Sustainable Construction Engineering & Management Aug 11 2021 The book is the detail study and analysis on how excellently the waste materials can be utilize as percentage replacement in construction materials, maintaining desired strength and saving resources. The book shows detail analysis of various green rating criteria's, factors that effect environment and concept of Sustainable Construction . The simulations for embodied energy with change in geometry of openings of room, building, various model and analysis like Green Roof, Green wall, Sustainable flooring , operational energy optimizing techniques , sustainable ventilation and illumination methods, structural strength analysis of various alternative waste mixed construction materials , estimation of various alternative combination of sustainable construction and economical saving by adopting experimented verified sustainable alternative construction method and materials. It is helpful for individual , construction practitioner, Research students , PG and UG students and is need of National & World as it addresses the global issue of Resource depletion , pollution and population imbalance.

[The Life of Akoa-Mongo Kara from Africa to the United States, Maine](#) Mar 18 2022 This book is an excellent tool to learn how people used to live in Central Africa around 1960 when many African countries started to become politically independent. One would learn how people lived, worked, socialized, traveled, took care of themselves when sick, the children and women contributing to the family economy, the system of education, family ties, territorial occupations, tribal relations, language formations, and settlements of the population.. He would also learn what happened from around 1954 concerning the struggles for independence, and the first leaders of African nations. One would also learn about the difficulties of going to school, getting good health care, Black and White relations, and discrimination in reverse, difficulties of making a living, Christianity, paganism, and poverty. Concerning the United States, one will learn about problems foreigners face in the United States in order to be

acclimated, and acculturated, differences in culture, eating habits, weather, language, socialization, help for the poor, the role of church, education opportunities, humanitarian and Christian love, relations between Blacks from Africa, and African Americans, between Africans living in the States and those at home, problems between those living in the States, problems of alienation of most children of the second generation of the immigrates. This book deals with men and women issues, Christian religion, paganism, and faith in God, the love of God, and serving others as a result of what God has done in someones life. This book is easy to read. It is good for those who would like to learn about African culture and people, the way others look at and see Americans; things to learn from each other as groups of people living in the same environment. Young people, families, churches, schools, anthropologists, sociologists, and political scientists may use this book. These are wishes of the author, Franois K. Akoa-Mongo

[ICCOEE2020](#) Aug 31 2020 This book contains papers presented in the 6th International Conference on Civil, Offshore & Environmental Engineering (ICCOEE2020) under the banner of World Engineering, Science & Technology Congress (ESTCON2020) will be held from 13th to 15th July 2021 at Borneo Convention Centre, Kuching, Sarawak, Malaysia. This proceeding contains papers presented by academics and industrial practitioners showcasing the latest advancements and findings in civil engineering areas with an emphasis on sustainability and the Industrial Revolution 4.0. The papers are categorized under the following tracks and topics of research: 1. Resilient Structures and Smart Materials 2. Advanced Construction and Building Information Modelling 3. Smart and Sustainable Infrastructure 4. Advanced Coastal and Offshore Engineering 5. Green Environment and Smart Water Resource Management Systems

[Green Engineering for Campus Sustainability](#) Jun 21 2022 This book highlights current efforts and research into achieving campus sustainability. The book start with Introduction followed by two chapters discusses best governance and practices in enhancing campus sustainability, while subsequent chapters elaborate on green building and bioenergy. In addition, the book discusses several initiatives regarding campus waste management including sewage recycling potential.

Perception, Design and Ecology of the Built Environment Apr 19 2022

This edited volume is a compilation of the 'built environment' in response to many investigations, analyses and sometimes mere observations of the various dialogues and interactions of the built, in context to its ecology, perception and design. The chapters concentrate on various independent issues, integrated as a holistic approach, both in terms of theoretical perspectives and practical approaches, predominantly focusing on the Global South. The book builds fabric knitting into the generic understanding of environment, perception and design encompassing 'different' attitudes and inspirations. This book is an important reference to topics concerning urbanism, urban developments and physical growth, and highlights new methodologies and practices. The book presumes an understanding unearthed from various dimensions and again woven back to a common theme, which emerges as the reader reads through. Various international experts of the respective fields working on the Global South contributed their latest research and insights to the

different parts of the book. This trans-disciplinary volume appeals to scientists, students and professionals in the fields of architecture, geography, planning, environmental sciences and many more.

Advances in Materials and Systems Technologies IV Jan 16 2022

Volume is indexed by Thomson Reuters CPCI-S (WoS). Collection of selected, peer reviewed papers from the Fourth International Conference on Engineering Research and Development (ICERD 2012), September 4-6, 2012, Benin City, Nigeria. The 82 papers are grouped as follows: Chapter 1: Construction and Structures; Chapter 2: Electrical and Electronic Technology; Chapter 3: Information and Communication Technology; Chapter 4: Machines and Equipment; Chapter 5: Materials Processing; Chapter 6: Oil and Gas; Chapter 7: Renewable Energy; Chapter 8: Systems Design and Analysis; Chapter 9: Water, Waste and Environment.
