Automotive Electricity Aug 17 2021 Since the beginning of the century, electrical goods have invaded our everyday lives. Now, electric power is coming to be seen as a solution to the pollution caused by cars. While this transition has remained very slow during the last ten years, it has been accelerating as the statutory constraints and needs of the market have changed. Even if the electric car itself fails to dominate the market, electric traction is taking an important place in our drive to move away from gas-powered vehicles. Another solution, hybrid vehicles, combine two sources of energy (electric and chemical), reducing the global consumption of fossil fuels. Fuel cell vehicles are also one of the most promising technologies for the future, with the capacity to use any fuel - hydrogen being the ideal fuel ecologically, but constrained by infrastructure and storage issues. This book explores all these different solutions for moving our vehicles from fossil fuel consumption to new, more environmentally-friendly power sources.

Lexus Feb 20 2022 A behind-the-scenes look at Lexus's surprising twenty-year success story—in a revised new edition In the 1980s, German brands BMW and Mercedes-Benz dominated the luxury car market and had little reason to fear competition from Japan. But in 1989, Toyota entered the market with the Lexus LS 400, a car that could compete with the Germans in every category but price—it was US$30,000 cheaper. Within two years, Lexus had overtaken Mercedes-Benz in the United States and made a stunning success of Toyota's brave foray into the global luxury market. Lexus: The Relentless Pursuit reveals why Toyota decided to take on the German automakers and how the new brand won praise and success for its unparalleled quality, unforgettable advertising, and unprecedented customer service. From the first boardroom planning session to Lexus's entry into the mega-luxury supercar market, this is the complete and compelling story of one of the world's most admired brands. Includes a new Foreword by legendary designer Erwin Lui, an Afterword with updates since the first edition, and a new Coda by leading Japanese automotive journalist Hisao Inoue Covers the racetrack triumph—and tragedy—behind the new US$375,000 Lexus LFA supercar Offers important business lessons for brand managers and executives For car enthusiasts, business leaders, and anyone interested in branding and marketing, Lexus: The Relentless Pursuit offers an amazing story of excellence and innovation in the automotive industry.

The Stupid Obvious! Dec 09 2020 If you're the type to always believe the 'Official Story', then this book is not for you.If you're a logical thinking person and not a fanatic about conspiracy theories, yet have an open mind, then I'm confident you'll enjoy reading 'The Stupid Obvious.'I'm going to reveal the 'Stupid Obvious.' The 'Stupid Obvious' like: -"Bigfoot Patterson Video Is Fake!"-"Fake 911 Planes!"-"Are We Alone?"-"Abandoned American POWs!"-"World War III With China Is Inevitable!"-"Multiple Assassins Murdered President John F. Kennedy!"-"Amelia Earhart's TOP SECRET Mission!"-"Did United States Of America Land On The Moon?"-"Did Adolf Hitler Escape From Berlin And Evade To Argentina?"Let's start with them Bigfoot critters. I've never seen one, but I gotta tell you, that video is fake and I'll tell you why - it's right in front of you in all the videos - it's 'The Stupid Obvious'. 911 has got to be the biggest LIE since the JFK assassination. And I go into great detail on the 'Stupid Obvious.' Once you read and see the photos, you'll say the Official 911 story is a LIE!Those poor souls - abandoned American POWs. It pisses me off. I'll tell you a bunch of 'The Stupid Obvious' about American POWS abandoned all the way back to World War I. It's sad.I've been predicting the next World War is against China and her allies - thus WWIII. I'll show you 'The Stupid Obvious.'Now if you think Lee Harvey Oswald... wait, you're still with me, you already know there's no way Oswald... well I go into great detail about the JFK's assassination. I hope to re-educate you on how it all happened or better yet, it couldn't happen. Now as far as Amelia Earhart, she was no doubt a World Class pilot and more than that, she was a patriot. I'm very confident that I'll prove to you, she and her navigator didn't get lost and fly off lost into oblivion. The Apollo Program, did the US of A land on the moon? I got a double answer for you on this one. And at the same time, I'll have you scratching your head - asking 'The Stupid Obvious.' You don't have to be a Rocket Scientist to see 'The Stupid Obvious.'And last, did Hitler, one of the most evil men to ever walk this Earth, did he fake his suicide and escape & evade to Argentina? I bought the 'Official Story' most of my life till I started looking into it. I go into great detail on this one and I give you 'The Stupid Obvious.''The Stupid Obvious' will re-educate you and re-wire your 'Stupid Obvious' thinking so you can see the truth.

The Ultimate Guide to Red Light Therapy Jun 14 2021 If there were a pill that was scientifically proven to help you look 10 years younger, lose fat, improve hormonal health, fight pain and inflammation, increase strength/endurance, heal faster, improve your brain health and increase your energy levels, it would be a billion-dollar blockbuster drug. Hundreds of millions of people would be told to start taking it by their doctors every day. And doctors all over the world would call it a "miracle drug." Here's the crazy part: That "drug" exists. But it's not a pill. It's red light therapy! Did you know that light has the power to heal your body and optimize your health? Of course, everyone knows about the importance of vitamin D from sunlight (from UV light). But few are aware that there is another type of light that may be just as vital to our health - red and near-infrared light. Think it's all just hype? Think again! Believe it or not, there are now over 3,000 peer-reviewed scientific studies showing incredible health and anti-aging benefits of red and near-infrared light therapy. But it gets even better... While you used to have to spend $100 or more to get treatments done in a medical or anti-aging clinic (where this technology has been used for decades), new breakthroughs have allowed us to harness these benefits in the comfort of our own home, without the need to spend thousands on an expensive laser device or $100 per treatment at a health/anti-aging clinic. We can now do red light

therapy at home, as much as we want, at a tiny fraction of the cost. In this book, Ari Whitten - bestselling author, health expert and founder of The Energy Blueprint - cuts through all the confusion, myths and pseudoscience around this complex topic, and takes you on a deep dive into the science of how to use red/near-infrared light therapy to improve your health, your body and your life in dozens of ways. Inside this book, you'll learn how to use red/near-infrared light therapy to: - Fight skin aging, wrinkles, and cellulite and look 10 years younger - Lose fat (nearly twice as with diet and exercise alone) - Rid your body of chronic inflammation - Fight the oxidative damage that drives aging - Increase strength, endurance, and muscle mass - Decrease pain - Combat hair loss - Build resilience to stress at the cellular level - Speed up wound/injury healing - Combat some autoimmune conditions and improve hormonal health - Optimize your brain function and mood - Overcome fatigue and improve energy levels You'll also get critical information to get the best results, including: - Specific dosing guidelines for every type of treatment (and how to avoid common mistakes) - The 5 "bioactive" types of light that affect human cell function and human health - Which health issues respond best to red/near-infrared light therapy - The big mistakes people make when giving themselves red light treatments (and exactly how to do treatments to get the best results) - The best light devices to get (and why most devices on the market are a waste of money) - Exact protocols for how to use red/near-infrared light therapy for everything from fat loss, to brain optimization, to skin anti-aging Optimal light exposure habits are as essential to good health as good nutrition habits. But the big problem is that, just as many people eat diets of processed junk food and fast food, most people are eating "light diets" of "junk light" and end up with chronic "mal-illumination." This book will show you how to fix that. Red and near-infrared light therapy is one of the biggest health breakthroughs in the last half century. If you're serious about your health and improving your body, it's time to start using this powerful tool in your life. Buy this book NOW to become the healthier, happier, leaner, stronger, youthful person you've always known you could be. You deserve it! Just Needs a Recharge Mar 12 2021 Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.
