Practical Environmental Forensics May 08 2021 A comprehensive practical guide to environmental forensics With real-world examples and advice on both scientific and legal issues, Practical Environmental Forensics stands on the front line of this new interdisciplinary approach to the environmental litigation process. Compiled by experts with decades of combined experience in teaching, research, consulting, and litigation, it is the first book to offer a comprehensive presentation of environmental forensics.The first section provides an introduction to the forensic process, a historical perspective on pollution, and related laws and insurance issues. The book continues with a review of the most commonly used technical approaches and methods employed to support forensic litigation case issues. A third section introduces essential environmental forensic support functions, including admissibility of evidence, expert case management, and the use of mediation methods in settling cases. Finally, the book explores the environmental forensic process through an extensive body of real case studies in which the authors have participated. This comprehensive guidebook includes: * Guidance in the development and presentation of forensic opinions within the litigation process * Stand-alone applications of historical research, groundwater contaminant modeling, chemical fingerprinting, toxicology, and risk assessment to environmental litigation * Chemical and investigative forensic methods presented within the context of environmental forensic case histories * Illustrative problem-solving as an

invaluable teaching and learning resource * Typical forensic cases grouped to illustrate the three main areas of environmental litigation: minimizing damages to clients, allocating damages between responsible parties, and resolution of insurance-related issues For engineers, scientists, attorneys, government regulators, financial and real estate professionals, and the broad spectrum of environmental consultants, this book is critical for all whose work involves environmental contamination.

Advances in Information Technology and Education Sep 12 2021 This two-volume set (CCIS 201 and CCIS 202) constitutes the refereed proceedings of the International Conference on Computer Science and Education, CSE 2011, held in Qingdao, China, in July 2011. The 164 revised full papers presented in both volumes were carefully reviewed and selected from a large number of submissions. The papers address a large number of research topics and applications: from artificial intelligence to computers and information technology; from education systems to methods research and other related issues; such as: database technology, computer architecture, software engineering, computer graphics, control technology, systems engineering, network, communication, and other advanced technology, computer education, and life-long education.

Speech and Computer Oct 13 2021 This book constitutes the proceedings of the 22nd International Conference on Speech and Computer, SPECOM 2020, held in St. Petersburg, Russia, in October 2020. The 65 papers presented were carefully reviewed and selected from 160 submissions. The papers present current research in the area of computer

speech processing including speech science, speech technology, natural language processing, human-computer interaction, language identification, multimedia processing, human-machine interaction, deep learning for audio processing, computational paralinguistics, affective computing, speech and language resources, speech translation systems, text mining and sentiment analysis, voice assistants, etc. Due to the Corona pandemic SPECOM 2020 was held as a virtual event.

Our Biometric Future Oct 01 2020 Since the 1960s, a significant effort has been underway to program computers to "see" the human face—to develop automated systems for identifying faces and distinguishing them from one another—commonly known as Facial Recognition Technology. While computer scientists are developing FRT in order to design more intelligent and interactive machines, businesses and states agencies view the technology as uniquely suited for "smart" surveillance—systems that automate the labor of monitoring in order to increase their efficacy and spread their reach. Tracking this technological pursuit, Our Biometric Future identifies FRT as a prime example of the failed technocratic approach to governance, where new technologies are pursued as shortsighted solutions to complex social problems. Culling news stories, press releases, policy statements, PR kits and other materials, Kelly Gates provides evidence that, instead of providing more security for more people, the pursuit of FRT is being driven by the priorities of corporations, law enforcement and state security agencies, all convinced of the technology's necessity and unhindered by its complicated and potentially destructive social consequences. By focusing on the politics of developing and deploying these technologies, Our Biometric Future argues not for the inevitability of a particular technological future, but for its profound contingency and contestability.

