The Creation of the Intelligence Community Feb 27 2020 President Truman shuttered the Office of Strategic Services (OSS) as an unneeded, wartime-only special operations/quasi-intelligence agency. The State Department, the Navy, and the War Department quickly recognized that a secret information vacuum loomed and urged the creation of something to replace OSS. These previously declassified and released documents present the thoughtful albeit tortuous and contentious creation of CIA, culminating in the National Security Act of 1947. The declassified historic material dissects the twists and turns and displays the considerable political and legal finesse required to assess the many plans, suggestions, maneuvers and actions that ultimately led to the establishment of the Central Intelligence Agency and other national security entities, which included the incorporation of special safeguards to protect civil liberties. Copies of selected intelligence documents and a timeline of miliestones in the creation of the US Intelligence Community from 1941 through 1964 are included in this resource.

Reading and Writing Public Documents Aug 23 2019 Annotation Government documents--forms, brochures, letters, and policy papers--that are difficult to understand create problems both for the public they're intended to help and for government agencies. In this collection, researchers from five universities in the Netherlands survey recurring problems in government documents and offer possible solutions. The contributors are linguists, document designers, and other communication experts who have studied public documents both empirically and from a design point of view. Though the subject is Dutch documents, the text is in English, and the work may be of interest to those investigating government communication in other nations as well as those who produce similar documents in the private sector. Choosing Big Technologies Jul 26 2022 A collection of 13 papers presented to a symposium in

Florence, Italy, November 1991, and subsequently published as a special issue of History and Technology vol. 9, nos. 1-4. They explore the arguments and motivations of the interest groups--scientists, engineers, industrialists, bureaucrats, politicians--in deciding whether or not a government will take on a large technological project, such as space exploration, remote sensing equipment, particle accelerators, and fancy aircraft. Interactive Multimedia Documents Apr 30 2020 Multimedia information systems is a rapidly growing area of research and development, attracting increasing interest from a variety of application fields including business, entertainment, manufacturing, education, CAD, CAE, medicine, etc. Due to the diverse nature of the information dealt with and the increased functionality (e.g., user interaction), the capabilities and system requirements of multimedia information systems dramatically exceed those of conventional databases and database management systems. This book presents an integrated approach to interactive multimedia documents. After summarizing the prerequisites and background information, the author develops an IMD model taking into account interaction and spatiotemporal composition. Based on this model, the author develops an integrated framework covering most of the steps during the life cycle of an IMD, namely data modeling, authoring, verification and querying, execution and rendering, and indexing.

Law's Documents Aug 27 2022 Illuminating their breadth and diversity, this book presents a comprehensive and multidisciplinary view of legal documents and their manifold forms, uses, materialities and meanings. In 1951, Suzanne Briet, a librarian at the Bibliotheque Nationale in Paris, famously said that an antelope in a zoo could be a document, thereby radically changing the way documents were analysed and understood. In the fifty years since this pronouncement, the digital age has introduced a potentially limitless range of digital and technological forms for the capture and storage of information. In their multiplicity and their ubiquity, documents pervade our everyday life. However, the material, intellectual, aesthetic and political dimensions and effects of documents remain difficult to pin down. Taking a multidisciplinary and international approach, this collection tackles the question, what is a legal document?, in order to explore the material, aesthetic and intellectual attributes of legal documentation; the political and colonial orders reflected and embedded in documents; and the legal, archival and social systems which order and utilise information. As well as scholars in law, documentary theory, history, Indigenous studies, art history and design theory and practice, this book will also appeal to those working in libraries, archives, galleries and museums, for whom the ongoing challenges of documentation in the digital age are urgent and timely questions.

Doing Excellent Social Research with Documents Feb 09 2021 In today's society we increasingly create and consume written content and images. This includes a range of sources, from social media posts to records held within organisations, and everything in between, including news articles, blogs, shopping lists and official government documents. Critically reading these 'documents' can help us to understand a huge amount about society. Doing Excellent Social Research with Documents includes guidance on how to 'read between the lines', and provides an overview of six research projects which use documents as data. The substantive chapters are organised in two sections, with each chapter focused on a specific type of data. Section one focuses on documents that are found in isolation from their authors, including official and historical documents, traditional media, diaries and online content.

