Proceedings of the 1999 Academy of Marketing Science (AMS) Annual Conference Jul 29 2019 ?This volume includes the full proceedings from the 1999 Academy of Marketing Science (AMS) Annual Conference held in Coral Gables, Florida. The research and presentations contained in this volume cover many aspects of marketing science including marketing strategy, consumer behaviour, international marketing, advertising, marketing education, among others. Founded in 1971, the Academy of Marketing Science is an international organization dedicated to promoting timely explorations of phenomena related to the science of marketing in theory, research, and practice. Among its services to members and the community at large, the Academy offers conferences, congresses and symposia that attract delegates from around the world. Presentations from these events are published in this Proceedings series, which offers a comprehensive archive of volumes reflecting the evolution of the field. Volumes deliver cutting-edge research and insights, complimenting the Academy's flagship journals, the Journal of the Academy of Marketing Science (JAMS) and AMS Review. Volumes are edited by leading scholars and practitioners across a wide range of subject areas in marketing science.?

Explorations In Global Ethics Mar 17 2021 Inspired by the 1993 Parliament of the Worlds Religions, this volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue. The contributors draw from both communities of discourse in addressing questions of method and theory and global moral issues such as human rights, distributive justice, politics of war, international business, the environment, and genocide in a cross-cultural context. }Inspired by the 1993 Parliament of the Worlds Religions, this volume for the first time brings the scholarly discipline of comparative religious ethics into constructive collaboration with the community of interreligious dialogue. Its design is premised on two important insights. First, interreligious dialogue offers to comparative religious ethics a new, more persuasive rationale, agenda of issues, and practical orientation. Second, comparative religious ethics offers to interreligious dialogue an arsenal of critical tools and methods which will enhance the sophistication of its practical work. In this way, both theory (a dominant concern and strength of comparative religious ethics) and praxis (a dominant concern and strength of interreligious moral dialogue) are joined together in mutual effort, each contributing to the benefit of the other. The volumes contributors share this vision of collaboration, drawing explicitly from both communities of discourse in a manner that crosses disciplinary and professional boundaries to deal creatively and constructively with important methodological and global moral issue. Although theory and practice cannot easily be separated in such a collaborative project, for the purpose of clarity, the volume is divided into two main parts. The first specifically engages questions of method, theory, and the social role of the public intellectual; the second, on substantive moral themes and issues, many of which were raised at the 1993 Parliament. Taken together, the volumes essays articulate and illustrate new ways of approaching contemporary moral concerns cross-culturally yet with a rigor appropriate to our complex and pluralistic world.

Ethics and Accountability in a Context of Governance and New Public Management May 31 2022 Ethics and accountability have become important themes for modern government, as in most of the countries

there is a severe crisis of legitimacy. Increasingly there is a feeling that performance management alone will not solve this crisis. Citizens also expect from politicians and public servants ethical responsible conduct. As to the ethics, however, there is a problem. Governance and new public management have raised new problems which cannot be solved by referring to the traditional bureaucratic ethics. Devolution and decentralisation processes have enhanced the responsibility of public servants. The increase of transparency and openness and the service orientation of public organisations have challenged the traditional values of discretion and equality before the rule. The growing interaction between the public and the private sector have raised the question of integrity. In light of these developments, it is important to update the ethical system, or reversibly, the traditional values of the public service can question some actual evolutions in government.

Research Ethics Feb 13 2021 "The book provides opportunities for unusually good discussions of ethical problems that can confront researchers in any field." —Religious Studies Review "... this book provides a ready-made package for the teaching of ethics in research." —Journal of Third World Studies "... Research Ethics is an extremely useful and stimulating book... recommended for wide classroom use on both the undergraduate and graduate level as well as for all academic library collections." —Journal of Information Ethics "... an excellent introduction into research ethics." —Journal of College Science Teaching "A useful supplement to faculty teaching courses on scientific ethics and a resource for instructors who give lectures on the topic in more general courses." —Robert L. Sprague, Director, Institute for Research on Human Development "This book is important because it defines and clarifies subtle ethical issues present but not necessarily easily recognizable as such in the everyday conduct of research." —Doody's Health Sciences Book Review Journal "A very useful text for courses dealing with ethics in the research setting." —Science, Technology & Society "... a welcome collection of materials that can be used in a variety of ways by those who are genuinely concerned that scientific research remain faithful to its ideals." —American Journal of Human Genetics "This clearly written, reader-friendly book addresses the need for systematic education in research ethics and suggests that researchers themselves are the best teachers for their students.... The scenarios are realistic..., well presented, and organized around a series of topics that are both diverse and relevant to the practicing investigator." —American Journal of Psychiatry "... a landmark teaching tool..." —Science Books & Films [an "Editor's Choice" book] "I think this book is an excellent introduction into research ethics. The material is presented in an exceptionally thought-provoking manner, and it serves as a reference guide and as a source for seminar topics" —Robert H. Tamarin, Journal of College Science Teaching This comprehensive casebook for teaching research ethics in the sciences and the humanities covers such topics as plagiarism, confidentiality, conflict of interest, fraud and misconduct, the reporting of data, and the participation of human and animal subjects in research. An annotated bibliography will help instructors identify resources to use as supplements to cases, assist readers who are developing courses in research ethics, and aid further research on the subject.

