Teaching Public Budgeting and Finance Apr 03 2020 Many universities offer the Master of Public Administration (MPA) or other public affairs degree, which includes at least one course in public budgeting or public financial management. The faculty who teach these courses can however sometimes struggle to cover the breadth of material required and to fully engage students in what can be a technical subject. Teaching Public Budgeting and Finance: A Practical Guide addresses this challenge by sharing hands-on classroom expertise from leading scholars and creative instructors in the field. Drawing on their extensive experiences with teaching, researching, and engaging in service, each contributor reflects on how their area

of expertise can be taught most effectively, providing a discussion of student learning outcomes, pedagogical approaches, relevant resources, and appropriate course assignments. While no one book can provide a final say on classroom instruction, this first-of-its kind primer on teaching public budgeting and financial management courses is a detailed, indispensable guide for all faculty looking to improve the learning experience of students in the classroom. Teaching Public Budgeting and Finance: A Practical Guide is required reading for early career faculty as they prepare to teach the course for what may be the first time, as well as for more senior faculty looking to update their course, complement their own teaching strengths, or teaching the course for the first time in several years.

The Palgrave Handbook of Government Budget Forecasting Aug 08 2020 This Handbook is a comprehensive anthology of up-to-date chapters contributed by current researchers in budget forecasting. Editors Daniel Williams and Thad Calabrese had previously found substantial deficiencies in public budgeting forecast literature with current research failing to address such matters as practices related to forecasting expenditure factors, the consequences of forecast bias, or empirical examination of the effectiveness of many deterministic methods actually used by many governments. This volume comprehensively addresses the state of knowledge about budget forecasting for practitioners, academics, and students and serves as a comprehensive resource for instruction alongside serving as a reference book for those engaged in budget forecasting practice.

Cost and Optimization in Government Dec 24 2021 The careful management of costs and operations are two of the most essential elements for successful operation of any organization – public, private, or nonprofit. This book demonstrates that a good grounding in cost basics, especially those related to cost accounting, operations management, and quality control can help all organizations, in particular government, increase efficiency, improve performance, and, in the end, do a better job of running its everyday operation. The book is divided into three parts: Part I offers thorough coverage of cost fundamentals, with an emphasis on basic cost concepts, cost behavior, cost analysis, cost assignment, cost allocation, and cost control. Part II deals with optimization in government. Included in this part are traditional or classical optimization with applications in inventory management and queuing, followed by mathematical programming, network analysis, productivity measurement, and games and decisions. Finally, Part III deals with a special case in cost and optimization that has become important in recent years – quality

control. Simple, accessible language and explanations are integrated throughout, and examples have been drawn from government so that readers can easily relate to them. *Cost and Optimization* is required reading for practicing public managers and students of public administration in need of a clear, concise guide to efficient use of public resources.

Financial Strategy for Public Managers Oct 10 2020 *Financial Strategy for Public Managers* is a new generation textbook for financial management in the public sector. It offers a thorough, applied, and concise introduction to the essential financial concepts and analytical tools that today's effective public servants need to know. It starts "at the beginning" and assumes no prior knowledge or experience in financial management. Throughout the text, Kioko and Marlowe emphasize how financial information can and should inform every aspect of public sector strategy, from routine procurement decisions to budget preparation to program design to major new policy initiatives. They draw upon dozens of real-world examples, cases, and applied problems to bring that relationship between information and strategy to life. Unlike other public financial management texts, the authors also integrate foundational principles across the government, non-profit, and "hybrid/for-benefit" sectors. Coverage includes basic principles of accounting and financial reporting, preparing and analyzing financial statements, cost analysis, and the process and politics of budget preparation. The text also includes several large case studies appropriate for class discussion and/or graded assignments.

