**Managing Special Educational Needs Jul 22 2019** 'This is a most worthwhile book which contributes significantly to the general body of knowledge on managing pupils with special educational needs. I found it interesting and informative. Schools cannot but benefit from the book's scope, and from insights into the many and varied aspects on SEN provision' - REACH 'A particular strength of the book is the way in which individual chapters provided "self-contained" material which lends itself for use in school-based staff development activities. The book includes a lot of information that SENCOs, inclusion managers and members of school leadership teams should find useful' - SENCO Update 'The strongest point about this book is that it gives a good overview of the history of special educational needs policy in this country, including recent development on inclusion' - TES Extra Special Needs 'It is a very practical account and should be a handbook for any newly appointed SENCO... [while] for experienced SENCOs and organisations where inclusion is not an issue, this book is a reminder of good practice' - Special Written from a practitioner's perspective, this book shows schools how to effectively implement and manage an inclusive school environment. Drawing from their experience in a range of schools, the authors highlight the problems encountered by professionals in both primary and secondary school settings and offer practical solutions and advice. The book offers guidance on: the role of the SENCO as a teacher and manager; government policy and legislation; self-evaluation, good practice and monitoring; how to relate SEN to school targets and development plans. Primary and secondary school teachers, headteachers, student teachers, SENCOs, LEA Advisers and professionals involved in the management of Special Educational Needs in schools will find the practical support offered in this book invaluable.

*The Art of Teaching Science* Feb 27 2020 *The Art of Teaching Science* has proven itself to be one of the most popular introductory texts for Australian pre-service and in-service teachers, providing guidance on engaging students and helping develop scientifically literate citizens. Beginning with an examination of the nature of science, constructivist, and socio-cultural views of teaching and learning and contemporary science curricula in Australian schools, the expert authors go on to explore effective teaching and learning strategies, approaches to assessment, and provide advice on the use of ICT in the classroom. Fully revised and updated, this edition also reflects the introduction of the AITSL professional standards for teachers and integrates them throughout the text. New chapters explore: - A range of teaching strategies including explicit instruction, active learning and problem-based learning; - The effective integration of STEM in schools; - Approaches to differentiation in science education; and - Contemporary uses of ICT to improve student learning. Those new to this text will find it is deliberately written in user-friendly language. Each chapter stands alone, but collectively they form a coherent picture of the art (in the sense of creative craft) and science (as in possessing the knowledge, understanding and skills) required to effectively teach secondary school science. "Helping each new generation of school science teachers as they begin their careers is crucial to education. This is the updated, third edition of this valuable textbook. It contains a wonderful range of inspirational chapters. All science teachers, not only those at the start of the profession, would benefit from it, in Australia and beyond." --Michael J. Reiss, Professor of Science Education, University College, London
