[Lesotho](#) Feb 27 2020 This 1975 report highlights the problems of this overcrowded, resource poor, and landlocked country that supplies labor to the South African mines. Manufacturing and tourism are examined as hopes for improving economic development.

Research Methods for Organizational Studies Jun 20 2019 This third edition of the best-selling *Research Methods for Organizational Studies* has been thoroughly revised and updated throughout to reflect the latest methodological advances in organizational research. Highly readable and filled with clear examples, this comprehensive text is designed to help graduate students in Industrial/Organizational Psychology, Human Resources Management, and Organizational Behavior conduct and evaluate research on all issues related to organizational life. This edition carries on the applied approach of its predecessors, incorporating both qualitative and quantitative methods, with new chapters on statistical modelling and reviewing research.

[Count Not the Dead](#) Feb 09 2021 Basing his study on some two-hundred-and-fifty German novels, memoirs, fictionalized histories, and films (including *Das Boot*), Michael Hadley examines the popular image of the German submarine and weighs the values, purposes, and perceptions of German writers and film makers. He considers the idea of the submarine as a war-winning weapon and the exploits of the "band of brothers" who made up the U-boat crews. He also describes the perceptions of the German public about the role of the U-boat in the war effort and the hopes that it carried for victory in two world wars against the Allied forces. Analysed in context, the U-boat emerges as a central factor and metaphor in Germany's ongoing struggle with its political and military past. In *Count Not the Dead* Hadley explores the complex relationships between political reality and cultural myth, and draws important conclusions about the way in which Germans have interpreted their past and how present concerns change these views.

Mega Princess Apr 23 2022 Kelly Thompson (*Mighty Morphin Power Rangers: Pink, Jem and the Holograms*) and artist Brienne Drouhard (*Harpy Gee*) give us a dose of princess power with a twist in *Mega Princess!* On Princess Maxine Titan's 10th birthday, her fairy godmother grants her the powers of every princess, from speaking to animals to sensing a pea under a ton of mattresses. Max is more interested in being a detective than a princess, but when her baby brother goes missing, she'll have to combine her princess powers with her sleuthing prowess to get him back! Collects the complete limited series.

War of Extermination Sep 23 2019 This volume contains the most important contributions by distinguished historians who have thoroughly demolished this Wehrmacht myth. The picture that emerges from this collection is a depressing one and raises many questions about why "ordinary men" got involved as perpetrators and bystanders in an unprecedented program of extermination of "racially inferior" men, women, and children in Eastern Europe and the Soviet Union during the Second World War.--Pub. desc.

The Brandenburger Commandos Mar 22 2022 A narrative detailing a clandestine operations unit ran by the German Army's intelligence service, and its exploits. It gives a rare look into the secret military operations of Hitler's Germany. Trained to be quick, mobile, self-reliant and steeped in local customs and languages, the Brandenburger operated behind enemy lines around the world. From Western Europe to Romania, Russia, Egypt, Afghanistan, and World War II's other fronts, they seized bridges as well as other strategic targets. They engaged in sabotage, espionage, and other daring missions--often bending the rules of war in the process. Although the unit was dissolved in 1944, its tactics influenced special forces around the world both during the war and after.

Chitin Aug 27 2022 There are several books on properties of chitin and associated biomolecules and their biochemical significance. However, the present volume deals with a wide variety of biogeochemical and organic geochemical aspects of this vital macromolecule written by leading authors and experts in the field. Each chapter is carefully peer reviewed and is an updated account of recent research in isotopic, nanostructural, biochemical, microstructural, geochemical, paleontological and experimental aspects of chitin formation, distribution and preservation in the environment and earth history.

Tourism and Political Change Mar 10 2021 Tourism is a vital tool for political and economic change. With international contributions from experienced individuals, this book covers general themes and issues, with three thematic sections with original chapters, and a concluding section. It covers a variety of international political changes at different scales and their resulting effects.

Storykiller Feb 21 2022 The monster under the bed is real. In fact, all the monsters are real, as well as all the heroes and everything in between. All Fiction is real and lives in a place called Story. However, plenty of Fiction hangs out in the Mortal world living both innocent and nefarious lives. This might not mean much to the average Mortal unaware of the Fictional characters living among them, but for The Last Scion - the only Mortal that can kill Fiction - things are about to become very complicated. Tessa Battle is that Mortal. And Story is long from done with Tessa no matter how much she would like to deny her destiny. With more than one monster chasing her and questionable allies like The Snow Queen and Robin Hood, Tessa is going to need all the superpowers he inherited just to stay alive. In fact, it may be a good thing that behind her back Stories call Tessa THE STORYKILLER.

Geopolitical Shifts in West Asia Sep 28 2022 Examines the geopolitics of West Asia. The region is undergoing a phase of turbulence since the outbreak of the Arab Spring. This period has been marked by popular protests, internal conflicts, civil wars, military interventions and involvement of external players. The regional security situation remains fragile with a new terrorist entity challenging the existing geographical boundaries of the region.

