Multi-Objective Optimization in Chemical Engineering Mar 16 2021 For reasons both financial and environmental, there is a perpetual need to optimize the design and operating conditions of industrial process systems in order to improve their performance, energy efficiency, profitability, safety and reliability. However, with most chemical engineering application problems having many variables with complex inter-relationships, meeting these optimization objectives can be challenging. This is where Multi-Objective Optimization (MOO) is useful to find the optimal trade-offs among two or more conflicting objectives. This book provides an overview of the recent developments and applications of MOO for modeling, design and operation of chemical, petrochemical, pharmaceutical, energy and related processes. It then covers important theoretical and computational developments as well as specific applications such as metabolic reaction networks, chromatographic systems, CO2 emissions targeting for petroleum refining units, ecodesign of chemical processes, ethanol purification and cumene process design. Multi-Objective Optimization in Chemical Engineering: Developments and Applications is an invaluable resource for researchers and graduate students in chemical engineering as well as industrial practitioners and engineers involved in process design, modeling and optimization.

AWS Certified Solutions Architect Study Guide with Online Labs Sep 02 2022 Virtual, hands-on learning labs allow you to apply your technical skills in realistic environments. So Sybex has bundled AWS labs from XtremeLabs with our popular AWS Certified Solutions Architect Study Guide to give you the same experience working in these labs as you prepare for the Certified Solutions Architect Exam that you would face in a real-life application. These labs in addition to the book are a proven way to prepare for the certification and to work as an AWS Solutions Architect. The AWS Certified Solutions Architect Study Guide: Associate (SAA-C01) Exam is your complete and fully updated resource to the AWS Solutions Architect - Associate certification. This invaluable Sybex study guide covers all relevant aspects of the AWS Solutions Architect job role, including mapping multi-tier architectures to AWS services, loose coupling and stateless systems, applying AWS security features, deploying and managing services, designing large scale distributed systems, and many more. Written by two AWS subject-matter experts, this self-study guide and reference provides all the tools and information necessary to master the exam, earn your certification, and gain insights into the job of an AWS Solutions Architect. Efficient and logical presentation of exam objectives allows for flexible study of topics, and powerful learning tools increase comprehension and retention of key exam elements. Practice questions, chapter reviews, and detailed examination of essential concepts fully prepare you for the AWS Solutions Architect – Associate certification. The certification is highly valued in IT

and cloud computing professionals. Now in a new edition—reflecting the latest changes, additions, and updates to the AWS Solutions Architect – Associate certification exam guide—this book is your complete, one-stop resource: Learn all the components of the AWS exam and know what to expect on exam day Review challenging exam topics and focus on the areas that need improvement Expand your AWS skillset and keep pace with current cloud computing technologies Readers will also have one year of free access to the Sybex interactive online learning environment and test bank, providing a suite of robust study tools including an assessment test, chapter tests, bonus practice exam, electronic flashcards, and a glossary of key terms. The AWS Certified Solutions Architect Study Guide: Associate (SAA-C01) Exam enables you to validate your skills, increase your competitive advantage, and take the next step on your career path. Comprehensive and up-to-date content and superior study tools make this guide a must-have resource for those seeking AWS Solutions Architect – Associate certification. And with this edition you also get XtremeLabs virtual labs that run from your browser. The registration code is included with the book and gives you 6 months unlimited access to XtremeLabs AWS Certified Solutions Architect Labs with 10 unique lab modules based on the book.

The Essential Online Solution Jul 28 2019 With big-box stores dominating today's business landscape, small business owners are facing serious challenges. But there is a way to level the playing field and win—and The Essential Online Solution will show you how. Written by industry experts, this book outlines a five-step formula that will allow you to harness the power of the online world and improve your company's bottom line.

