A Century of Mathematics Dec 11 2020 This is the story of American mathematics during the past century. It contains articles and excerpts from a century of the American Mathematical Monthly, giving the reader an opportunity to skim all one hundred volumes of this popular mathematics magazine without actually opening them. It samples mathematics year by year and decade by decade. The reader can glimpse the mathematical community at the turn of the century, the controversy about Einstein and relativity, the debates about formalism in logic, the immigration of mathematicians from Europe, and the frantic effort to organize as the war began. More recent articles deal with the advent of computers and the changes they brought, and with some of the triumphs of modern research.

F-86 Sabre Pilot's Flight Operating Manual Aug 31 2022 Built as both a fighter-interceptor and fighter-bomber, the F-86 Sabre (sometimes called the Sabrejet) was one of the most widely-produced fighters of the Cold War. In December of 1950, three squadrons of Sabres were rushed into combat in Korea, where they duelled North Korean, Chinese and Russian pilots flying the MiG-15. By the time the war was over, F-86 pilots achieved a stunning victory ratio - destroying nearly 800 enemy aircraft with a loss of only 76 Sabres. The nimble jet also saw combat in the Taiwan Strait Crisis and the Indo-Pakistan Wars of 1965 and 1971. Originally printed by North American and the U.S. Air Force, this F-86 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified "Restricted," the manual was recently declassified and is here reprinted in book form. This facsimile has been reformatted and color images appear in black and white. Care has been taken to preserve the integrity of the text.

Uncharted Waters Oct 28 2019 The purpose of this book is to give ChristaEUR"centered believers an objective look at how a community of believers has the ability to not just survive in the roughaEUR"andaEUR"tumble times that a postaEUR"financialaEUR"collapse world will inevitably lapse into, but actually thrive. ChristaEUR"centered leadership is the key. Honoring God the Father and His Son Yeshua in all aspects is something that the author strove to hear God's leading on, from start to finish. Over the last twenty years, many books, articles, and movies have been written and filmed about the postapocalyptic world, both fiction and non fiction howaEUR"to, centering on what to do and how to do it. Most, if not nearly all, have focused on a few major topics, with perhaps another one or two side issues. In this book, the author has endeavored to cover as many facets as possible that will come into play as given to him by God's Spirit. Financial collapse, firearms, selfaEUR"defense, breakdown of law and order, cannibalism, barter, invasion by the UN, the setting up of a retreat, basic survival skills, and medical care by amateurs have all been covered in other works, and usually quite well. But, as they say on TV, wait, there's more...much, much more. Also woven into this work are torture, suicide, homosexuality and the subsequent deliverance from it, along with the very real probability of Islamic terrorism. Then we get to, for the most part, the forgotten wild cards: a command structure for the leadership, unparalleled cataclysmic geological upheaval, pandemic outbreak, the setting up of a city of refuge for God's people, and without question, the most neglected yet, far and away, most important deciding factor in all this: the last days' move of God. Mix all these factors together, and there we will find ourselves in uncharted waters.

Two Whole Cakes Dec 31 2019 From the internationally renowned Fatshionista blogger, a "vulnerable, funny, whip-smart" celebration of fat acceptance and

body confidence (Hanne Blank). From Photoshopped pictures to food-shaming to the latest crop of diet fads, our culture is obsessed with weight—as in, the less of it the better. In this spirited book based on the popular blog of the same name, Lesley Kinzel urges readers to do away with calorie-counting, cutting carbs, and all of the diet “secrets” foisted on us by the media. Instead of conforming to an unrealistic and unnecessary standard, the key to confidence—and happiness—is to learn to love the body you have, no matter what shape you are. Full of personal observations, enthusiastic encouragement, and straightforward advice, this is the non-diet book for everyone who wants to enjoy life at any size. Hannah Blank, author of Big, Big Love, calls it, “a delightfully readable way out of our culture’s unrealistic expectations of body size and appearance.” “Every single page of this book contains an AHA! moment. Two Whole Cakes is super empowering and fun to read—you seriously can’t put it down. I’ve read it twice, and I’m keeping it for my daughter.” —Jane Pratt, founding editor of xoJane and Sassy “This accessible blend of memoir and cultural theory is a lifeline and a love letter; one is better off in the world for having read it.” —Marianne Kirby, co-author of Lessons From the Fat-o-Sphere

L. Wabenzi Aug 26 2019 Some time ago Rafi Zabor sat down to write a brief narrative of the year 1986. That was the year he set out across two continents in a used Mercedes--"Wabenzi" is the Swahili word for a member of the Mercedes-owning class--to buy a grave stone for his friend Mahmoud Rauf and to outrun the shadow of his own parents' recent death. But like a boat against the current, the writer was drawn back into the past: his father's escape from the Nazis, Rafi's own Brooklyn boyhood surrounded by the fractious, Zaboros and Zaborovskys, and the anguished--sometimes farcical--spiritual journey that led Zabor from Brooklyn to Turkey by way of Coltrane, the thirteenth-century mystic Muhyiddin Ibn 'Arabi, the McGovern campaign, Gurdjieff, a shoe salesman named Gogol, and the cataclysmic months Zabor spent studying (and whirling) amid a band of Sufis in rural England. The result--the first of a projected four volumes--is one of the most original, capacious, and vivid narratives of the last few decades, a real-life Bildungsroman dealing with an expanded range of human experience, from matters of life and death to a piece of what lies beyond them.

Straight from the uncharted territory between Zen and the Art of Motorcycle Maintenance and Tristram Shandy, I, Wabenzi lifts a corner of the known world as if it were the edge of a curtain, and begins to show a reality new to our literature gleaming on the other side.