A Casebook in Interprofessional Ethics Jan 15 2021 The first ethics casebook that integrates clinical ethics (medical, nursing, and dental) and research ethics with public health and informatics. The book opens with five chapters on ethics, the development of interprofessional ethics, and brief instructional materials for students on how to analyze ethical cases and for teachers on how to teach ethics. In today's rapidly evolving healthcare system, the cases in this book are far more realistic than previous efforts that isolate the decision-making process by professions as if each is not embedded in a larger context that involves healthcare teams, hospital policies, and technology. The central claim of this book is that ethics is an important common ground for all of the health professions. Furthermore, when we recognize that our professions converge upon a common goal we will find less conflict and more pleasure in working together.

Hegel's Philosophy of Right, with Marx's Commentary Dec 14 2020 GEORG WILHELM FRIEDRICH HEGEL (1770-1831) THE PLACE OF HEGEL IN THE HIS TOR Y OF PHILOSOPHY In order to gain a proper perspective of Hegel's place in the history of philo sophy, it might be useful to focus on one key concept which has evolved significantly in meaning, from the time of Aristotle to Hegel. I am speaking of the philosophical concept of the "category. " In Aristotle's system, there were ten categories (or "predicaments") of reality or being. These included substantiality, time, place, quantity, quality, and other aspects of knowable beings. The most notable thing about these categories is that they all have to do with what we would call "objective" realities. That is, none of them purport to describe subjective or mental states or conditions. In modern philosophy (i. e. , philosophy since the time of Descartes), there was a swing of the pendulum in the opposite direction, from objectivity to subjectivity - culminating in the twelve new "categories" of Kant. All of Kant's categories were subjective ways of looking at reality: We can organize objective phenomena into universal unities; therefore the first Kantian cate gory is "unity. " We can separate objective phenomena into particular divi sions; therefore the second category is "plurality. " And so forth. With Hegel, the modern trend to subjectivism is arrested, and we have, not surprisingly, a new type of "category" - the category of the unity of thought and being, of self and other, of subject and object.

A New Approach to Research Ethics Jan 03 2020 A New Approach to Research Ethics is a clear, practical and useful guide to the ethical issues faced by researchers today. Examining the theories of ethical decision-making and applying these theories to a range of situations within a research career and process, this text offers a broader perspective on how ethics can be a positive force in strengthening the research community. Drawing upon a strong selection of challenging case studies, this text offers a new approach to engage with ethical issues and provides the reader with: a broader view on research ethics in practice, capturing both different stages of research careers and multiple tasks within that career, including supervision and research assessments thoughts on questions such as increasing globalisation, open science and intensified competition an increased understanding of undertaking research in a world of new technologies an extension of research ethics to a multidisciplinary and interdisciplinary approach an introduction to a 'guided dialogue' method, which helps to identify and engage with ethical issues individually and as a research community. A New Approach to Research Ethics allows for self-reflection and provides guidance for professional development in an increasingly competitive area. Full of valuable guidance for the researcher and ethical decision-maker, this is an essential text for postgraduate students, senior academics and developers of training courses on ethics for researchers.

Undergraduates in a Second Language Nov 12 2020 This is the first book-length study of bilingual, international, and immigrant students in English writing courses that attempts to fully embed their writing experiences within the broader frame of their personal histories, the human context of their development, and the disciplinary contexts of their majors. It addresses the questions: How useful are L2 writing courses for the students who are required to take them? What do the students carry with them from these courses to their other disciplinary courses across the curriculum? What happens to these students after they leave ESL, English, or writing classes? Drawing on data from a 5-year longitudinal study of four university students for whom English was not their strongest/primary language, it captures their literacy experiences throughout their undergraduate careers. The intensive case studies answer some questions and raise others about these students' academic development as it entwined with their social experiences and identity formation and with the ideological context of studying at a US university in the 1990s.

