulate and to the narratives from which they spring and which they, in turn, shape. This is the latest volume in Transaction's Memory and Narrative series.

I Am Nov 18 2021 I Am: Remix Your Web Identity explores methods of designing and developing a personal website with RSS feeds that aggregate blog posts along with posts on social networks, such as Flickr, YouTube, Goodreads, Last.fm, and Delicious, in order to regain control and ownership (as well as authorship) of one's identity in one consistent and customized location. The book provides a short overview of the evolution of digital identity and the transformation of personal websites from Geocities to blogs, and discusses the relevance of RSS as a technology that frees content from publishing source constraints. It also underlines the importance of open source in providing power and control over one's image on the Web. Furthermore, it provides an extensive example of a full customization of WordPress through standard languages such as PHP, HTML5, and CSS3, which can be adapted to suit one's own personal identity. I Am: Remix Your Web Identity highlights new ways of being a blogger. While the old personal website or blog is fragmented and distributed across a number of social networks, this often leads to limiting one's identity to a "walled garden" experience. Open-source content management systems such as WordPress work as flexible platforms that can give back a certain degree of control and ownership over what one publishes and distributes across the Internet, aggregating content and updating the notion of "blogging." There are many WordPress and CMS-related books, but, with I Am: Remix Your Web Identity, readers will become not just web designers or web developers, but "web

authors." They will learn how to use RSS, content management systems, PHP, HTML5, and CSS3 as powerful, flexible, and savvy tools to produce, remix, and manage their whole life in the Web 2.0 space.
