Ultimate Food Journeys Sep 26 2019 Ultimate Food Journeys is the essential 'what to eat where' guide for foodies who love to travel and for travellers who love to eat. DK's ultimate gastronomic tour of the globe reveals the origins of the world's most famous dishes and the best places to eat them. From Boeuf Bourignon in France to Tapas in Spain and soul food in Louisiana to tacos in Mexico, this beautifully illustrated book is arranged continent by continent with clear maps and mouth-watering photography. Expert authors introduce destinations and select the best or most interesting things to eat, uncovering the origins of the dish and exploring the ingredients. They recommend the best places to eat the area's speciality, chosen for the quality of the cooking, as well as the experience of dining there. Ultimate Food Journeys makes finding the ideal foodie getaway easier than ever. Search by time of year, type of vacation, type of food or simply flick through the pages and be inspired. Take a taste-bud led tour of the world with Ultimate Food Journeys.

Scientific and Technical Aerospace Reports Mar 01 2020 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

The Gas Turbine Handbook Nov 20 2021 This comprehensive, best-selling reference provides the fundamental information you'll need to understand both the operation and proper application of all types of gas turbines. The full spectrum of hardware, as well as typical application scenarios are fully explored, along with operating parameters, controls, inlet treatments, inspection, troubleshooting, and more. The second edition adds a new chapter on gas turbine noise control, as well as an expanded section on use of inlet cooling for power augmentation and NOx control. The author has provided many helpful tips that will enable diagnosis of problems in their early stages and analysis of failures to prevent their recurrence. Also treated are the effects of the external environment on gas turbine operation and life, as well as the impact of the gas turbine on its surrounding environment.

Wolfenden's Women Aug 18 2021 This critical sourcebook compiles excerpts from the extensive interviews undertaken by the Wolfenden Committee on the subject of prostitution. The Committee is remembered, first and foremost, for recommending the decriminalization of sex between men. However, the other half of its remit—prostitution—has largely been forgotten, despite the fact that prostitution, not homosexuality, was the original impetus behind the Committee's appointment. If we consider the Committee and its Report from this perspective, its status as both a liberal and permissive endeavour must be called into question. This book captures the controversy, diversity and complexity of opinions surrounding prostitution in this period, and provides critical analysis and context. It restores the question of prostitution to its central place in the history of Britain's so-called progressive era and challenges the way that the Report and its legacy have been characterized. Crucially, this book highlights the substantial evidence gathered by the Committee on prostitution outside of London, which the Wolfenden Report itself largely disregarded. The excerpts, the reprinted report, and the critical introductions to each chapter are intended to spark important debates amongst students, researchers and the public about the history of sexuality, society and the state in twentieth-century Britain.

The Rough Guide to Film Nov 28 2019 Get the lowdown on the best fiction ever written. Over 230 of the world's greatest novels are covered, from Quixote (1614) to Orhan Pamuk's Snow (2002), with fascinating information about their plots and their authors – and suggestions for what to read next. The guide comes complete with recommendations of the best editions and translations for every genre from the most enticing crime and punishment to love, sex, heroes and anti-heroes, not to mention all the classics of comedy and satire, horror and mystery and many other literary genres. With feature boxes on experimental novels, female novelists, short reviews of interesting film and TV adaptations, and information on how the novel began, this guide will point you to all the classic literature you'll ever need.

Feeding and Care of the Horse Aug 25 2019 This is the concise, easy-to-use version of Dr. Lewis's Equine Clinical Nutrition, Feeding and Care. It includes a full-color section identifying toxic plants and provides practical information on the diversified effects of different nutrients, feeds and supplements on a horse's athletic performance, reproduction, growth, hooves, appetite, behavior and disease. The book can help prevent common, but expensive problems in horses of all ages.

Proceedings of International Conference on Intelligent Manufacturing and Automation Oct 20 2021 This book presents the outcomes of the International Conference on Intelligent Manufacturing and Automation (ICIMA 2018) organized by the Departments of Mechanical Engineering and Production Engineering at Dwarkadas J. Sanghvi College of Engineering, Mumbai, and the Indian Society of Manufacturing Engineers. It includes original research and the latest advances in the field, focusing on automation, mechatronics and robotics; CAD/CAM/CAE/CIM/FMS in manufacturing; product design and development; DFM/DFA/FMEA; MEMS and Nanotechnology; rapid prototyping; computational techniques; industrial engineering; manufacturing process management; modelling and optimization techniques; CRM, MRP and ERP; green, lean, agile and sustainable manufacturing; logistics and supply chain management; quality assurance and environment protection; advanced material processing and characterization; and composite and smart materials.

Intelligent Projects Using Python Aug 06 2020 Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book