Academic Approaches to Teaching Jewish Studies Aug 22 2021 In this follow-up book to Methodology in the Academic Teaching of Judaism, fourteen scholars and master teachers explore the challenges of teaching Jewish Studies at American schools of higher education both public and private. The essays provoke reflection upon the contents, goals, and methodology of instruction in Jewish Studies and candidly discuss what can and cannot be accomplished in the contemporary teaching of Wissenschaft des Judentums at the college and university level. The seminal ideas presented in Academic Approaches to Teaching Jewish Studies represent the cutting edge of pedagogical issues in Jewish Studies.

Trends in business ethics Apr 05 2020 In August 1976 the research seminar 'Decision-making in business' was organized at Nijenrode, The Netherlands School of Business. More than fifty scientists and practitioners from nine countries presented research papers in one of the six discussion groups. Some of them also presented some of their ideas in front of a large mixed audience at a one-day symposium. Many of the papers presented at Nijenrode were of such a high quality that the decision to publish a selection of them was an easy one. At the same time the new series Nijenrode studies in business was initiated. All who were involved, the policy committee 'Of the Nijenrode studies, the advisory and editorial board of the series, the publisher, and the organizing committee of the seminar and symposium, acclaimed the idea of publishing three volumes in the new series. A collection of eleven papers could be grouped under the title Trends in managerial and financial accounting, and has been published as volume 1 of this series. A

collection of fourteen papers has been published as the second volume under the title Trends in financial decision making, while this volume, consisting of twelve papers (and an introduction) explores the theme Trends in business ethics. The introduction by Stanley L. Jakiwas written for the symposium. It suggests why the papers of Pjotr Hesseling, Antoine Kreykamp, and Richard H. Viola, which were not presented at Nijenrode, are introduced here.

Legal, moral, values-driven, and global approaches are provided in concise commentaries about the dictates of our own Code of Ethics. Students will be challenged to take control of their learning experience by moving beyond the basics of looking up each situation to find "the right thing to do," into a more active and engaged approach, with the goal of not only becoming ethical thinkers but informed decision makers.

Ethics and Electronic Information Dec 02 2019 Stephen Almagno's career as a professor of library science began at the University of Pittsburgh in 1971. In 1990, he became the first professor in the United States to teach an information ethics course in a library and information science program. Almagno's work in the area of information ethics was recognized at the 2001 "Ethics of Electronic Information in the 21st Century" symposium held at the University of Memphis on October 18–21, 2001, upon the occasion of his retirement from the University of Pittsburgh. The essays in this book were presented at the symposium honoring Almagno. The first section of the book features papers that pay special tribute to Almagno. The second contains papers on library issues and ethics, such as the ethics of electronic information in China and eastern Europe, the organizations that represent information professionals, the ethics of user privacy in the digital library, and ethical implications of e-commerce, to name just a few. The third section covers topical issues, such as Internet plagiarism, ethical hacking and the security justification, social democracy and information media policy, and the ethics of dialogue, among others.

Public Health Ethics: Cases Spanning the Globe Dec 26 2021 This Open Access book highlights the ethical issues and dilemmas that arise in the practice of public health. It is also a tool to support instruction, debate, and dialogue regarding public health ethics. Although the practice of public health has always included consideration of ethical issues, the field of public health ethics as a discipline is a relatively new and emerging area. There are few practical training resources for public health practitioners, especially resources which include discussion of realistic cases which are likely to arise in the practice of public health. This work discusses these issues on a case to case basis and helps create awareness and understanding of the ethics of public health care. The main audience for the casebook is public health practitioners, including front-line workers, field epidemiology trainers and trainees, managers, planners, and decision makers who have an interest in learning about how to integrate ethical analysis into their day to day public health practice. The casebook is also useful to schools of public health and public health students as well as to academic ethicists who can use the book to teach public health ethics and distinguish it from clinical and research ethics.

Teaching Media Ethics Jun 27 2019 Both new instructors teaching media ethics for the first time and mature faculty -- who recognize that media ethics instruction deserves more than being worked into the professional classes -- find most of their instructional techniques come from observing their own instructors or from hunches. The literature of media ethics appears to be long on principle and reasoning but short on how to transmit that body of wisdom to students already dazed by an assault on their right/wrong world. Accordingly, this special issue is aimed at providing some correction to the problem by presenting a few

ideas to help instructors, whether they labor in the classroom or in the newsroom.
