Connecting Histories Jun 10 2021 *Connecting
Histories: Decolonization and the Cold War in
Southeast Asia* draws on newly available
archival documentation from both Western and
Asian countries to explore decolonization, the
Cold War, and the establishment of a new
international order in post-World War II
Southeast Asia. Major historical forces
intersected here—of power, politics, economics,
and culture—on trajectories East to West, North
to South, across the South itself, and along less
defined tracks. Especially important,
democratic-communist competitions sought the
loyalties of Southeast Asian nationalists, even as

some colonial powers sought to resume their
prewar dominance. These intersections are the
focus of the contributions to this book, which use
new sources and approaches to examine some of
the most important historical trajectories of the
twentieth century in Burma, Vietnam, Malaysia,
and a number of other countries.

Petroleum Refining Aug 12 2021 For four
decades, *Petroleum Refining* has guided
thousands of readers toward a reliable
understanding of the field, and through the
years has become the standard text in many
schools and universities around the world
offering petroleum refining classes, for self-
study, training, and as a reference for industry
professionals. The sixth edition of this perennial
bestseller continues in the tradition set by Jim
Gary as the most modern and authoritative guide
in the field. Updated and expanded to reflect
new technologies, methods, and topics, the book
includes new discussion on the business and
economics of refining, cost estimation and
complexity, crude origins and properties, fuel
specifications, and updates on technology,
process units, and catalysts. The first half of the
book is written for a general audience to
introduce the primary economic and market
characteristics of the industry and to describe
the inputs and outputs of refining. Most of this
material is new to this edition and can be read
independently or in parallel with the rest of the
text. In the second half of the book, a technical
review of the main process units of a refinery is
provided, beginning with distillation and
covering each of the primary conversion and
treatment processes. Much of this material was
reorganized, updated, and rewritten with
greater emphasis on reaction chemistry and the
role of catalysis in applications. *Petroleum
Refining: Technology, Economics, and Markets*
is a book written for users, the practitioners of
refining, and all those who want to learn more
about the field.

Everybody Has a Story, and These Are Mine...
Feb 18 2022 Oscar Wilde once wrote that, "Life imitates Art far more than Art imitates Life." And that is just what you'll find in this delightful collection of autobiographical and fiction stories from Ginny Graham. When you step into her world you'll find that her real life experiences are just as interesting, just as surprising, and just as charming as her fiction. Ginny claims that her mission in life is to have fun, and that's just what this book brings to its readers. The first part includes entertaining, sometimes hilarious stories from Ginny's experiences as an actress, mother of eight, foster parent and wife of the love of her life. The second, a sampling of her "happily ever after" fiction that leaves you feeling hopeful that everything really does have a way of working out in the end.