Administrative Notes Oct 21 2019
Internet and Wireless Security Nov 14 2021 As computer security experts with BTexact Technologies, UK, Temple and Renault broach not only technical aspects of the Internet's future covered by these 16 contributed chapters but also the pivotal issue of user trust. In the preface, a colleague of theirs contends that concerns about computer security are impeding wider adoption of electronic commerce by businesses and consumers. Given that people remain the weakest link in human-computer interactions, contributors expand upon the theme of trust via an "iTrust" integrated architecture program, public key cryptology infrastructures (for wired and wireless environments), biometrics, and other approaches to information assurance. The last chapter overviews the latest security management standard and its policy, technical, and commercial implications. Annotation copyrighted by Book News, Inc., Portland, OR

How to Edit Technical Documents Mar 18 2022 "How to Edit Technical Documents" is the most concise and clearly presented discussion of the editor's role and responsibilities to the writer, the reader, and the publishing process-- including changes that result from technological advances in editing. The authors describe the demands of communicating complicated information, in print and on screen, without diminishing the expressive power of language. As a result, users learn the skills necessary to become contributing members of any organization that requires informed and imaginative editors.

Fluid Amplification Dec 03 2020
Economic Adaptation Mar 06 2021 This volume focuses on alternatives for non-metropolitan economic development in the new international economic climate. It provides critical reviews of popular employment-generation alternatives for rural areas.

Struggles for Representation Apr 26 2020 Struggles for Representation examines over 300 non-fiction films by more than 150 African American film/videomakers and includes an extensive filmography, bibliography, and excerpts from interviews with film/videomakers. In eleven original essays, contributors explore the extraordinary scope of these aesthetic and social documents and chart a previously undiscovered territory: documentaries that examine the aesthetic, economic, historical, political, and social forces that shape the lives of black Americans, as seen from their perspectives. Until now, scholars and critics have concentrated on black fiction film and on mainstream non-fiction films, neglecting the groundbreaking body of black non-fiction productions that offer privileged views of American life. Yet, these rich and varied works in film, video, and new electronic media, convey vast stores of knowledge and experience. Although most documentary cannot hope to match fiction film's mass appeal, it is unrivaled in its ability to portray searing, indelible impressions of black life, including concrete views of significant events and moving portraits of charismatic individuals. Documentary footage brings audiences the moments when civil rights protestors were attacked by state troopers; it provides the sights and sounds of Malcom X delivering an electrifying speech, Betty Carter performing a heart-wrenching song, and Langston Hughes strolling on a beach. Uniting all of this work is the "struggle for representation" that characterizes each film–an urgent desire to convey black life in ways that counter the uninformed and often distorted representations of mass media film and television productions. African American documentaries have long been associated with struggles for social and political empowerment; for many film/videomakers, documentary is a compelling mode with which to present an alternative, more authentic narrative of black

experiences and an effective critique of mainstream discourse. Thus, many socially and politically committed film/videomakers view documentary as a tool with which to interrogate and reinvent history; their works fill gaps, correct errors, and expose distortions in order to provide counter-narratives of African American experience. Contributors include Paul Arthur, Houston A. Baker, Jr., Mark F. Baker, Pearl Bowser, Janet K. Cutler Manthia Diawara, Elizabeth Amelia Hadley, Phyllis R. Klotman, Tommy Lee Lott, Erika Muhammad, Valerie Smith, and Clyde Taylor.

Embracing Technology Jul 22 2022 Your All-in-One Guide to the Digital World KEY FEATURES ● Includes basic concepts about computer hardware and software, device connections, and the Internet. ● Solutions on how to get the most out of emails, office suites, photos, videos, and maps. ● Insights on social media, e-commerce, digital payments, and online booking. DESCRIPTION Technology touches our lives in many different ways. In this book, we will explore the common uses of technology in the world around you, demystify the concepts, and explain its usage. The book begins by making you comfortable with your Windows PC and Android Smartphone/Tablet. It discusses the Internet and common device connections. It also delves into popular productivity applications like emails, documents, spreadsheets, presentations, maps, photos, music, and videos. Usage of free apps from Google is demonstrated. The book also talks about social media and online tools which allow you to connect and communicate with people on the Internet, with examples from Facebook, Twitter, Instagram, and WhatsApp. The different facets of e-commerce are discussed as well, namely, payments, online shopping, tracking, reviews, and online travel booking, along with examples from popular shopping and travel websites. It explores newer trends like cloud computing, media players, and voice assistants. Security and privacy best practices