German Fighter Ace Hans-Joachim Marseille Sep 04 2020 A tribute to one of the top fighter aces of the World War II, this new full length biography appears here in its first edition. Marseilles' wartime exploits are legendary with the 158 aerial victories, including 17 in one day. He was, and still is, considered by many of the Luftwaffe aces to be the premier fighter pilot of the Luftwaffe—all before the age of twenty-three. Also chronicled is the combat life of JG 27, Marseilles' unit, and the various personalities throughout the North African campaign.

Panzer Aces II Nov 18 2021 In this sequel to his well-regarded "Panzer Aces," Kurowski relates the combat careers of six more decorated German Panzer officers—men who were German tank commanders during World War II.

Hadean Earth Nov 06 2020 This book consolidates the latest research on the Hadean Eon - the first 500 million years of Earth history - which has permitted hypotheses of early Earth evolution to be tested, including geophysical models that include the possibility of plate tectonic-like behavior. These new observations challenge the longstanding Hadean paradigm - based on no observational evidence - of a desiccated, lifeless, continent-free wasteland in which surface petrogenesis was largely due to extraterrestrial impacts. The eon was termed "Hadean" to reflect such a hellish environment. That view began to be challenged in 2001 as results of geochemical analyses of greater than 4 billion year old zircons from Australia emerged. These data were consistent with the zircons forming in a world much more similar to today than long thought and interpreted to indicate that sediment cycling was occurring in the presence of liquid water. This new view leaves open the possibility that life could have emerged shortly after Earth accretion. The epistemic limitations under which the old paradigm persisted are closely examined. The book is principally designed as a monograph but has the potential to be used as a text for advanced graduate courses on early Earth evolution.

Panzer Aces III Oct 25 2019 • Action-packed stories of legendary tank soldiers in combat • You-are-there approach lets readers relive the experiences of German panzer crews • First time in English With the same drama and attention to detail that made *Panzer Aces* (978-0-8117-3173-7) and *Panzer Aces II* (978-0-8117-3175-1) such thrilling reads, Franz Kurowski tells the stories of more German armored officers during World War II. Extensively researched, these gripping accounts follow panzer crews into some of the bloodiest engagements of the war, from the deserts of North Africa, the monumental battle of Kursk, and the hedgerows of France to frightening clashes in the black of night on the Eastern Front.

Intelligent Projects Using Python Jul 26 2022 Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this

book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

Mathematical Analysis Oct 17 2021 Mathematical Analysis: Functions, Limits, Series, Continued Fractions provides an introduction to the differential and integral calculus. This book presents the general problems of the theory of continuous functions of one and several variables, as well as the theory of limiting values for sequences of numbers and vectors. Organized into six chapters, this book begins with an overview of real numbers, the arithmetic linear continuum, limiting values, and functions of one variable. This text then presents the theory of series and practical methods of summation. Other chapters consider the theory of numerical series and series of functions and other analogous processes, particularly infinite continued fractions. This book discusses as well the general problems of the reduction of functions to orthogonal series. The final chapter deals with constants and the most important systems of numbers, including Bernoulli and Euler numbers. This book is a valuable resource for mathematicians, engineers, and research workers.

Geodynamics of the Indian Plate Jun 01 2020 This book provides insights on new geological, tectonic, and climatic developments in India through a time progression from the Archean to the Anthropocene that are captured via authoritative entries from experts in earth sciences. This volume aims to bring graduate students and researchers up to date on the geodynamic evolution of the Indian Plate; concepts that have so far resulted in a rather uneven treatment of the subject at different institutions. The book is divided into 4 sections and includes perspectives such as the formation and evolution of the Indian crust in comparison to its neighbors such as Antarctica, Africa and Australia; the evolution of Precambrian cratons and sedimentary basins of India; and a summary account of early life reported in the Indian stratigraphic record. Readers will also discover the key recent research into the neotectonics, tectonic geomorphology, and paleoseismology of the Himalayan Front. Researchers and students in geology, earth sciences, sedimentology, paleobiology and geography will find this book appealing.

Strengthen Your Back Jun 25 2022 Strengthen Your Back covers all practical aspects of back care from diagnosis and treatment to exercises and pain relief. Illustrated step-by-step exercises help you address your back and neck pain, alongside carefully planned strategies to stop injuries recurring. Simple, clear diagrams show the anatomy of your back and neck and specialized sections deal with back pain in specific scenarios such as home, work, driving and gardening. Includes advice on where to seek help and how to get the best results from rehabilitation. Play an active role in your healthcare with Strengthen Your Back!

Luftwaffe Aces Dec 27 2019 World War II air war companion to Panzer Aces and Panzer Aces II. In-the-cockpit accounts of aerial dogfights by some of Germany's deadliest pilots ever to take to the skies.
