10 Minutes a Day Math, 3rd Grade  
Mar 10 2021 Practice makes perfect in just 10 minutes a day! There is nothing more important than your child's education, but sometimes it's difficult to find the time to fit everything in. The 10 Minutes a Day series fits in around busy lives. Aimed at ages 8-9, 10 Minutes a Day Math: 3rd Grade covers a range of curriculum subjects, including place value, rounding, solving problems, line graphs, and more. Each exercise is simply and clearly introduced to help learning, and uses a variety of interesting methods to help learning, from filling in the gaps to matching exercises. For the eager student, there are extra "time to challenge" challenges on every page if they finish the questions within 10 minutes and want to continue practicing, or just want ideas for additional activities to do at home. Answers are provided, along with parents' notes that explain what your child learns from the exercise, making this series perfect for homeschooling, or just helping your child stay ahead. Perfect both for the budding mathematician and those who need a little more support, 10 Minutes a Day Math is a colorful, controlled, and curriculum-aligned approach to mastering math.

Math Lessons for a Living Education Level 3  
Jun 13 2021 Teach math lessons through the creative means of a life story. Provide 36 weeks of instruction based on story levels rather than grade levels. Guide students by the use of inexpensive manipulatives, including index cards, dried beans, and construction paper! We often tend to compartmentalize when teaching children. In real life, there aren't artificial barriers between "subjects." For example, when you are cooking or baking, you have to use the skills of reading, logical thinking, and measuring, just to name a few. In driving a car, you see and read road signs, read maps, and count miles. So why do we teach children, "This is math, this is language, this is about science and nature, and this is history"? The most natural and effective means to teach children is through real life examples. Content, story, and the ability to show math in real life make a living math book!

Everyday Mathematics for Parents  
Mar 30 2020 The Everyday Mathematics (EM) program was developed by the University of Chicago School Mathematics Project (UCSMP) and is now used in more than 185,000 classrooms by almost three million students. Its research-based learning delivers the kinds of results that all school districts aspire to. Yet despite that tremendous success, EM often leaves parents perplexed. Learning is accomplished not through rote memorization, but by acting on and engaging in real-life math tasks. The curriculum isn't linear, but rather spirals back and forth, weaving concepts in and out of lessons that build overall understanding and long-term retention. It's no wonder that many parents have difficulty navigating this innovative mathematical and pedagogic terrain. Now help is here. Inspired by UCSMP's firsthand experiences with parents and teachers, Everyday Mathematics for Parents will equip parents with an understanding of EM and enable them to help their children with homework—the heart of the great parental adventure of ensuring that children become mathematically proficient. Featuring accessible explanations of the research-based philosophy and design of the program, and insights into the strengths of EM, this little book provides the big-picture information that parents need. Clear descriptions of how and why this approach is different are paired with illustrative tables that underscore the unique attributes of EM. Detailed guidance assisting students with homework includes explanations of the key EM concepts that underlie each assignment. Resources for helping students practice math at home also provide an understanding of the long-term utility of EM. Easy to use, yet jam-packed with knowledge and helpful tips, Everyday Mathematics for Parents will become a pocket mentor to parents and teachers new to EM who are ready to step up and help children succeed. With this book in hand, you'll finally understand why while this may not be the way that you learned math, it's actually much better.