ONLINE PAYMENT SOLUTIONS Nov 04 2022 In the first Russian textbook on electronic payments Dmitry Artimovich summarized his ten-year experience in the field. Online Payment Solutions uncovers the nuances of acquiring and analyzes in detail the rules of Visa and MasterCard payment systems. This book is conceived as a tutorial for people professionally working in the field of Internet acquiring, experts in online trade, as well as for the general public interested in the topic of electronic payments. The textbook focuses on the emergence of international payment systems and the reasons that put them on that particular path of development. Each chapter is supplemented with questions for self-control, allowing the reader to use it as a textbook. In addition, the author attempts to reveal the weaknesses and peculiarities of the development of payment card payment systems in Eastern Europe, as well as the imperfections of the Russian and European legislation. The book contains an extensive comparison of the implementation of payment system rules in different countries.

Approximation and Online Algorithms Oct 30 2019 This book constitutes the thoroughly refereed post-proceedings of the 4th International Workshop on Approximation and Online Algorithms, WAOA 2006, held in Zurich, Switzerland in September 2006 as part of the ALGO 2006 conference event. The 26 revised full papers presented were carefully reviewed and selected from 62 submissions.

Utilizing Open Source Tools for Online Teaching and Learning: Applying Linux Technologies Nov 23 2021 "This book covers strategies on using and evaluating open source products for online teaching and learning systems"-- Provided by publisher.

Trust Management IX Feb 12 2021 This book constitutes the refereed proceedings of the 9th IFIP WG 11.11 International Conference on Trust Management, IFIPTM 2015, held in Hamburg, Germany, in May 2015. The 10 revised full papers and 5 short papers presented were carefully reviewed and selected from 28 submissions. In addition, the book contains one invited paper and 5 papers from a special session on trusted cloud ecosystems. The papers cover a wide range of topics including trust and reputation and models thereof, the relationship between trust and security, socio-technical aspects of trust, reputation and privacy, trust in the cloud and behavioural models of trust.

Cryptographic Solutions for Secure Online Banking and Commerce Jun 30 2022 Technological advancements have led to many beneficial developments in the electronic world, especially in relation to online commerce. Unfortunately, these advancements have also created a prime hunting ground for hackers to obtain financially sensitive information and deterring these breaches in security has been difficult. Cryptographic Solutions for Secure Online Banking and Commerce discusses the challenges of providing security for online applications and transactions. Highlighting research on digital signatures, public key infrastructure, encryption algorithms, and digital certificates, as well as other e-commerce protocols, this book is an essential reference source for financial planners, academicians, researchers, advanced-level students, government officials, managers, and technology developers.

Engineering Solutions for CO2 Conversion Feb 24 2022 A comprehensive guide that offers a review of the current technologies that tackle CO2 emissions The race to reduce CO2 emissions continues to be an urgent global challenge. "Engineering Solutions for CO2 Conversion" offers a thorough guide to the most current technologies designed to mitigate CO2 emissions ranging from CO2 capture to CO2 utilization approaches. With contributions from an international panel representing a wide range of expertise, this book contains a multidisciplinary toolkit that covers the myriad aspects of CO2 conversion strategies. Comprehensive in scope, it explores the chemical, physical, engineering and economical facets of CO2 conversion. "Engineering Solutions for CO2 Conversion" explores a broad range of topics including linking CFD and process simulations, membranes technologies for efficient CO2 capture-conversion, biogas sweetening technologies, plasma-assisted conversion of CO2, and much more. This

important resource: * Addresses a pressing concern of global environmental damage, caused by the greenhouse gases emissions from fossil fuels * Contains a review of the most current developments on the various aspects of CO2 capture and utilization strategies * Includes information on chemical, physical, engineering and economical facets of CO2 capture and utilization * Offers in-depth insight into materials design, processing characterization, and computer modeling with respect to CO2 capture and conversion Written for catalytic chemists, electrochemists, process engineers, chemical engineers, chemists in industry, photochemists, environmental chemists, theoretical chemists, environmental officers. "Engineering Solutions for CO2 Conversion" provides the most current and expert information on the many aspects and challenges of CO2 conversion.

