## **Naturalism** Apr 11 2021

Victorian Scientific Naturalism examines the secular creeds of the generation of intellectuals who, in the wake of *The Origin of Species*, wrested cultural authority from the old Anglican establishment while installing themselves as a new professional scientific elite. These scientific naturalists—led by biologists, physicists, and mathematicians such as William Kingdon Clifford, Joseph Dalton Hooker, Thomas Henry Huxley, and John Tyndall—sought to persuade both the state and the public that scientists, not theologians, should be granted cultural authority, since their expertise gave them special insight into society, politics, and even ethics. In Victorian Scientific Naturalism, Gowan Dawson and Bernard Lightman bring together new essays by leading historians of science and literary critics that recall these scientific naturalists, in light of recent scholarship that has tended to sideline them, and that reevaluate their place in the broader landscape of

nineteenth-century Britain. Ranging in topic from daring climbing expeditions in the Alps to the maintenance of aristocratic protocols of conduct at Kew Gardens, these essays offer a series of new perspectives on Victorian scientific naturalism—as well as its subsequent incarnations in the early twentieth century—that together provide an innovative understanding of the movement centering on the issues of community, identity, and continuity.

**A Scientific Way of War** Dec 19 2021 While faith in the Enlightenment was waning elsewhere by 1850, at the United States Military Academy at West Point and in the minds of academy graduates serving throughout the country Enlightenment thinking persisted, asserting that war was governable by a grand theory accessible through the study of military science. Officers of the regular army and instructors at the military academy and their political superiors all believed strongly in the possibility of acquiring a perfect knowledge of war through the proper curriculum. *A Scientific Way of War* analyzes how the doctrine of military science evolved from teaching specific Napoleonic applications to embracing subjects that were useful for war in North America. Drawing from a wide array of materials, Ian C. Hope refutes earlier charges of a lack of professionalization in the antebellum American army and an overreliance on the teachings of Swiss military

theorist Antoine de Jomini. Instead, Hope shows that inculcation in West Point's American military curriculum eventually came to provide the army with an officer corps that shared a common doctrine and common skill in military problem solving. The proliferation of military science ensured that on the eve of the Civil War there existed a distinctly American, and scientific, way of war.
