The Microeconomics Anti-Textbook Apr 02 2020 Mainstream textbooks present economics as an objective science, free from value judgements. The Microeconomics Anti-Textbook demonstrates this to be a myth – one which serves to make such textbooks not only off-puttingly bland, but also dangerously misleading in their justification of the status quo and neglect of alternatives. In this fully updated and expanded edition of their celebrated book, Professors Rod Hill and Tony Myatt lay out the essentials of each topic in the standard texts in a clear and concise way, before presenting an 'anti-text' analysis and critique. Challenging the assumptions, arguments, and models, Hill and Myatt provide the essential guide to decoding the textbooks, and show that real economics is far more interesting - and subversive - than the simplistic version presented to students.

Shadow Libraries Jul 06 2020 How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post–World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan's Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan's story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. Contributors Balázs Bodó, Laura Czerniewicz, Mirosław Filiciak, Mariana Fossatti, Jorge Gemetto, Eve Gray, Evelin Heidel, Joe Karaganis, Lawrence Liang, Pedro Mizukami, Jhessica Reia, Alek Tarkowski

Capturing Finance Sep 27 2019 Arbitrage—the trading practice that involves buying assets in one market at a cheap price and immediately selling them in another market for a profit—is

fundamental to the practice of financial trading and economic understandings of how financial markets function. Because traders complete transactions quickly and use other people's money, arbitrage is considered to be riskless. Yet, despite the rhetoric of riskless trading, the arbitrage in mortgage-backed securities led to the 2008 financial crisis. In *Capturing Finance* Carolyn Hardin offers a new way of understanding arbitrage as a means for capturing value in financial capitalism. She shows how arbitrage relies on a system of abstract domination built around risk. The commonsense beliefs that taking on debt is necessary for affording everyday life and that investing is necessary to secure retirement income compel individuals to assume risk while financial institutions amass profits. Hardin insists that mitigating financial capitalism's worst consequences, such as perpetuating class and racial inequities, requires challenging the narratives that naturalize risk as a necessary element of financial capitalism as well as social life writ large.