Transform Your Business With Strategic Online Marketing Apr 16 2021 Small Business Owners need to have the key intellectual tools, processes, and resources on top of good old-fashioned grit and drive. There are a few things businesses often have hanging over them from past marketing efforts that can penalize them according to current standards online. The search engines are very specific about what they like and don't like when it comes to directory listings and websites. Failure to comply with the current standards can have a dramatic negative impact on how often a business is shown in local searches. Google, Yahoo, Apple & Bing are the places to start. Adding a SMARTsite and locking it to the listings gives you a fully compliant presence with the search engines. Now it's time to look beyond the search engines to get more traffic and exposure. There are hundreds of alternate directories for every type of business that maintain listings. Xurli was built on the idea that the tools for success should be made available to anyone willing to invest in themselves. Google, Bing, & Yahoo each have their own internal list of local businesses, kind of like their own Yellow Pages. When you search on one of these search engines for a local business, part of the search is in their own list. To secure proper placement on these lists (and on the search engines' maps) you must claim and verify your business with each search engine and build out your listing to their specifications according to your type of business. Xurli handles the claiming, verification, building, and optimization of these listings for every type of local business. Xurli is on the phone daily with Google, Bing and Yahoo and currently has done over 12,000 such listings with over 70% success at achieving first page placement WITHOUT any SEO (Search Engine Optimization) required. Xurli designs & develops SMARTsites that comply, in every way, with the standards of all three search engines, and are continually updated, as new devices (iphones, androids, tablets, etc.) hit the market. SMARTsites are also built in such a way that "locks" them to the business's Google, Apple, Bing and Yahoo listings which helps improve the listing placement and prevents site or listing forgeries. Examples of shortcomings that can hurt a business's exposure are: 1) having a non-responsive (e.g., mobile and tablet friendly) website linked to the listing; 2) using cheap "mobile site generators" to reshuffle the site's content into a separate mobile-version; 3) letting the phone company generate the website and use tracking phone numbers to track leads; 4) having improper formatting of key elements in the website; 5) having inconsistencies between the website and the directory listing; 6) having too many keywords on the listing; 7) having too few keywords or poor keyword relevance on the listing; and 8) having redundant listings or websites that many businesses don't even know are out there. These are just a few of the dozens of things that limit many businesses' potential online exposure. Xurli's system for creating responsive SMARTsites is the most advanced system on the web of its kind. Xurli owns its own Content Management System called HubFix, which was the first system of its kind designed exclusively to generate responsive websites that comply in every way with search engine standards. Allowing your website to be constructed with sub-par or obsolete technology is a major cause of websites that malfunction on any of the hundreds of web-enabled devices (e.g., iPhones, iPads, smartphones, tablets, etc.). This, in turn, reduces market exposure for your website and your search engine listing. Many other marketing companies actually use Xurli to create their customers' websites for just this reason. Xurli currently supports over 2500 local business SMARTsites with over 85% success at achieving first page placement for the associated business listings. In all such cases, we are YOUR advocate and work hard for you to remedy any such issues!