Budgeting for Local Governments and Communities Nov 22 2021 *Budgeting for Local Governments and Communities* is designed as the primary textbook for a quarter or semester-long course in public budgeting and finance in an MPA programme. Many currently available texts for this course suffer from a combination of defects that include a focus on federal and state budgeting, a lack of a theoretical governance framework, an omission of important topics, and typically a lack of exercises and datasets for student use. *Budgeting for Local Governments and Communities* solves all of these problems. The book is

exceptionally comprehensive and well written, and represents the efforts of veteran authors with both teaching and real-world experience. Key Features: Special Focus on Local Government Budgeting: focuses exclusively on budgeting at the local levels of American government, which are responsible for spending 40 percent of the taxes collected from citizens. Integration of Theory and Practice: teaching cases and chapters capture the "lessons learned" by professional practitioners who have extensive experience in making local public budgeting work on the ground. Polity Approach to Local Budgeting: presents an introduction to local budgeting as the central political activity that integrates the resources of the community into a unified whole. Budgeting is presented as governance work, rather than as a unique set of skills possessed by analysts and financial specialists. Legal, Historical, Economic and Moral Foundations of Local Government Budgeting: provides readers with an understanding of how the structures and processes of local budgeting systems are firmly tethered to the underlying core values, legal principles and historical development of the larger American federal, state and local political systems. Electronic Datasets and Budgeting Exercises: the text includes access to extensive electronic datasets and practice exercises that provide abundant opportunities for students to "learn through doing." Extensive Glossary and Bibliography: covers terms on the history and practice of local public budgeting.

Handbook of Public Administration, Second Edition Jul 27 2019 This bestselling reference examines all major areas in public administration from the enlightening perspectives of history and the five "great" concepts or theories framing each topic, including public budgeting, financial management, decision making, public law and regulation, and political economy. The American Reference Books Annual calls this ". . .stimulating and thought-provoking....thorough and inclusive....a valuable contribution.," and Canadian Public Administration said it is "...impressive...an extremely useful reference tool... the writing and analysis and the scope of the coverage make the volume a good investment for both government and university libraries."

Managing Climate Risk in the U.S. Financial System Jan 31 2020 This publication serves as a roadmap for exploring and managing climate risk in the U.S. financial system. It is the first major climate publication by a U.S. financial regulator. The central message is that U.S. financial regulators must recognize that climate change poses serious emerging risks to the U.S. financial system, and they should move urgently and decisively to measure, understand, and address these risks. Achieving this goal calls for strengthening regulators' capabilities, expertise, and data and tools to better monitor, analyze, and quantify climate risks. It calls for working closely with the private sector to ensure that financial institutions and market participants do the same. And it calls for policy and regulatory choices that are flexible, open-ended, and adaptable to new information about climate change and its risks, based on close and iterative dialogue with the private sector. At the same time, the financial community should not simply be reactive—it should provide solutions. Regulators should recognize that the financial system can itself be a catalyst for investments that accelerate economic resilience and the transition to a net-zero emissions economy. Financial innovations, in the form of new financial products, services, and technologies, can help the U.S. economy better manage climate risk and help channel more capital into technologies essential for the transition.

Taxation in Ghana: a Fiscal Policy Tool for Development Sep 20 2021 The first edition of this book- *Taxation in Ghana: A Fiscal Policy Tool for Development-* is the product of considerable tax research from 1943 to 2018, spanning a period of 75 years and grounded in knowledge and concepts; as well as, applications through an extended period of tax practice, teaching and learning; combined with international exposure. A lot of insights have been illuminated based on lessons learned and drawn from other countries, including the United States of America to enrich the contents. Against the backdrop of the dynamic nature of taxation and fiscal policy. Most of the existing taxation books in Ghana focused on tax practice. So, the purpose of this book is to bridge the taxation scholarship gap. In addition to traditionally-treated topics in most taxation books in Ghana, the novelty in this book is the inclusion of important topics on tax planning, tax reforms, and tax administration, and many more. As a result, specific recommendations have been proffered for the consideration of policy makers in developing countries. References and Acts of Parliament; supported by appendices have been provided for further studies on the subject. A true story of the first major oil discovery in Ghana by Mr. George Yaw Owusu with M. Rutledge McCall published 2017 in the United States of America: *In Pursuit of JUBILEE* was used to enrich the discussion on petroleum (Oil and Gas) in Chapter 48 of this textbook. Additionally, Apostle Professor Opoku Onyinah of the Church of Pentecost has been presented for his phenomenal transformational leadership in Africa in Chapter 66. The book has been designed for: (1) Individual study, (2) Group study, (3) Lecture material, (4) Policy Manual, and (5) library or reference.
