John Deere Snowmobiles May 24 2022 Long respected as a manufacturer of sturdy agricultural machinery, the John Deere Company began in the 1960s to build a line of consumer products in a dedicated factory in Horicon, Wisconsin. Starting with a lawn and garden tractor in 1963, Deere soon entered the fast-growing snowmobile market, introducing two models in 1971. The next 13 years would see a succession of models as Deere vied against tough competitors in a weather-dependent market. This detailed history, written by two key participants in the snowmobile program, describes the development of John Deere snowmobiles from start to finish: the design and engineering decisions that shaped each important model; reception of the snowmobiles by consumers; the factory race teams; the introduction of front-engine and water-cooled models; the process of selecting engines and negotiating with suppliers, including when problems developed; and the snowmobiles' impact on product engineering. The text provides an inside view of Deere's Consumer Products Division at a time of rapid growth, and of the people and processes that made it all happen.

I Was Compost When Compost Wasn't Cool May 12 2021 Experience the wild roller coaster ride of a double addiction. It did not involve drugs, alcohol, or any of the other usual suspects, but an addiction to the very unusual combination of composting and farming. It started at a very young age and has lasted over forty years without interruption. Because of the addiction, my health, my family, and my well being never got in the way. It will be a great treat to meet all the wonderful mentors and role models that was my great pleasure to work with and interact with. These people were all movers and shakers, they were all innovators, and they were all on the cutting edge. They could all handle a tense situation very smoothly whenever it arose, and all should have a book written about each of them. You will get a very close look at what it takes to compost and farm in a big time arena. What it takes as far as machinery, manpower, management, money, and the part mother nature plays in all of this. I could not have been born at a better time or in a better place. An exciting autobiography about a wonderful career and a cast of individuals that I would not trade for anything. They all allowed me to be green was green wasn't cool, and most importantly, to be compost when compost wasn't cool.
