Nor is there any doubt that Australian scholars in this field punch well above their weight within the international arena. This book is not derived from a conventional special issue (i.e. one focussing on a specific theme such as audit education, communication in accounting education, or the interface between accounting education and professional training). Instead, it presents a collection of leading

edge contributions to accounting education research from Australian scholars on topics which have international relevance. These topics reflect the typical breadth of research in this field being undertaken in Australia - including coverage of students' conceptions of accounting work, the impact of entry mode on accounting students' approaches to learning, listening skills in accounting practice, and student's performance in online accounting courses. Taken together, the contents of this book will help to enhance the educational base of accounting practice by providing guidance to educators in improving their pedagogic practice. This book was originally published as a special issue of Accounting Education: an international journal.

The Routledge Companion to Accounting in China Oct 21 2019 There is increasing interest in accounting issues in China. Despite a relatively short history, China's stock market is the world's second largest. This growth has been accompanied by increasing demand for accounting information alongside reforms of accounting and auditing rules, as international investors have paid increasing attention to investment opportunities in this dynamic and energetic country with a large population and economic growth potentials. Despite this, at present there are few books which offer students, academics and practitioners a comprehensive guide to current accounting issues in China. The Routledge Companion to Accounting in China fills this important gap in the literature. The volume is organized in six thematic sections which cover capital market and corporate finance, financial accounting, managerial accounting, auditing, taxation and internal controls. The structure is intended to reflect the increasing diversity of contemporary accounting issues in China, including a balanced overview of current knowledge, identifying issues and discussing relevant debates. This book is a prestigious reference work which offers students, academics and practitioners an introduction to current accounting issues in the emerging market of China.