Michael Allen's Online Learning Library: Successful e-Learning Interface Dec 01 2019 Michael Allen's e-Learning Library Most e-learning that is produced for classroom training is created using instructional models that were introduced more than thirty years ago. To update design solutions for today's online learners, Michael Allen's e-Learning Library offers a review of the basics of instructional design and then lifts the lid on some common misconceptions that arise from what people think they know about ISD. Michael Allen's e-Learning Library is designed to help use time and resources effectively and to build the best e-learning experiences possible. Filled with illustrative examples, the book is pragmatic and contains easy-to-apply solutions. Successful e-Learning Interface is the third book in the Michael Allen's e-Learning Library series. Using this hands-on resource will maximize your CEO impact—connect, empower, and orchestrate. You will understand how to connect with your learners, how to empower learners to make the most of e-learning's capabilities, and how to orchestrate learning events. Praise for Michael Allen's e-Learning Library "Once again Michael Allen has zeroed in on a critical, yet often overlooked, aspect of e-learning development. This book sheds light on the importance of learner interface design, and offers readers clear guidelines for designing interfaces that support the learner and increase impact. It will be a valuable asset for any e-learning developer who is committed to producing truly world-class e-learning." —David Holcombe, president and CEO, The eLearning Guild and publisher, Learning Solutions Magazine "With this easy-to-apply and practical book, Michael Allen raises the bar on creating exceptional e-learning experiences." —Lance Dublin, CEO and chief solution architect, Dublin Consulting "Michael Allen continues to be a strong voice in the e-learning industry. The topics addressed in this book are especially timely, helping the creators of training appeal to a new generation of learners while addressing the concerns of more mature learning audiences." —Jennifer Hofmann, president, InSync Training and author, The Synchronous Trainer's Survival Guide and Tailored Learning: Designing The Blend That Fits

Solutions Jan 26 2022 Student Book: Specific listening and word skills lessons, to help develop well-rounded, confident communicators. Student Book: Additional resources, including exam skills trainer sections and extra speaking practice help consolidate what students have covered in the lessons. Student Book: Exam skills trainer sections prepare students for typical school-leaving/Cambridge tasks, and provide them with the language, strategies, and exam skills they need to achieve success. Student Book: Culture Bank includes 9 ready-to-use culture lessons linked to the topic and language of the main units, providing extra reading and listening practice. Online Practice: A particular focus on more in-depth practice of grammar, vocabulary, reading, writing, listening, and speaking skills. Online Practice: Media-rich content (vox pops, vlogs, grammar animations) with interesting and engaging topics and texts. Online Practice: Automatic marking with instant feedback, and progress tracked in the gradebook to save time. Online Practice: Content aligned to the CEFR and the Solutions syllabus which complements and extends the contents of the book.

Electrochemistry in Nonaqueous Solutions Dec 25 2021 An excellent resource for all graduate students and researchers using electrochemical techniques. After introducing the reader to the fundamentals, the book focuses on the latest developments in the techniques and applications in this field. This second edition contains new material on environmentally-friendly solvents, such as room-temperature ionic liquids.

ARWA Jan 02 2020 Right from his formative years, Muni Kumar Kulshresth was distinctly fascinated by the hypothetical-sounding existence of the Greek letter π representing the constant ratio of circumference to diameter of a circle. This query, so appealing to his curious mind from the start, was not taken care of adequately by his school and college teachers, gradually preoccupying his mind with an urge to arrive at a clear and true-to-the-core conception logically confirming the accuracy of circle measurements. But once he became sure of the skepticism that overshadows and even to an extent swerves the π concept into an unnecessary approximation, he seriously resolved to enquire into the naturally existing ratios in the field of circle dimensions. He totally set aside the 'queer' methods and approaches hitherto put to use, and instead of conjecturing and coining these ratios, he rather attempted to arrive at a basic 'natural fraction', keeping logic intact at each step of mathematical approach and analysis. In particular, he took up detailed study in circle and square of equal area, mathematically confirming the various entities in circle dimensions through thorough cross-checking on varied geometrical designs. These efforts culminated in 'ARWA' (meaning neo or modern in Hindi)—a mathematical constant, besides many other constant ratios given different Indian names. ARWA highlights an approach that can make worthy changes in the present outlook on circle entities and their measurements. Muni Kumar has methods through which all problems on circles can be solved without using the popular but approximate π and with accuracy beyond approximation. The

manuscript of his work has been sent to the Department of Science and Technology, Government of India under the scheme of National Award for Science and Technology Communication.

Red Book 2021 Dec 13 2020 The AAP's authoritative guide on preventing, recognizing, and treating more than 200 childhood infectious diseases. Developed by the AAP's Committee on Infectious Diseases as well as the expertise of the CDC, the FDA, and hundreds of physician contributors.