Section two focuses on using documents in addition to existing data from primary research, including the role of documents in ethnography and visual research methods. In each chapter, you will be guided through the process of: Developing research questions, and how this impacts on which documents are selected; Considering aspects of bias and quality within the documentary sources; Undertaking analysis using six different strategies including thematic analysis, framework analysis, content analysis, discourse analysis and narrative analysis. Drawing on research projects which reflect real world situations, you will be methodically guided through the research process in detail, enabling you to examine and understand the practices and value of a range of documentary analysis approaches. Doing Excellent Social Research with Documents is a practical how-to guide for students (final year undergraduates onwards) and researchers using documents as data.

MongoDB: The Definitive Guide Sep 28 2022 Manage the huMONGOus amount of data collected through your web application with MongoDB. This authoritative introduction—written by a core contributor to the project—shows you the many advantages of using document-oriented databases, and demonstrates how this reliable, high-performance system allows for almost infinite horizontal scalability. This updated second edition provides guidance for database developers, advanced configuration for system administrators, and an overview of the concepts and use cases for other people on your project. Ideal for NoSQL newcomers and experienced MongoDB users alike, this guide provides numerous real-world schema design examples. Get started with MongoDB core concepts and vocabulary Perform basic write operations at different levels of safety and speed Create complex queries, with options for limiting, skipping, and sorting results Design an application that works well with MongoDB Aggregate data, including counting, finding distinct values, grouping documents, and using MapReduce Gather and interpret statistics about your collections and databases Set up replica sets and automatic failover in MongoDB Use sharding to scale horizontally, and learn how it impacts applications Delve into monitoring, security and authentication, backup/restore, and other administrative tasks

bookdown Aug 15 2021 bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

R Markdown Aug 03 2020 R Markdown: The Definitive Guide is the first official book authored by the core R Markdown developers that provides a comprehensive and accurate reference to the R Markdown ecosystem. With R Markdown, you can easily create reproducible data analysis reports, presentations, dashboards, interactive applications, books, dissertations, websites, and journal articles, while enjoying the simplicity of Markdown and the great power of R and other languages. In this book, you will learn Basics: Syntax of Markdown and R code chunks, how to generate figures and tables, and how to use other computing languages Built-in output formats of R Markdown: PDF/HTML/Word/RTF/Markdown documents and ioslides/Slidy/Beamer/PowerPoint presentations Extensions and applications: Dashboards, Tufte handouts, xaringan/reveal.js presentations, websites, books, journal articles, and interactive tutorials Advanced topics: Parameterized reports, HTML widgets, document templates, custom output formats, and Shiny documents. Yihui Xie is a software engineer at RStudio. He has authored and co-authored several R packages, including knitr, rmarkdown, bookdown, blogdown, shiny, xaringan, and animation. He has published three other books, Dynamic Documents with R and knitr, bookdown: Authoring Books and Technical Documents with R Markdown, and blogdown: Creating Websites with R Markdown. J.J. Allaire is the founder of RStudio and the creator of the RStudio IDE. He is an author of several packages in the R Markdown ecosystem including rmarkdown, flexdashboard, learnr, and radix. Garrett Grolemund is the co-author of R for Data Science and author of Hands-On Programming with R. He wrote the lubridate R package and works for RStudio as an advocate who trains engineers to do data science with R and the Tidyverse.

The Torture Report Dec 27 2019 Sometimes the truth is buried in front of us. That is the case with more than 140,000 government documents relating to abuse of prisoners by U.S. forces during the "war on terror," brought to light by Freedom of Information Act litigation. As the lead author of the ACLU's report on these documents, Larry Siems is in a unique position to chronicle who did what, to whom and when. This book, written with the pace and intensity of a thriller, serves as a tragic reminder of what happens when commitments to law, common sense, and human dignity are cast aside, when it becomes difficult to discern the difference between two groups intent on perpetrating extreme violence on their fellow human beings. Divided into three sections, The Torture Report presents a stunning array of eyewitness and first-person reports by victims, perpetrators, dissenters, and investigators of the CIA's White House-orchestrated interrogations in illegal, secret prisons around the world; the Pentagon's "special projects," in Guantanamo Bay, Cuba; plots real and imagined, and much more.