are also covered for each topic. This book is an attempt to break down the barriers that stand between you and the digital world and enable you to embrace technology. By the end of this book, you'll find yourself more tech-savvy than you were when you started. WHAT YOU WILL LEARN ● Day-to-day tasks on your Windows PC, Android Smartphone, and the Internet. ● Usage of popular Google services, including Gmail, docs suite, and YouTube. ● Usage of Facebook, Twitter, Instagram, Hangouts, and WhatsApp. ● Learn how to shop, pay and book flights, hotels, buses, and trains online. ● Learn about Media Players and usage of Google Assistant. ● Stay secure with best practices for your devices and the internet. WHO THIS BOOK IS FOR This book is for students, parents, kids, senior citizens, housewives, and any person who wants to get acquainted with the essential skills for the digital era and wants to become comfortable with technology, smart devices, and internet applications. To get the best out of this book, you must have either a Windows 10 PC or an Android Smartphone/Tablet, and stable Internet access. TABLE OF CONTENTS Preface 1. Your Smartphone/Tablet 2. Your Computer/Laptop 3. The Internet 4. Connections 5. E-mail 6. Photos 7. Music and Videos 8. Productivity Apps 9. Maps 10. Social Media 11. Online Communication 12. WhatsApp 13. Money and Payments 14. Managing your Privacy 15. Reviews 16. E-commerce 17. Booking Travel Online 18. Beyond your PC and Smartphone Summing it up

Annual Department of Defense Bibliography of Logistics Studies and Related Documents Apr 19 2022

Internet Management Issues: A Global Perspective Jul 18 2019 It is tempting to think that, in the year 2001, our technology is very sophisticated and accordingly, it is very tempting to believe that present-day computer technology is "very advanced" (begging the question of to what?). The fact is that we have

only just begun to develop computer technology, and the recent implementation of the Internet brings us to a special threshold in that development. Development stages require very careful and thoughtful management. What we do now in this present development stage will be profoundly important for future generations. The management of the foundation for the 'evolution' of computer technology is a very special case because it will also become intimately connected with the management of mankind itself, not only in groups or collectively but also, eventually, as a species.

Computer and Computing Technologies in Agriculture II, Volume 2 Dec 15 2021 The papers in this volume comprise the refereed proceedings of the Second IFIP International Conference on Computer and Computing Technologies in Agriculture (CCTA2008), in Beijing, China, 2008. The conference on the Second IFIP International Conference on Computer and Computing Technologies in Agriculture (CCTA 2008) is cooperatively sponsored and organized by the China Agricultural University (CAU), the National Engineering Research Center for Information Technology in Agriculture (NERCITA), the Chinese Society of Agricultural Engineering (CSAE) , International Federation for Information Processing (IFIP), Beijing Society for Information Technology in Agriculture, China and Beijing Research Center for Agro-products Test and Farmland Inspection, China. The related departments of China's central government bodies like: Ministry of Science and Technology, Ministry of Industry and Information Technology, Ministry of Education and the Beijing Municipal Natural Science Foundation, Beijing Academy of Agricultural and Forestry Sciences, etc. have greatly contributed and supported to this event. The conference is as good platform to bring together scientists and researchers, agronomists and information engineers, extension servers and entrepreneurs

from a range of disciplines concerned with impact of Information technology for sustainable agriculture and rural development. The representatives of all the supporting organizations, a group of invited speakers, experts and researchers from more than 15 countries, such as: the Netherlands, Spain, Portugal, Mexico, Germany, Greece, Australia, Estonia, Japan, Korea, India, Iran, Nigeria, Brazil, China, etc.

