**Microwave Effects on DNA and Proteins** Nov 12 2020 For several years, researchers have been reporting the effects of microwave radiation/heating on both the structure and function of DNA, RNA and proteins. For the most part, favourable accelerated biological functions are observed as microwave induced heating occurs, but other not-so favourable effects are also observed, such as denaturation, fragmentation and the so called and ill-explained, non-thermal microwave effects. This volume, the first of its kind, brings researchers together from around the world to discuss their current findings and thinking on the effects of Microwaves on Biological systems, particularly DNA, RNA and proteins, in the form of contributed edited chapters.

**Mapungubwe** Apr 05 2020 An illustrated book about a 1000 year old civilization Between AD 900 and 1300, the Shashe-Limpopo basin in Limpopo Province witnessed the development of an ancient civilization. Like civilizations everywhere, it consisted of a complex social organization supported by intensive agriculture and long-distance trade. The Mapungubwe Cultural Landscape, as it is now known, was the forerunner of the famous town of Great Zimbabwe, situated about 200 kilometers to the north, and its cultural connection to Great Zimbabwe and the Venda people allows archaeologists to reconstruct its evolution. This generously illustrated book tells the story of an African civilization that began more than 1000 years ago. It is the first in a series of accessible books written by specialists for visitors to South Africa's World Heritage Sites.

**The Art of Not Being Governed** Jan 15 2021 For two thousand years the disparate groups that now reside in Zomia, a mountainous region the size of Europe that consists of portions of seven Asian countries, have fled the projects of the organized state societies that surround them - slavery, conscription taxes, corvee labor, epidemics, and warfare. Significantly, writes James C. Scott in this iconoclastic study, these people are not innocents who have yet to benefit from all that civilization has to offer; they have assessed state-based "civilizations" and have made a conscious choice to avoid them. The book is essentially an "anarchist history," the first-ever examination of the huge literature on state-making that evaluates why people would deliberately and reactively remain stateless. Among the strategies employed by the people of Zomia to remain stateless are physical dispersion in rugged terrain; cropping practices that enhance mobility; pliable ethnic identities; devotion to prophetic, millenarian leaders; and maintenance of a largely oral culture that allows them to reinvent their histories and genealogies as they move between and around states. *The Art of Not Being Governed* challenges us with a radically different approach to history that views from the perspective of stateless peoples and redefines state-making as a form of "internal colonialism." In contrast to the Western ideal of the "social contract" as fundamental to state-making, Scott finds the disturbing mechanism of subjugation to be more in line with the historical facts in mainland Southeast Asia. The author's work on Zomia represents a new way to think of area studies that will be applicable to other runaway and fugitive communities, be they Gypsies, Cossacks, tribes fleeing slave-raiders, Marsh Arabs, and San-Bushmen. In accessible language, Scott, recognized worldwide as an eminent authority in Southeast Asian, peasant, and agrarian studies, tells the story of the peoples of Zomia and their unlikely odyssey in search of self-determination. Along the way he redefines our views on Asian politics, history, and demographics, and even our fundamental ideas about what constitutes civilization.

**Elephant management** Aug 10 2020 Elephants are among the most magnificent – but also most problematic –members of South Africa's wildlife population. While they are sought after by South African and foreign tourists alike, they also have a major impact on their environment. As a result, elephant management has become a highly complex and often controversial discipline. The information needed to underpin vital decisions about elephant management has largely been unavailable to decision-makers, contested by experts, or simply unknown. As a result, the South African Minister for Environmental Affairs and Tourism convened a round table to advise him on this issue. The round table recommended that a scientific assessment of elephant management be undertaken to gather, evaluate, and present all the relevant information on this topic. Its main findings and recommendations are contained in this volume. *Elephant Management* is the first book of its kind, combining the work of more than 60 national and international experts. Extensively reviewed by policy-makers and other stakeholders, it is the most systematic and comprehensive review of savanna elephant populations and factors relevant to managing them to date. As such it is of interest to a broad spectrum of readers in South Africa and elsewhere. Above all, it is aimed at helping conservation policy-makers and practitioners to choose the best possible options for the sustainable preservation of these iconic animals.

**Ancient Mesopotamia** Sep 22 2021 "This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, *New York Times Book Review* *Ancient Mesopotamia*—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, *Book Week* "Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."—Samuel Noah Kramer, *Archaeology A*. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the *Assyrian Dictionary of the Oriental Institute* and John A. Wilson Professor of Oriental Studies at the University of Chicago.