Drilling Engineering Problems and Solutions Mar 04 2020 Petroleum and natural gas still remain the single biggest resource for energy on earth. Even as alternative and renewable sources are developed, petroleum and natural gas continue to be, by far, the most used and, if engineered properly, the most cost-effective and efficient, source of energy on the planet. Drilling engineering is one of the most important links in the energy chain, being, after all, the science of getting the resources out of the ground for processing. Without drilling engineering, there would be no gasoline, jet fuel, and the myriad of other "have to have" products that people use all over the world every day. Following up on their previous books, also available from Wiley-Scrivener, the authors, two of the most well-respected, prolific, and progressive drilling engineers in the industry, offer this groundbreaking volume. They cover the basics tenets of drilling engineering, the most common problems that the drilling engineer faces day to day, and cutting-edge new technology and processes through their unique lens. Written to reflect the new, changing world that we live in, this fascinating new volume offers a treasure of knowledge for the veteran engineer, new hire, or student. This book is an excellent resource for petroleum engineering students, reservoir engineers, supervisors & managers, researchers and environmental engineers for planning every aspect of rig operations in the most sustainable, environmentally responsible manner, using the most up-to-date technological advancements in equipment and processes.

Principles and Practice of Constraint Programming Feb 01 2020 This book constitutes the refereed conference proceedings of the 22nd International Conference on Principles and Practice of Constraint Programming, CP 2016, held in Toulouse, France, in September 2016. The 63 revised regular papers presented together with 4 short papers and the abstracts of 4 invited talks were carefully reviewed and selected from 157 submissions. The scope of CP 2016 includes all aspects of computing with constraints, including theory, algorithms, environments, languages, models, systems, and applications such as decision making, resource allocation, scheduling, configuration, and planning. The papers are grouped into the following tracks: technical track; application track; computational sustainability track; CP and biology track; music track; preference, social choice, and optimization track; testing and verification track; and journal-first and sister conferences track.

AWS Certified Solutions Architect Study Guide with Online Labs Oct 23 2021 Master Amazon Web Services solution delivery and efficiently prepare for the AWS Certified SAA-C03 Exam with this all-in-one study guide, Now with 10 online Lab Modules! The AWS Certified Solutions Architect Study Guide with Online Labs: Associate (SAA-C03) Exam, 4th Edition, prepares you for the challenging SAA-C03 Exam. This Study Guide with Online Labs contains efficient and accurate study tools that will help you succeed on the exam. Coverage of 100% of all exam objectives in this Study Guide with Online Labs means you'll be ready for: Designing resilient AWS architectures Creating high-performing solutions Crafting secure applications and architectures Designing inexpensive and cost-optimized architectures Accessing the Associate Exam SAA-C03 Practice Lab modules An essential resource for anyone trying to start a new career as an Amazon Web Services cloud solutions architect, the AWS Certified Solutions Architect Study Guide with Online Labs: Associate (SAA-C03) Exam, 4th Edition, will also prove invaluable to currently practicing AWS professionals looking to brush up on the fundamentals of their work. ABOUT THE AWS SOLUTIONS ARCHITECT CERTIFICATION The AWS Certified Solutions Architect - Associate (SAA-C03) certification is intended for individuals who perform in a solutions architect role. The exam validates a candidate's ability to use AWS technologies to design solutions based on the AWS Well-Architected Framework. XtremeLabs provides IT training environments for Fortune 500 companies and organizations of any size. The registration code is included with the book and gives you 6 months of unlimited access to XtremeLabs AWS Certified Solutions Architect Labs with 10 unique lab modules based on the book.

