Farm Communities at the Crossroads Jun 26 2019 This book is an outgrowth of a conference that analyzed transformations in farming & farm communities and discussed what might be done to achieve a more socially responsible development. It contains papers that address the pace of change in work & rural society which has proceeded so rapidly that every new development appears to be a cross-roads in which something precious is in danger of being left behind, but something valuable may be gained by taking the right route. Topics of the papers include the importance of work, the family farm, community building, knowledge & skills in the farm community, coping with the farm crisis, land reform, short line railways, farm co-operatives, agricultural chemicals & agribusiness, sustainable alternatives for agriculture, game farming, co-operative intervention in the farm machinery sector, conservation tillage, globalization & agricultural policy, agrarian radicalism on the prairies, and farm income support systems. Includes index.

Education Statistics Annual Abstract Sep 29 2019

A Comparative Study of Writing Abilities in Two Modes at the Grade 5, 8, and 12 Levels Oct 03 2022 The third of three studies involving a comparative analysis of transactional and narrative writing of selected samples of students in two Ontario districts, this study addressed questions arising from the earlier studies and examined the writing skills of students in grades 5, 8, and 12. Writing samples were examined for conformity to the norms of story structure and argumentation, and the subject matter of the transactional writing was analyzed. The level of affective development manifested in subsamples of both the stories and the arguments was rated. All the papers in the sample were analyzed for syntactic complexity scores and for mechanical and conventional errors.

Comparisons of the first and second versions of the papers were made to assess skills in revising and editing. Findings indicated the need of students to learn how to write an argument and to revise a paper. Other implications were (1) that since the level of difficulty of one aspect of a writing task may decrease the lack of control in another, teachers must take into account the nature of difficulties in the tasks they set students and make their assessments accordingly; (2) that students at all levels should be given occasions to write narratives; (3) that the model of persuasive discourse should be countered; and (4) that writing strategies recommended by authorities need to be implemented. (EL)
