Tax, Social Policy and Gender Jun 26 2019 Gender inequality is profoundly unjust and in clear contradiction to the philosophy of the 'fair go'. In spite of some action by recent governments, Australia has fallen behind in policy and outcomes, even as the G20 group of nations, the Organisation for Economic Co-operation and Development and the International Monetary Fund are paying renewed attention to gender inequality. *Tax, Social Policy and Gender* presents new research on entrenched gender inequality in a comparative framework

of human rights and fiscal sustainability. Ground-breaking empirical studies examine unequal returns to education for women and men, decision-making about child care by fathers and mothers, the history and gendered effects of the income tax and family payments, and women in the top 1 per cent. Contributors demonstrate how Australia's tax, social security, child care, parental leave, education, work and retirement income policies intersect to compound gender inequality. Tax, Social Policy and Gender calls for a rethinking of equality and efficiency in tax and social policy and provides new policy solutions. It offers a pathway to achieve gender mainstreaming for women's economic security and the wellbeing of all Australians.

Crown and Sword Jul 28 2019 The Australian Defence Force, together with military forces from a number of western democracies, have for some years been seeking out and killing Islamic militants in Iraq, Syria and Afghanistan, detaining asylum seekers for periods at sea or running the judicial systems of failed states. It has also been ready to conduct internal security operations at home. The domestic legal authority cited for this is often the poorly understood concept of executive power, which is power that derives from executive and not

parliamentary authority. In an age of legality where parliamentary statutes govern action by public officials in the finest detail, it is striking that these extreme exercises of the use of force often rely upon an elusive legal basis. This book seeks to find the limits to the exercise of this extraordinary power.

The Betty and Barney Hill UFO Experience (60th Anniversary Edition) Jun 18 2021 “The famous 1961 Betty and Barney Hill abduction by non-humans is taken apart, meticulously re-examined by Betty’s niece Kathleen Marden and nuclear physicist Stanton T. Friedman, and reinforced by the pressure of facts.” —Linda Moulton Howe, Emmy award-winning TV producer, reporter, and editor, Earthfiles.com Today, 60 years after the UFO abduction of Betty and Barney Hill, more and more people are convinced that UFOs are real and their existence is being covered up by the government. If you have doubts or questions about the Hill case or alien experiences in general, *Captured!* will give you the answers you’re searching for. The 1961 abduction of the Hills stirred worldwide interest and enthralled the public and media for decades. The case is mentioned in almost all UFO abduction books. It also became a target for debunkers, who still attack it today. But the complete story of what really happened that day, its effect on the participants, and the findings of

investigators has never been told—until now. In *Captured!* you'll get an insider's look at the alien abduction, previously unpublished information about the lives of the Hills before and after Barney's death in 1969, their status as celebrities, Betty's experiences as a UFO investigator, and other activities before her death in 2004. Kathleen Marden, Betty Hill's niece, shares details from her discussions with Betty and from the evidence of the UFO abduction. She also looks at the Hills' riveting hypnosis sessions about their time onboard the spacecraft. The results of a new chemical analysis of the dress Betty was abducted in is shared, which found unusual and rare elements on it Newly discovered letters at the American Philosophical Society by debunker Philip Klass, regarding an orchestrated plot to paint Betty as delusional reveal what early detractors tried to do. In addition, coauthor, physicist, and ufologist Stanton T. Friedman reviews and refutes the arguments of those who have attacked the Hill case, including the star map Betty Hill saw inside the craft and later recreated.