**Pharmacotherapy of Depression** Feb 02 2020 Comprehensive and state of the art, the second edition of *Pharmacotherapy of Depression* offers major revisions of every chapter and the addition of new chapters by expert contributors. The first chapter reviews the neurobiology of depression, which lays the groundwork for understanding the mechanisms of action of antidepressants. In the next chapter, a review of the general principles guiding the diagnosis and medication treatment of unipolar depression is provided. The clinical pharmacology of antidepressants is reviewed in some detail, supplemented by tables that provide information on dosing, indications, and metabolism. Augmentation strategies are reviewed, including the use of non-traditional agents. The chapters that follow next address the use of antidepressants in special populations, such as the elderly and depressed individuals with psychosis, bipolar disorder, substance abuse, and post-traumatic stress disorder. The complex issues involving the diagnosis and treatment of depression during pregnancy is thoroughly reviewed in Chapter 8 and provides a synthesis of the scientific literature in the area, one that is noted for contradictory and controversial findings, as well as guidelines for prescribing. The next chapter then provides an overview of the treatment of depression in the pediatric population, highlighting clinical concerns such as suicide risk. The book concludes with two chapters at the interface of medicine and psychiatry in the treatment of mood disorders: managing depression in primary care settings and depression associated with medical illnesses. The outstanding clinician-scientists who have contributed to this volume are all leaders in their fields and represent a broad spectrum of renowned institutions. A timely contribution to the literature, *The Pharmacotherapy of Depression, Second Edition*, offers busy clinicians from many disciplines a strong scientific foundation that seamlessly transitions into practical recommendations for clinical

practice. The result is another gold-standard guide to the safe and effective use of the latest antidepressant medications.

**Natural Liberty** Jun 27 2019 At head of title: Sage-Femme Collective.

**Adaptive Languages** Apr 17 2021 Languages carry information. To fulfil this purpose, they employ a multitude of coding strategies. This book explores a core property of linguistic coding – called lexical diversity. Parallel text corpora of overall more than 1800 texts written in more than 1200 languages are the basis for computational analyses. Different measures of lexical diversity are discussed and tested, and Shannon’s measure of uncertainty – the entropy – is chosen to assess differences in the distributions of words. To further explain this variation, a range of descriptive, explanatory, and grouping factors are considered in a series of statistical models. The first category includes writing systems, word-formation patterns, registers and styles. The second category includes population size, non-native speaker proportions and language status. Grouping factors further elicit whether the results extrapolate across – or are limited to – specific language families and areas. This account marries information-theoretic methods with a complex systems framework, illustrating how languages adapt to the varying needs of their users. It sheds light on the puzzling diversity of human languages in a quantitative, data driven and reproducible manner.

**The Complete Sailing Manual** Apr 29 2022 The only sailing manual you will ever need, covering everything from sailing basics to making repairs and mastering navigation. The undisputed market leader in sailing guides, this fully revised and updated sailing manual answers questions about any sailing situation - with thorough coverage of all aspects of sailing and boat ownership. In DK’s The Complete Sailing Manual, former British national champion Steve Sleight offers a wealth of expert advice and guidance in the form of a complete tuition course on seamanship, which is brought to life with breathtaking action photography and clear instructions. Fully revised, this new edition features all of the latest developments in sailing - including foiling, long-distance cruising, and high-speed apparent-wind sailing - and navigation, with technology such as modern performance systems and electronic navigation. It also highlights the latest rules, regulations, practices for every keen sailor, from the novice to expert. Includes essential information, handy diagrams, and step-by-step artwork. The Complete Sailing Manual is the ultimate sailing ebook to keep by your side when out on the waves.

**Infertility Counseling** Nov 24 2021 Infertility Counseling: A Comprehensive Handbook for Clinicians, 2nd edition, is a comprehensive, multidisciplinary textbook for all health professionals providing care for individuals facing reproductive health issues. It is the most thorough and extensive book currently available for clinicians in the field of infertility counseling, providing an exhaustive and comprehensive review of topics. It addresses both the medical and psychological aspects of infertility, reviewing assessment approaches, treatment strategies, counseling for medical conditions impacting fertility, third-party reproduction, alternative family building and post infertility counseling issues. Each chapter follows the same format: introduction, historical overview, literature review, theoretical framework, identification of clinical issues, suggestions for therapeutic interventions, and future implication. This edition also includes extensive appendixes of clinical tools useful to the clinician, including an Internet database of resources and an extensive glossary of terminology.

