Zuckerman travels across four continents and back two centuries to find answers about the most widely used vegetable oil on Earth. The little oil palm fruit has

played an outsized role in world history and economic development. But the multi-billion-dollar palm oil business has been built on stolen land and slave labour; it spurred colonisation and swept away lives and cultures. Today, its fires and mass deforestation generate carbon emissions to rival those of entire industrialized nations, and they've pushed animals like the orangutan to the brink of extinction. Art Deco of the Palm Beaches Feb 29 2020 Art Deco design is a jazzy celebration of the Machine Age, mass production, geometry, and the straight line. In Palm Beach County, sleek themes are seen representing tropical, nautical, masculine, and stylized motifs that reflect speed and technology. Elements include eyebrows, flat roofs, porthole windows, rounded corners, columns, glass blocks, bandings, multiples of three, and Zig-Zag steps. Palm Beach County has dozens of Art Deco treasures built throughout the 1920s, 1930s, and 1940s, which are located in the downtowns of Delray Beach up through West Palm Beach. Art Deco architecture found in Palm Beach County is spread out rather than concentrated in one location. These buildings are significant to the

history of South Florida because they represent some of the earliest structures ever built in the area. These remarkable gems are in danger of being demolished due to the ever-increasing amount of development throughout the county.

The Palm at the End of the Mind Jul 04 2020 In many societies and for many people, religiosity is only incidentally connected with texts or theologies, church or mosque, temple or monastery. Drawing on a lifetime of ethnographic work among people for whom religion is not principally a matter of faith, doctrine, or definition, Michael Jackson turns his attention to those situations in life where we come up against the limits of language, our strength, and our knowledge, yet are sometimes thrown open to new ways of understanding our being-in-the-world, to new ways of connecting with others. Through sixty-one beautifully crafted essays based on sojourns in Europe, West Africa, the United States, Australia, and New Zealand, and taking his cue from Wallace Stevens's late poem, "Of Mere Being," Jackson explores a range of experiences where "the palm at the end of the mind" stands "beyond thought," on "the edge of space," "a foreign song." Moments of crisis as well as everyday experiences in cafés, airports, and offices disclose the subtle ways in which a single life shades into others, the boundaries between cultures become blurred, fate unfolds through genealogical time, elective affinities make their appearance, and different values contend.

which the interests of the many different stakeholders are often antagonistic. Oil palm has become emblematic of recent changes in North-South relationship in agricultural development. Indeed, palm oil is produced and consumed in the South; its trade is driven by emerging countries, although the major part of its transformations is made in the North that still hosts the largest multinational agro industries. It is also in the North that the sector is challenged on ethical and environmental issues. Public controversy over palm oil is often opinionated and it is fed by definitive and sometimes exaggerated statements. Researchers are conveying a more nuanced speech, which is supported by scientific data and a shared field experience.