Approximation and Online Algorithms Aug 21 2021 This book constitutes the thoroughly refereed post-proceedings of the 9th International Workshop on Approximation and Online Algorithms, WAOA 2011, held in Saarbrücken, Germany, in September 2011. The 21 papers presented were carefully reviewed and selected from 48

submissions. The volume also contains an extended abstract of the invited talk of Prof. Klaus Jansen. The Workshop on Approximation and Online Algorithms focuses on the design and analysis of algorithms for online and computationally hard problems. Both kinds of problems have a large number of applications in a wide variety of fields. Topics of interest for WAOA 2011 were: algorithmic game theory, approximation classes, coloring and partitioning, competitive analysis, computational finance, cuts and connectivity, geometric problems, inapproximability results, mechanism design, network design, packing and covering, paradigms for design and analysis of approximation and online algorithms, parameterized complexity, randomization techniques and scheduling problems.

Starting an Online Business All-in-One For Dummies Jun 18 2021 The tools you need to follow your dream of starting and running an online business! With the right knowledge and resources, you can take action to start the online business you've been dreaming of. This comprehensive guide provides tips and tricks for turning your dream into a reality. The sixth edition of *Starting an Online Business: All-in-One For Dummies* will teach you the basics and beyond. It will prepare you to set up your business website, offer your products in an online store, and keep accurate books. The authors help you navigate the primary legal, accounting, and security challenges related to running an online business. Fund your business for success and future growth Use SEO strategically to drive traffic to a well-designed site Market your business effectively as an entrepreneur Stand out, build customer relationships, and sell on social media Keep up with ecommerce trends to stay a step ahead With some guidance, you can find your market niche, create a business plan, and decide on a revenue model. Then, it's time to set up shop! *Starting an Online Business* can help bring your dream of an online business to life and guide you on the road to success.

Connecting to Customers Sep 09 2020 Enterprises are increasingly becoming virtual corporations. They need to empower their employees, integrate with business partners, and interact electronically with their customers. This book describes the Microsoft solution for Internet business, which enables enterprises to connect with customers, increase operational efficiencies, and compete more effectively in the global Internet economy. The book covers what "Internet business" means, its business rationale, the Microsoft solution, and technical information a decision-maker needs to know to consider implementing the Microsoft solution.

Online Storage Systems and Transportation Problems with Applications Jan 14 2021 This book covers the analysis and development of online algorithms involving exact optimization and heuristic techniques, and their application to solve two real life problems. The first problem is concerned with a complex technical system: a special carousel based high-speed storage system - Rotastore. It is shown that this logistic problem leads to an NP-hard Batch Pre-Sorting problem which is not easy to solve optimally in offline situations. The author considered a polynomial case and developed an exact algorithm for offline situations. Competitive analysis showed that the proposed online algorithm is $3/2$ -competitive. Online algorithms with lookahead, improve the online solutions in particular cases. If the capacity constraint on additional storage is neglected the problem has a totally unimodular polyhedron. The second problem originates in the health sector and leads to a vehicle routing problem. Reasonable solutions for the offline case covering a whole day with a few hundred orders are constructed with a heuristic approach, as well as by simulated annealing. Optimal solutions for typical online instances are computed by an efficient column enumeration approach leading to a set partitioning problem and a set of routing-scheduling subproblems. The latter are solved exactly with a branch-and-bound method which prunes nodes if they are value-dominated by previous found solutions or if they are infeasible with respect to the capacity or temporal constraints. The branch-and-bound method developed is suitable to solve any kind of sequencing-scheduling problem involving accumulative objective functions and constraints, which can be evaluated sequentially. The column enumeration approach the author has developed to solve this hospital problem is of general nature and thus can be embedded into any decision-support system involving assigning, sequencing and scheduling.

Cross-cultural Online Instruction Apr 04 2020 Although technology is bringing people of the world in contact with each other at an unprecedented rate (Friedman, 2005), hidden assumptions in cultural differences still serve to challenge our ability to communicate effectively with each other - including with online instruction. Culture and language mediate, often unconsciously, different conceptual frameworks and value systems that influence how we learn, communicate, and design instruction. This book explores the experiences of 12 designers who have developed online instruction in cross-cultural contexts of over 80 countries. This analysis helps answer the questions: - What cultural differences matter? What assumptions about learning, teaching, and instructional design should be questioned when working cross-culturally? What are some challenges to being culturally sensitive? How can some of these challenges be overcome? This book is of value to anyone working via the Internet with those from other cultures, and particularly for those who are designing teaching and learning experiences. It has been said that understanding cultural issues is not only an important issue; it is arguably the important issue of our time (Fay, 2000).