**Computers Helping People with Special Needs** Dec 14 2020 The two-volume set LNCS 12376 and 12377 constitutes the refereed proceedings of the 17th International Conference on Computers Helping People with Special Needs, ICCHP 2020, held in Lecco, Italy, in September 2020. The conference was held virtually due to the COVID-19 pandemic. The 104 papers presented were carefully reviewed and selected from 206 submissions. Included also are 13 introductions. The papers are organized in the following topical sections: Part I: user centred design and user participation in inclusive R&D; artificial intelligence, accessible and assistive technologies; XR accessibility – learning from the past, addressing real user needs and the technical architecture for inclusive immersive environments; serious and fun games; large-scale web accessibility observatories; accessible and inclusive digital publishing; AT and accessibility for blind and low vision users; Art Karshmer lectures in access to mathematics, science and engineering; tactile graphics and models for blind people and recognition of shapes by touch; and environmental sensing technologies for visual impairment Part II: accessibility of non-verbal communication: making spatial information accessible to people with disabilities; cognitive disabilities and accessibility – pushing the boundaries of inclusion using digital technologies and accessible eLearning environments; ICT to support inclusive education – universal learning design (ULD); hearing systems and accessories for people with hearing loss; mobile health and mobile rehabilitation for people with disabilities: current state, challenges and opportunities; innovation and implementation in the area of independent mobility through digital technologies; how to improve interaction with a text input system; human movement analysis for the design and evaluation of interactive systems and assistive devices; and service and care provision in assistive environments 11 chapters are available open access under a Creative Commons Attribution 4.0 International License via [link.springer.com](http://link.springer.com).

**Polymorphism** Mar 05 2020 Edited by one of the leading experts in the field, this handbook emphasizes why solid-state issues are important, which approaches should be taken to avoid problems and exploit the opportunities offered by solid state properties in the pharmaceutical and agricultural industries. With its practical approach, this is at once

a guideline for development chemists just entering the field as well as a high-quality source of reference material for specialists in the pharmaceutical and chemical industry, structural chemists, physicochemists, crystallographers, inorganic chemists, and patent departments.

**Handbook of Pharmaceutical Excipients** Feb 25 2022 An internationally acclaimed reference work recognized as one of the most authoritative and comprehensive sources of information on excipients used in pharmaceutical formulation with this new edition providing 340 excipient monographs. Incorporates information on the uses, and chemical and physical properties of excipients systematically collated from a variety of international sources including: pharmacopeias, patents, primary and secondary literature, websites, and manufacturers' data; extensive data provided on the applications, licensing, and safety of excipients; comprehensively cross-referenced and indexed, with many additional excipients described as related substances and an international supplier's directory and detailed information on trade names and specific grades or types of excipients commercially available.

*Encyclopedia of Contemporary Chinese Culture* Sep 10 2020 Collects entries on contemporary Chinese culture since 1980, discussing such topics as prisons, underground churches, and rock groups.

WALNECK'S CLASSIC CYCLE TRADER, FEBRUARY 1991 Aug 02 2022

**The Amboseli Elephants** Jul 21 2021 Elephants have fascinated humans for millennia. Aristotle wrote of them with awe and Hannibal used them in warfare. This book is the summation of what's been learned from the Amboseli Elephant Research Project (AERP) - the longest continuously running elephant research project in the world.

**Handbook of Sweeteners** Aug 22 2021 The study of sweetness and sweeteners has recently been an area well served by books at all levels, but this volume was planned to fill what we perceived as a gap in the coverage. There appeared to be no book which attempted to combine a study of sweetness with a thorough but concise coverage of all aspects of sweeteners. We set out to include all the important classes of sweeteners, including materials which do not yet have regulatory approval, so that clear comparisons could be made between them and their technological advantages and disadvantages. To achieve our first aim, of sufficient depth of coverage, the accounts within this volume are comprehensive enough to satisfy the requirements of a demanding readership, but cannot be exhaustive in a single volume of moderate proportions. The second aim, of breadth and conciseness, is satisfied by careful selection of the most pertinent material. For the purposes of this book, a sweetener is assumed to be any substance whose primary effect is to sweeten a food or beverage to be consumed, thus including both the nutritive and non-nutritive varieties, from the ubiquitous sucrose to the lesser known, newer developments in alternative sweeteners. The volume has its contents structured in a logical manner to enable it to be used in an ordered study of the complete subject area or as a convenient reference source.

