Gray Morris's Calculate with Confidence, Canadian Edition - E-Book Aug 03 2020 Learn to calculate dosages accurately and administer drugs safely! Gray Morris's Calculate with Confidence, Second Canadian Edition uses a clear, step-by-step approach to make drug dosage calculations easy. More than 2,000 practice questions help you review basic math and then master the three standard methods of dosage calculation: ratio and proportion, formula, and dimensional analysis. With the increasing responsibility of the nurse in mind, emphasis is placed on critical thinking and clinical reasoning in preventing medication errors. Reflecting current practice in Canadian health care, this book also provides excellent preparation for Canadian licensure exams! SI measurement units and generic/Canadian drug names are included throughout the text. Practice problems and real-world examples help students master correct dosage calculations and safe medication administration, with rationales included in practice problem answers to enhance the understanding of principles. Tips for Clinical Practice boxes summarize information critical to math calculation and patient safety. Safety Alert! boxes highlight common medication errors and identify actions that must be taken to avoid calculation errors. Chapter Review problems test student knowledge of all major topics presented in the chapter. Pre-Test review includes practice problems to help students assess their basic math skills and identify their strengths and weaknesses, covering fractions, decimals, percentages, and ratio and proportion. Post-Test in Unit One allows students to assess and evaluate their understanding after completing the

chapters on basic math. Comprehensive Post-Test at the end of the book covers dosage calculations and conversions, using real-life drug labels and situations. The Happiness Industry Oct 29 2022 Why are we so interested in measuring happiness? What was a Buddhist monk doing at the 2014 World Economic Forum in Davos lecturing the world's leaders on mindfulness? Why do many successful corporations have a 'chief happiness officer'? What can the chemical composition of your brain tell a potential employer about you? In the past decade, governments and corporations have become increasingly interested in measuring the way people feel: 'the Happiness index', 'Gross National Happiness', 'well-being' and positive psychology have come to dominate the way we live our lives. As a result, our emotions have become a new resource to be bought and sold. In a fascinating investigation combining history, science and ideas, William Davies shows how well-being influences all aspects of our lives: business, finance, marketing and smart technology. This book will make you rethink everything from the way you work, the power of the 'Nudge', the ever-expanding definitions of depression, and the commercialization of your most private feelings. The Happiness Industry is a shocking and brilliantly argued warning about the new religion of the age: our emotions.

The HM Learning and Study Skills Program Mar 22 2022 The hm Learning and Study Skills Program: Level II was designed to provide an introduction to learning and study skills for 8th, 9th, and 10th grade students through a series of activity-oriented units. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills: more succinctly, that “learning by doing” is the best way ‘study smart’. The Level II Teacher’s Guide includes a pretest, a wide variety of teaching suggestions, unit summaries, activities for retrieval and closure as well as teaching adaptations through the use of technology. It was published to help teachers assist students in the development of essential study skills and to reinforce their existing strategies that work. The Program supports academic independence for students that have a wide range of ability with college and career readiness as a tangible and realistic goal.
