America, the Owner's Manual Nov 24 2021 In 2016, Americans fed up with the political process vented that frustration with their votes. Republicans nominated for president a wealthy businessman and former reality show host best known on the campaign trail for his sharp rhetoric against immigration and foreign trade. Democrats nearly selected a self-described socialist who ran on a populist platform against the influence of big money in politics. While it is not surprising that Americans would channel their frustrations into votes for contenders who pledge to end business as usual, the truth is that we don't have to pin our hopes for greater participation on any one candidate. All of us have a say—if we learn, master and practice the skills of effective citizenship. One of the biggest roadblocks to participation in democracy is the perception that privileged citizens and special interests command the levers of power and that everyday Americans can't fight City Hall. That perception is undoubtedly why a 2015 Pew Charitable Trusts survey found that 74 percent of those Americans surveyed believed that most elected officials didn't care what people like them thought. Graham and Hand intend to change that conventional wisdom by showing citizens how to flex their citizenship muscles. They describe effective citizenship skills and provide tips from civic experts. Even more importantly, they offer numerous examples of everyday Americans who have used their skills to make democracy respond. The reader will see themselves in these examples of citizens who chose to be victorious participants rather than tranquil spectators in the arena of democracy. By the end of the book, you will have new confidence that citizen participation is the lifeblood of America -- and will be ready to make governments work for you, not the other way around.

Global Pension Crisis Aug 29 2019 A comprehensive look at the crisis of unfunded pension liabilities and what must be done to avoid the same problem in the future As the generational bubble of the Baby Boomers begins to retire, it is increasingly evident that governments, corporations, and individuals have failed to adequately prepare for the obligations and needs of this giant cohort. Retirees are outliving actuarial life expectancies, pension liabilities are skyrocketing, pension plans are underfunded, and medical costs rise, the United States alone can expect unfunded liabilities to exceed \$4 trillion. Even while the American economy shows signs of sustained recovery, states and local governments will still experience sharp increases in pension fund payments through the next year or longer. Global Pension Crisis looks at this situation and offers practical advice for retirement plan managers and financial advisors, while also explaining how to strengthen pensions and prevent similar crises in the future. Offers a clear and comprehensive explanation of the current pension crisis for retirement fund managers, financial advisors, and economists Includes prescriptive guidance on how to strengthen the pension fund system and prevent another similar crisis Written by venture capitalist, entrepreneur, and former senior Wall Street executive Rich Marin