Inside the IMF Oct 25 2022 In this book, Richard Harper uses the International Monetary Fund as a case study to show how thinking differently about IT systems can dramatically improve the manageability and accessibility of documents in organisations. The systems he considers uses search and retrieval applications, the use of hypertext documents and shared database applications like Lotus Notes. Key Features * Advises how to improve the work processes and computer systems of organizations * Considers such IT systems as search and retrieval applications, the use of hypertext documents, and shared database applications * Provides the first study to reveal the inside workings of the IMF * Utilizes sociological methods to understand the technology which underpins office and commercial life

Discriminant Functions: Properties, Classes, and Computational Techniques Feb 23 2020 The research described explores and compares properties of discriminant functions that are optimal with respect to one or more diverse criteria. A discriminant function is described as a real-valued function used in the process of deciding which of two or more states of nature is true. The present study is limited to problems involving two states of nature. (Author).

Sisters in the Life Sep 19 2019 From experimental shorts and web series to Hollywood blockbusters and feminist porn, the work of African American lesbian filmmakers has made a powerful contribution to film history. But despite its importance, this work has gone largely unacknowledged by cinema historians and cultural critics. Assembling a range of interviews, essays, and conversations, Sisters in the Life tells a full story of African American lesbian media-making spanning three decades. In essays on filmmakers including Angela Robinson, Tina Mabry and Dee Rees; on the making of Cheryl Dunye's The Watermelon Woman (1996); and in interviews with Coquie Hughes, Pamela Jennings, and others, the

contributors center the voices of black lesbian media makers while underscoring their artistic influence and reach as well as the communities that support them. Sisters in the Life marks a crucial first step in narrating the history and importance of these compelling yet unsung artists. Contributors. Jennifer DeVere Brody, Jennifer DeClue, Raul Ferrera-Balanquet, Alexis Pauline Gumbs, Thomas Allen Harris, Devorah Heitner, Pamela L. Jennings, Alexandra Juhasz, Kara Keeling, Candace Moore, Marlon Moore, Michelle Parkerson, Roya Rastegar, L. H. Stallings, Yvonne Welbon, Patricia White, Karin D. Wimbley

Professional Search in the Modern World Nov 02 2020 This State-of-the-Art Survey constitutes the Final Publication of the COST Action IC1002 on Multilingual and Multifaceted Interactive Information Access, MUMIA. It contains outstanding research, recent developments and new directions in all related aspects of multifaceted and interactive information access with a focus on professional and enterprise search. The contributions are grouped in the following three parts: frameworks, models and theory; tools, applications and practice; and patent search. The Intellectual Property (IP) domain is used through the book as a primary case study. The book aims to bring together material which has been published in a fragmentary way in journals and conference papers into a coherent whole but also present novel, unpublished work where appropriate.

Digital Literacies Apr 07 2021 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional

lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st-century skills, but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides: A theoretical framework through which to categorise and prioritise digital literacies Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice A consideration of exactly how to integrate digital literacies into the English language syllabus Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks), and how to access teacher development opportunities online. This book is ideal for English language teachers, English language learners of all ages and levels, academics and researchers of all age groups and levels, academics and students researching digital literacies, and anyone looking to expand their understanding of digital literacies within a teaching framework.

Writing and Speaking in the Technology Professions Feb 05 2021 An updated edition of the classic guide to technical communication Consider that 20 to 50 percent of a technology professional's time is spent communicating with others. Whether writing a memo, preparing a set of procedures, or making an oral presentation, effective communication is vital to your professional success. This anthology delivers concrete advice from the foremost experts on how to communicate more effectively in the workplace. The revised and expanded second edition of this popular book completely updates the original, providing authoritative guidance on

communicating via modern technology in the contemporary work environment. Two new sections on global communication and the Internet address communicating effectively in the context of increased e-mail and web usage. As in the original, David Beer's Second Edition discusses a variety of approaches, such as: * Writing technical documents that are clear and effective * Giving oral presentations more confidently * Using graphics and other visual aids judiciously * Holding productive meetings * Becoming an effective listener The new edition also includes updated articles on working with others to get results and on giving directions that work. Each article is aimed specifically at the needs of engineers and others in the technology professions, and is written by a practicing engineer or a technical communicator. Technical engineers, IEEE society members, and technical writing teachers will find this updated edition of David Beer's classic Writing and Speaking in the Technology Professions an invaluable guide to successful communication.
