Losing Earth Jan 25 2020 ‘Nathaniel Rich’s account starts in Washington in the 1990s and tells the story of how climate change could have been stopped back then, if only the powerful had acted. But they didn’t want to.’ – Observer By 1979, we knew all that we know now about the science of climate change – what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich tells the essential story of why and how, thanks to the actions of politicians and businessmen, that failure came about. It is crucial to an understanding of where we are today. ‘The excellent and appalling *Losing Earth* by Nathaniel Rich describes how close we came in the 70s to dealing with the causes of global warming and how US big business and Reaganite politicians in the 80s ensured it didn’t happen. Read it.’ – John Simpson ‘An eloquent science history, and an urgent eleventh-hour call to save what can be saved.’ – Nature ‘To change the future, we must first understand our past, and *Losing Earth* is a crucial part of that when it comes to the environmental battles we’re facing.’ – Stylist

Strategizing Management Accounting May 29 2020 The theory and practice of management accounting

should be seen within the context of varieties of global capitalism, to appreciate its role as a 'calculative technology of capitalism' which is practiced on factory floors, corporate boards, computer networks, spreadsheets, and so forth. This new textbook is the first to introduce the field from a rounded social science perspective. Strategizing Management Accounting offers a theoretical discussion on management accounting's strategic orientation by accommodating two interrelated lines of analyses, from historical and contemporary perspectives. The book illustrates how 'new management accounting' has evolved into the form in which it exists today in its neoliberal context and how those new management accounting practices have become manifestos for the managers, as calculative technologies of decision making, performance management, control, corporate governance, as well as global governance, and development within various forms of organizations across the globe. Each chapter draws on Foucauldian analysis of biopolitics explaining how neoliberal market logic informs a set of strategies and mechanisms through which various social entities and discourses are made governable by considering them as biopolitical entities of global governance. Written by two recognized accounting experts, this book is vital reading for all students of management accounting and will also be a useful supplementary resource for those wanting to understand and research accounting's vital role in contemporary society.

Role and Effects of Budgeting in Managerial Practice Jun 29 2020 Seminar paper from the year 2010 in the subject Business economics - Investment and Finance, grade: 1,0, Maastricht University, course: Management Accounting, language: English, abstract: Budgeting is a major area of management accounting and receives a lot of interest from researchers who mainly concentrate their studies on the design of budget

schemes and the process of setting budgets. Concerning the use in practice, a survey of senior managers in 219 publicly traded firms indicated that "75 percent thought of the budgetary process as a managerial rather than an accounting function" (Zimmerman, 2009, p. 250). However, the effects of budgets and budget processes on managerial performance and effort are still not clear. This paper aims at providing an overview of a collection of recent research papers to investigate how different types of budgets influence managerial behavior and performance and what implications these findings have for managerial practice. Therefore, in the first section the general role of budgeting in organizations will be described. Next, different types of budgets and budget levels are introduced and their effects on managerial behavior and performance will be examined. Finally, several implications of those effects for managerial practice will be given, before a conclusion wraps up the main points of this report.

Contemporary Issues in Management Accounting Jan 05 2021 Covering established and emerging areas in the fast changing field of management accounting, this work discusses accounting practices such as budgeting, costing, responsibility accounting and capital investment analysis.

Management Accounting in Support of Strategy Dec 24 2019 In the 1980's and 1990's management accounting was criticised for being too operationally focused and failing to aid strategic decision making. As a response the term strategic management accounting, along with new techniques, were promoted to address the issue. Despite the emergence of articles and books explaining the strategic management concepts and techniques, the term has not become an accepted element in the lexicon of accounting practitioners. Research, however, suggests that practitioners do use a variety of management accounting techniques to support the achievement of strategic objectives. This book, rather than just explain the techniques, takes a different approach and utilises the strategic management framework to indicate how management accounting can aid the strategic management process and hence strategic decision making. It takes the view that management accounting should aid management decision making whether it be operational, business or strategic. A range of strategy models and accounting techniques are covered in the book together with an explanation of how they can be combined to aid the analysis, development, implementation and evaluation of strategy. The book will aid students who are studying accounting courses as well as those studying courses for which business strategy forms a part of the content. There are books that cover accounting techniques, and books that cover strategy models, but few that emphatically link the two together to provide guidance on how management accounting can aid the strategic management process. The book will also benefit practitioners wishing to understand how the accountant can make a significant contribution to the strategic management of an organisation to ensure its continued success.

Value Creation in Management Accounting Nov 22 2019 Value creation is at the heart of an economic enterprise, defining its capability to serve customers and generate profits and growth. This fact has led to an ever-increasing set of tools and techniques that start with customers, focusing on serving their preferences from the very inception of a product until its disposal. And this data is required to implement a value creation approach that has its roots in the Management Accounting System (MAS). The resulting model is called the

Value-based Cost Management System (VCMS). If you or any manager want to take the lessons you learned in product development, process management, and marketing, this book will help you extend this knowledge to your MAS. This book makes this transformation both logical and easy to implement, with a focus on the new types of information that can be garnered when the MAS is modified to fit the value creation approach. The authors of the book will provide, upon request, a simplified automated data collection template that will ease the implementation process.