**Limitele meritocra?iei într-o societate agrar?. ?omaj intelectual ?i radicalizare politic? a tineretului în România interbelic?** Jul 09 2020 Dornic? s? se desprind? de trecut, România se angajeaz? dup? 1918 într-un proces de regenerare. Aspira?ia spre înnoire este vizibil? în toate domeniile, inclusiv în cel al politicilor culturale, care au drept scop schimbarea elitelor. Într-o societate agrar? în care vechea elit? era una aristocratic?, e?ecul înv???mântului accesibil unor categorii mai largi de a primeni elita conduce la o reac?ie antisistem a tineretului, la polemici privind rolul intelectualului ?i la ?omaj intelectual. Efectele ultime vor fi escaladarea na?ionalismului ?i diferite încerc?ri de manipulare a noilor genera?ii, de la mi?carea legionar? la Str?jeria lui Carol al II-lea ?i, ulterior, la experimental Serviciului Social creat de rege împreun? cu Dimitrie Gu?ti.

**Ducati** May 31 2022 Nothing gets the heart of a two wheel enthusiast pounding faster than the sight of Casey Stoner pushing his fire breathing red rocket around the fastest race tracks throughout the world. The bike that has successfully supported his campaign is Ducati. This marque has risen over the last 20 years from virtual obscurity to enthusiast worship such as that of its four wheel cousin, Ferrari. In Ducati: A Photographic Tribute, photographer Phil Aynsley, a passionate devotee of the Italian marque has captured the romance and excitement of these machines which includes rarely seen images of the Ducati factory plus intimate views from inside the pits of many MotoGP and World Superbike rounds. This is the ultimate must-have for all keen motorcycle enthusiasts.

**The Boy's Book of Adventure** Dec 26 2021 An outdoor activity guide for boys outlines nature-themed craft projects while explaining how to develop proficient skills in areas ranging from reading topographic maps and identifying birds to using a compass and providing first-aid for injuries.

**One Thousand Ways to Make \$1000** Sep 30 2019 First published in 1936, One Thousand Ways to Make \$1000 is the long out-of-print book that Warren Buffett's biographers credit with shaping the legendary investor's business acumen and giving him his trademark appreciation of compound interest. After pulling a copy of One Thousand Ways off a library shelf at age eleven and devouring F.C. Minaker's plucky and practical business advice, Buffett declared that he would be a millionaire by the time he was 35. Written in the immediate, conversational style of Dale Carnegie's How to Win Friends and Influence People, this book is full of inventive ideas on how to make money

through excellent salesmanship, hard work, and resourcefulness. While some of the ideas may seem quaint today—goat dairying, manufacturing motor-driven chairs, and renting out billiard tables to local establishments are among the money-making ideas presented—the underlying fundamentals of business explained in these pages remain as solid as they were over seventy years ago. Covering a wide spectrum of topics including investing, marketing, merchandising, sales, customer relations, and raising money for charity, *One Thousand Ways to Make \$1000* is both a durable, classic business book and a fascinating portrait of determined entrepreneurship in Depression-era America. Every effort has been made to reproduce the content exactly as it was originally presented.

*Fantasies of a Bollywood Love Thief* Mar 17 2021 A firsthand look inside the world's largest film industry examines the world of Bombay, India, films, following the making of a Bollywood version of *Othello*, examining the vast popularity of Hindi movies, detailing the unique rituals and culture of the Bollywood moviemaking industry, and profiling key actors, directors, musicians, and others. Original.

**Cyber Security Policy Guidebook** May 19 2021 Drawing upon a wealth of experience from academia, industry, and government service, *Cyber Security Policy Guidebook* details and dissects, in simple language, current organizational cyber security policy issues on a global scale—taking great care to educate readers on the history and current approaches to the security of cyberspace. It includes thorough descriptions—as well as the pros and cons—of a plethora of issues, and documents policy alternatives for the sake of clarity with respect to policy alone. The Guidebook also delves into organizational implementation issues, and equips readers with descriptions of the positive and negative impact of specific policy choices. Inside are detailed chapters that: Explain what is meant by cyber security and cyber security policy Discuss the process by which cyber security policy goals are set Educate the reader on decision-making processes related to cyber security Describe a new framework and taxonomy for explaining cyber security policy issues Show how the U.S. government is dealing with cyber security policy issues With a glossary that puts cyber security language in layman's terms—and diagrams that help explain complex topics—*Cyber Security Policy Guidebook* gives students, scholars, and technical decision-makers the necessary knowledge to make informed decisions on cyber security policy.