Manah Wars - Glimmer in the Darkness Feb 22 2022 The waters flowing out of Agwa'den were rich in life-giving manah. The energy stimulated extraordinary growth in all living things near the grove. The trees were massive, covered in thick, luscious moss, draped in long locks of fibrous vine. The air was teeming with microscopic organisms swimming in the air, littering streams of light with speckled activity. Everything was moist, if not wet; small amphibians crawled, leapt and walked across almost every surface. The ecosystem was kinetic, lively, and harmoniously chaotic. The air was filled with a soothing cacophony; buzzing and humming to the melody of the forest.

Memory Lessons Feb 10 2021 The story of becoming a doctor, and being a son. Jerald Winakur is a doctor who cares for, and about, the elderly. Dedicated and compassionate, he's a surrogate son to many. And yet, all his years of service helping patients and their families adjust to the challenges of aging did not prepare him for becoming father to his own father, who had become as needy as any child. In Memory Lessons--a tender and provocative book--Dr. Winakur writes about what it's like to be medical counselor to countless patients, while disclosing his personal heartbreak at watching his 86-year-old father descend into disability and dementia, his mother at his side. In both of these roles--highly skilled professional and loving son--he finds he is hard pressed to alter a course that devastates his dad and tears at his family. But he does what he can. A doctor who does his best to listen carefully to each patient in turn, who attempts to confront every problem with, as he says, "a reasonable fund of knowledge, a modicum of common sense, and a large dose of honesty," Dr. Winakur knows that there is much we can do by loving and listening. We all search for answers; we all want to do the right thing for our parents, but few of us know what that right thing is. Faced with caring for a growing sea of elders, Dr. Winakur reflects on his thirty years in the medical profession to consider the very personal and immediate questions asked by families every day: What are we going to do with Dad? Who will care for him--and how? These are urgent questions, and they're faced head-on in Memory Lessons with unflinching honesty, hope, and, above all, love.

Sequence — Evolution — Function Apr 26 2022 Sequence - Evolution - Function is an introduction to the computational approaches that play a critical role in the emerging new branch of biology known as functional genomics. The book provides the reader with an understanding of the principles and approaches of functional genomics and of the potential and limitations of computational and experimental approaches to genome analysis. Sequence - Evolution - Function should help bridge the "digital divide" between biologists and computer scientists, allowing biologists to better grasp the peculiarities of the emerging field of Genome Biology and to learn how to benefit from the enormous amount of sequence data available in the public databases. The book is non-technical with respect to the computer methods for genome analysis and discusses these methods from the user's viewpoint, without addressing mathematical and algorithmic details. Prior practical familiarity with the basic methods for

sequence analysis is a major advantage, but a reader without such experience will be able to use the book as an introduction to these methods. This book is perfect for introductory level courses in computational methods for comparative and functional genomics.

***Glimmer of Hope: Book 2* Nov 02 2022 This book was published based on a journal written by high school principal Rick Lasley during his final year of a 32-year tenure in public education. *Glimmer of Hope (Book 2)*, chronicles the spring semester 2022 journal entries and follows *Humanity in Peril (Book 1)*, published May 2022), which is based on the fall semester 2021 journal. It also represents the rallying call to communities, parents of school-aged children, legislators, district administrators, principals, and teachers for what each group can do to help bring the appeal and respect that it so profoundly deserves BACK to education. This advice given by Rick Lasley, retired HS principal, can only lead to more respect given to education and more certified teacher applicants in the pipeline over the next five to ten years...**

***In a House of Dreams and Glass* Mar 02 2020 A psychiatric resident's firsthand account reveals his struggles with the homeless, suicidal, and paranoid, and his frustrations with hospital politics and the limitations of an inexact science. Fresh from medical school, Robert Klitzman began his residency in psychiatry with excitement and a sense of mission. But he was not prepared for what he found inside the city psychiatric center where he was to spend three grueling years. In truth, as Dr. Klitzman's absorbing account of his apprenticeship reveals, he never ceased to be surprised—by his patients, by the senior psychiatrists' conflicting advice on how to help them, and by the unpredictable results of the therapies, both psychoanalytic and biologic, that he and his fellow residents practiced. Nights in the emergency room, professional controversy, the minefield of hospital politics, the stress of his own therapy--everything is here, in a passionate and illuminating analysis of a doctor's struggle against tremendous odds to banish his patients' demons.**

***Evidence-Based Practices for Social Workers* Dec 23 2021 "Within the context of**

the growing demands for ethical, legal, and fiscal accountability in psychosocial practices, Evidence-based practice for social workers: an interdisciplinary approach provides a coherent, comprehensive and useful resource for social workers and other human service professionals to help them: 1) conduct clinical assessments informed by current human behavior science; 2) implement interventions supported by current outcome research; and, 3) engage in evaluation as part of daily practice to ensure effective implementation of evidence-based practices. Rather than depicting evidence-based practice as a simple matching of diagnostic categories with intervention methods, the text encourages critical thinking and flexibility guided by best evidence in order to tailor evidence-based practices to individual client needs. The multidimensional and functional approach to assessment is designed to integrate the use of human behavior knowledge with an analysis of each client's unique experiences. Sample assessment/evaluation instruments (contributed by many leading experts) are provided to help practitioners better understand their use as both assessment and evaluation tools. Practice outcome research is summarized and "best practices" are described in considerable detail. Many case studies and sample treatment plans are provided to help the reader translate clinical research into everyday practice. Overall, EBPSW provides practitioners with a thoroughly researched yet practice-oriented resource for learning and implementing effective assessment, intervention and evaluation methods for a wide array of psychosocial disorders and problems-in-living in adults, children and families"-- Art Education Jan 12 2021
