Urban Resettlements in the Global South Jan 28 2020 Urban Resettlements in the Global South provides new perspectives on resettlement through an urban studies lens. To date, resettlement has been theorised through development studies and refugee studies, but urban resettlement is also a major dimension of urban development in the Global South and may help to rethink contemporary urban dynamics between spectacular new town developments and rising incidences of eviction and displacement. Conceptualising resettlement as a binding notion between production/regeneration and destruction/demolition of urban space helps to illuminate interdependencies and to underline significant ambiguities within affected people's perspectives towards resettlement projects. This volume will offer an interesting selection of ten different case studies with rich empirical data from Latin America, North and Sub-Saharan Africa, and Asia, focused on each stage of resettlement (before, during, after relocation) through different timescales. By offering a frame for analysing and rethinking resettlement within urban studies, it will support any scholar or expert dealing with resettlement, displacement, and housing in an urban context, seeking to improve housing and planning policies in and for the city.

Death Waits in the Dark Mar 30 2020 It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Natural Order Apr 11 2021 The authors bring the perspectives of sociology and anthropology to bear on key historical developments in various fields of science, demonstrating that it is possible to study science in the same way as other forms of culture - art, music, and literature. They show that our understanding of science, and the development of scientific knowledge, can be enriched by these perspectives, and that the history of science can benefit from case studies, such as those presented here.

Technology's Storytellers Jan 20 2022 *Technology's Storytellers* documents the emergence of the history of technology as a coherent intellectual discipline. Based on an analysis of nearly 300 articles published in *Technology and Culture*, it proposes a mode of historical research as a communal rather than an individualistic endeavor—looking for patterns of consensus in the authors' choice of time periods, geographical locations, and types of technology to study. It discusses the recurrent themes of the relationship between science and technology and the cultural ambience of technology, and examines the extent to which historians are moving away from a once pervasive ideology of autonomous technological progress. Co-published with the Society for the History of Technology.
