[The Total Question Workout](#) May 24 2022 Here's the one-minute description of TQW: You have a Big Question of some kind. You know it's a Big Question because it's keeping you up at night, the outcome is important, and you don't have a ready answer. There are four stages you need to go through to answer a Big Question. I don't know where you are in the process; so let me describe the four stages. The first stage involves fully understanding your situation and your motives for wanting to resolve the question that comes from being in that situation. The second stage involves separating yourself from the situation you are in. You cannot resolve a situation if you see yourself as part of it. You have to gain perspective by separating yourself from your situation in as many ways as possible. The third stage involves letting go of something that keeps you attached to, and subject to, the situation you are in. Something is holding you back. Some fear, some projection of implications, some belief about what is possible and what is not possible. Something. As long as you hold onto these things they will hold you back. Fourth, you need to perceive new possibilities for resolving your Big Question. For various reasons, you are not able to see alternative resolutions today. You need to reframe your question in a way that will enable you to apply the substantial resources you have to address each and every part of the question. If you have a Big Question, you are stuck at one of those four stages. At which stage are you stuck? McClellan provides a complete roadmap for getting from the question you have to the question you need to answer. Dither no longer. Commit to the Total Question Workout. Address the Big Question you need to answer to take charge of running your business or your life. You can move forward. But first, you have to take the next step.

Questions Are the Answer Jun 25 2022 2018 Nautilus Book Awards Silver Winner What if you could unlock a better answer to your most vexing problem—in your workplace, community, or home life—just by changing the question? Talk to creative problem-solvers and they will often tell you, the key to their success is asking a different question. Take Debbie Sterling, the social entrepreneur who created GoldieBlox. The idea came when a friend complained about too few women in engineering and Sterling wondered aloud: "why are all the great building toys made for boys?" Or consider Nobel laureate Richard Thaler, who asked: "would it change economic theory if we stopped pretending people were rational?" Or listen to Jeff Bezos whose relentless approach to problem solving has fueled Amazon's exponential growth: "Getting the right question is key to getting the right answer." Great questions like these have a catalytic quality—that is, they dissolve barriers to creative thinking and channel the pursuit of solutions into new, accelerated pathways. Often, the moment they are voiced, they have the paradoxical effect of being utterly surprising yet instantly obvious. For innovation and leadership guru Hal Gregersen, the power of questions has always been clear—but it took some years for the follow-on question to hit him: If so much depends on fresh questions, shouldn't we know more about how to arrive at them? That sent him on a research quest ultimately including over two hundred interviews with creative thinkers. Questions Are the Answer delivers the insights Gregersen gained about the conditions that give rise to catalytic questions—and breakthrough insights—and how anyone can create them.

Bats in Question Aug 15 2021 Long the subject of myth and superstition, bats have been among the most misunderstood of mammals due to their nocturnal habits, capacity for flight, and strange appearance. Seeking to dispel the myths associated with these remarkable creatures and arguing for their key role in a balanced ecosystem, Bats in Question covers all aspects of bat biology in a practical question-and-answer format. Describing where bats live, how they use echolocation to navigate, and even why they hang upside down, the book also gives the conservation status of all 925 bat species. Don E. Wilson traces the evolution of bats and shows their remarkable diversity by describing each of the major groups in terms of their different body structures and habitats. He sheds light on bats' complex social systems, extraordinary variation in size, and food preferences that encompass plants, insects, and mammals. The book also explores cultural attitudes about bats—telling how, until recently, bats had been relegated to the world of vampires and how they have emerged to take their place in public awareness as important and fascinating members of our ecosystems.