Microsoft 365 and SharePoint Online Cookbook Jun 26 2019 With over 100 practical recipes that offer extensive coverage of Microsoft Office 365, learn how to enhance collaboration, implement robotic process automation, and develop business intelligence for your organization Key Features Gain a complete overview of popular Office 365

services using practical recipes and expert insights Collaborate with your team effectively using SharePoint Online and MS Teams Purchase of the print or Kindle book includes a free eBook in the PDF format Book Description Microsoft Office 365 provides tools for managing organizational tasks like content management, communication, report creation, and business automation processes. With this book, you'll get to grips with popular apps from Microsoft, enabling workspace collaboration and productivity using Microsoft SharePoint Online, Teams, and the Power Platform. In addition to guiding you through the implementation of Microsoft 365 apps, this practical guide helps you to learn from a Microsoft consultant's extensive experience of working with the Microsoft business suite. This cookbook covers recipes for implementing SharePoint Online for various content management tasks. You'll learn how to create sites for your organization and enhance collaboration across the business and then see how you can boost productivity with apps such as Microsoft Teams, Power Platform, Planner, Delve, and M365 Groups. You'll find out how to use the Power Platform to make the most of Power Apps, Power Automate, Power BI, and Power Virtual Agents. Finally, the book focuses on the SharePoint framework, which helps you to build custom Teams and SharePoint solutions. By the end of the book, you will be ready to use Microsoft 365 and SharePoint Online to enhance business productivity using a broad set of tools. What you will learn Get to grips with a wide range of apps and cloud services in Microsoft 365 Discover how to use SharePoint Online to create and manage content Store and share documents using SharePoint Online Improve your search experience with Microsoft Search Leverage the Power Platform to build business solutions with Power Automate, Power Apps, Power BI, and Power Virtual Agents Enhance native capabilities in SharePoint and Teams using the SPFx framework Use Microsoft Teams to collaborate with colleagues or external users Who this book is for This book is for business professionals, IT administrators, enterprise developers and architects, and anyone who wants to get to grips with using MS 365 for the effective implementation of Microsoft apps. Prior experience with Office 365 and SharePoint will assist with understanding the recipes effortlessly, but is not required.

Modeling Information Diffusion in Online Social Networks with Partial Differential Equations May 18 2021 The book lies at the interface of mathematics, social media analysis, and data science. Its authors aim to introduce a new dynamic modeling approach to the use of partial differential equations for describing information diffusion over online social networks. The eigenvalues and eigenvectors of the Laplacian matrix for the underlying social network are used to find communities (clusters) of online users. Once these clusters are embedded in a Euclidean space, the mathematical models, which are reaction-diffusion equations, are developed based on intuitive social distances between clusters within the Euclidean space. The models are validated with data from major social media such as Twitter. In addition, mathematical analysis of these models is applied, revealing insights into information flow on social media. Two applications with geocoded Twitter data are included in the book: one describing the social movement in Twitter during the Egyptian revolution in 2011 and another predicting influenza prevalence. The new approach advocates a paradigm shift for modeling information diffusion in online social networks and lays the theoretical groundwork for many spatio-temporal modeling problems in the big-data era.

