Markup & Profit Dec 23 2021

In order to succeed in a construction business you have to be able to mark up the price of your jobs to cover overhead expenses and make a decent profit. The problem is how much to mark it up. You don't want to lose jobs because you charge too much, and you don't want to work for free because you've charged too little. If you know how much to mark up you can apply it to your job costs and arrive at the right sales price for your work. This

book gives you the background and the calculations necessary to easily figure the markup that is right for your business.

Includes a CD-ROM with forms and checklists for your use.

Contractor's Guide to Planning, Scheduling, and Control, an experienced construction

professional delivers a unique and effective approach to the planning and scheduling responsibilities of a construction project manager, superintendent, or jobsite scheduler. The author describes the complete scheduling cycle, from preconstruction and scheduling through controls and closeout, from the perspective of real-world general contractors and scheduling professionals. Filled with tools and strategies that actually help contractors build projects, and light on academic jargon and terminology that's not used in the field, the book includes examples of real craft workers and subcontractors, like electricians, carpenters,

and drywallers, to highlight the concepts discussed within. Finally, an extensive appendix rounds out the book with references to additional resources for the reader. This comprehensive guide includes: Thorough introductions to construction contracting, lean construction planning, subcontractor management, and more A comprehensive exploration of a commercial case study that's considered in each chapter, connecting critical topics with a consistent through line End-of-chapter review questions and applied exercises Access to a companion website that includes additional resources and, for instructors, solutions,
