Full-Size Ford Restoration: 1960-1964 Sep 23 2019 Ford's full-size model change from 1959 to 1960 was seen as a big departure from the swerving lines of the 1950s. Slow to start on sales, Ford's full-size production grew year after year, peaking with 648,010 units produced in 1963. It was an all-time best for the Galaxie line and its sister nameplates. Eight appearance and performance offerings were applied to the full-size Ford line including the Fairlane, Galaxie, Ranch Wagon, Country Sedan, Country Squire, Courier, 300, and Custom, which made each car unique. With more than 2.3 million full-size Fords produced from 1960 to 1964, a restoration book for these cars has been desperately needed, and here it is! Author Colin Kleer, president of Pennsylvania's Three Rivers chapter of the Galaxie Club puts his decades of experience restoring these cars into this single volume. Featuring step-by-step procedures on body, driveline, chassis, and interior components, Kleer shows, with more than 400 photos and text, how to restore a full-size Ford to its former glory. Crucial projects such as rust repair and driveline maintenance help guarantee that your Ford will be sound and solid for years to come after the restoration. The Galaxie and its full-size stablemates continue to be a strong force at car shows and in the marketplace; they create an even deeper following for these cars. Adding a detailed restoration book to the full-size restorers arsenal will surely aid in bringing more of these Fords back to life and back on the road.

State Building in Putin's Russia May 12 2021 This book argues that Putin's strategy for rebuilding the state was fundamentally flawed. Taylor demonstrates that a disregard for the way state officials behave toward citizens - state quality - had a negative impact on what the state could do - state capacity. Focusing on those organizations that control state coercion, what Russians call the 'power ministries', Taylor shows that many of the weaknesses of the Russian state that existed under Boris Yeltsin persisted under Putin. Drawing on extensive field research and interviews, as well as a wide range of comparative data, the book reveals the practices and norms that guide the behavior of Russian power ministry officials (the so-called siloviki), especially law enforcement personnel. By examining siloviki behavior from the Kremlin down to the street level, State Building in Putin's Russia uncovers the who, where and how of Russian state building after communism.

Modern Diesel Technology: Brakes, Suspension & Steering Feb 21 2022 Beginning with entry-level explanations of the critical systems and advancing to the standard required of ASE L4 and L5 certification testing, this stand-alone book is a first-rate primer in the study of highway truck and trailer brake, suspension, and steering systems. Modular in format, the book's chapters cover basic principles directed to specific, performance-based learning outcomes. Step-by-step photo sequences for many critical shop-based tasks and an emphasis on troubleshooting help learners make the connection between conceptual and hands-on learning.