Child Protection and Safeguarding Technologies Jul 08 2020 This book explores, through a children's rights-based perspective, the emergence of a safeguarding dystopia in child online protection that has emerged from a tension between an over-reliance in technical solutions and a lack of understanding around code and algorithm capabilities. The text argues that a safeguarding dystopia results in docile children, rather than safe ones, and that we should stop seeing technology as the sole solution to online safeguarding. The reader will, through reading this book, gain a deeper understanding of the current policy arena in online safeguarding, what causes children to become upset online, and the doomed nature of safeguarding solutions. The book also features a detailed analysis of issues surrounding content filtering, access monitoring, surveillance, image recognition, and tracking. This book is aimed at legal practitioners, law students, and those interested in child safeguarding and technology.

SEL at a Distance: Supporting Students Online (Social and Emotional Learning Solutions) May 30 2022 How to foster social and emotional learning, even when teaching remotely. The onset of the COVID-19 pandemic posed multiple dilemmas for educators; the most immediate one, when schools closed their physical doors, was how to switch nimbly from classroom instruction to emergency remote teaching. But educators also face a related, ongoing challenge: how to meet the social and emotional needs of their learners when separated by distance, whether in the middle of a traumatic event or on an unremarkable day of schooling. In this essential volume of the SEL Solutions Series, online learning expert Stephanie Louise Moore shows how teachers can seamlessly integrate effective SEL practices into their online instruction, beginning with the all-important creation of a social learning community. Strategies and resources are provided throughout to help with every step, including: understanding the individual needs of diverse distanced learners; developing students' navigational and focusing skills in the digital learning environment; increasing the level of interaction in online lessons; building in flexibility and choice; and assessing learning in a remote context.

Online Harassment Jul 20 2021 Online Harassment is one of the most serious problems in social media. To address it requires understanding the forms harassment takes, how it impacts the targets, who harasses, and how technology that stands between users and social media can stop harassers and protect users. The field of Human-Computer Interaction provides a unique set of tools to address this challenge. This book brings together experts in theory, socio-technical systems, network analysis, text analysis, and machine learning to present a broad set of analyses and applications that improve our understanding of the harassment problem and how to address it. This book tackles the problem of harassment by addressing it in three major domains. First, chapters explore how harassment manifests, including extensive analysis of the Gamer Gate incident, stylistic features of different types of harassment, how gender differences affect misogynistic harassment. Then, we look at the results of harassment, including how it drives people offline and the impacts it has on targets. Finally, we address techniques for mitigating harassment, both through automated detection and filtering and interface options that users control. Together, many branches of HCI come together to provide a comprehensive look at the phenomenon of online harassment and to advance the field toward effective human-oriented solutions.

Student Participation in Online Discussions Oct 11 2020 The increasingly prevalent use of online- or blended-learning in schools universities has resulted in asynchronous online discussion forum becoming an increasingly common means to facilitate dialogue between instructors and students, as well as students and students beyond the boundaries of their physical classrooms. This proposed academic book contributes to the literature on asynchronous online discussions in the following three main ways: First, it reviews previous research studies in order to identify the factors leading to limited student contribution. Limited student contribution is defined as students making few or no postings, students exhibiting surface-level thinking or students demonstrating low-level knowledge construction in online discussions. It then identifies the various empirically-based guidelines to address the factors. Second, three potential guideline dilemmas that educators may encounter: (a) use of grades, (b) use of number of posting guideline, and (c) instructor-facilitation are introduced. These are guidelines where previous empirical research shows mixed results when they are implemented. Acknowledging the dilemmas is essential for educators and researchers to make informed decisions about the discussion guidelines they are considering implementing. Third, nine exploratory case studies related to student-facilitation and audio-based discussion are reported on and examined. Using students as facilitators may be an alternative solution to educators who wish to avoid the instructor-facilitation guideline dilemma. Using audio discussion would be useful for participants with poor typing skills or those who prefer talking to typing. The proposed book is distinctive in comparison to current competitor titles because all the findings and guidelines are empirically-based. Furthermore, the nine expanded case studies provided specifically address the issue of student/peer facilitation and audio-based discussion. Student/peer facilitation and audio discussion are two areas that hitherto received comparatively lesser attention compared to instructor facilitation and text-based discussion. ?