*Advanced Magnetic Materials* Jul 29 2019 This book reports on recent progress in emerging technologies, modern characterization methods, theory and applications of advanced magnetic materials. It covers broad spectrum of topics: technology and characterization of rapidly quenched nanowires for information technology; fabrication and properties of hexagonal ferrite films for microwave communication; surface reconstruction of magnetite for spintronics; synthesis of multiferroic composites for novel biomedical applications, optimization of electroplated inductors for microelectronic devices; theory of magnetism of Fe-Al alloys; and two advanced analytical approaches for modeling of magnetic materials using Everett integral and the inverse problem approach. This book is addressed to a diverse group of readers with general background in physics or materials science, but it can also benefit specialists in the field of magnetic materials.

**The Gayer-Anderson Cat** Feb 13 2021 This text contains a selection of the prints and drawings of Albrecht Durer (1471-1528). It includes some of Durer's best-known works including early figure studies, landscape watercolours, animal studies drawn from nature and his imaginative famous prints such as 'Adam and Eve' and 'Rhinoceros'."

**Innovation from Emerging Markets** Oct 12 2020 Reveals the breadth of innovation in emerging markets, from drivers and types to outcomes and implications.

*Autocar & Motor* Sep 03 2022

*Dein Gehirn* Dec 02 2019 In diesem Buch geht es um den feuchten Klumpen Zellgewebe, der sich Gehirn nennt und für unterschiedlichste Phänomene in Ihrem Leben verantwortlich ist: von der echten und wahren Liebe über die Tatsache, dass Sie morgens aufstehen, bis zur Fähigkeit, sich die Schuhe zu binden. Ihre wichtigste Hardware überhaupt -- und Sie haben vermutlich noch kein Handbuch dazu! Hiermit halten Sie nun einerseits einen vergnüglichen populärwissenschaftlichen Führer durch Ihr Gehirn in den Händen, andererseits aber auch einen ganz konkreten Ratgeber zu Ernährungsfragen, Gedächtnistraining und psychologischen Themen. Ernährung und Schlaf Ihr Gehirn hat eine ordentliche Wartung verdient! Dazu gehören eine sinnvolle Ernährung und ausreichende Ruhephasen. Lernen Sie zunächst die Gehirnsysteme kennen, die für Ihre Zeitsteuerung und die schlimmsten Fressattacken verantwortlich sind. Macken und Marotten Das Gehirn arbeitet mit unzähligen Abkürzungen und automatischen Annahmen. Das kann viel Zeit sparen, Sie aber auch zu Trugschlüssen verleiten. Erfahren Sie, welche Fehler Ihr Hirn typischerweise macht, lassen Sie sich von optischen Täuschungen verblüffen und lernen Sie ein paar coole Party-Tricks kennen. Wachstum und Alter Es klingt erschreckend -- schon ab dem 20. Lebensjahr schrumpft das Gehirn wieder. Leute mit Köpfchen können das aber kompensieren, indem sie die Effizienz ihres Gehirns ankurbeln. Hier lernen Sie die besten Kniffe kennen, um gegen Ihr schlechtes Gedächtnis anzugehen und geistig fit zu bleiben. Thema ist auch, wie sich Ihr Gehirn insgesamt im Lauf der Zeit entwickelt -- das dürfte besonders für frisch gebackene Eltern und düster gestimmte Pubertierende interessant sein. Freude, Stress und Liebe Was unterscheidet das Gehirn eines Frischverliebten von dem eines Geisteskranken? Weniger als Sie glauben! Die Hardware des Gehirns kann Ihnen so einiges über die Rätsel menschlichen Verhaltens verraten ...

**Outback Australia** Jan 27 2022 Providing coverage of the Australian outback, from the central deserts to tropical

Cape York, this guide includes: notes on track and road conditions; travelling facilities and supplies; tips on driving and camping; and checklists for planning and packing.
