Handbook of Battery Materials Aug 08 2020 A one-stop resource for both researchers and development engineers, this comprehensive handbook serves as a daily reference, replacing heaps of individual papers. This second edition features twenty percent more content with new chapters on battery characterization, process technology, failure mechanisms and method development, plus updated information on classic batteries as well as entirely new results on advanced approaches. The authors, from such leading institutions as the US National Labs and from companies such as Panasonic and Sanyo, present a balanced view on battery research and large-scale applications. They follow a distinctly materials-oriented route through the entire field of battery research, thus allowing readers to quickly find the information on the particular materials system relevant to their research.

Multinational Companies from Japan Mar 03 2020 Since the bursting of Japan's bubble economy, from 1990 onwards, its multinational companies (MNCs) have faced new competitive challenges, and questions about the management practices on which they had built their initial success in global markets. Japanese engagement in the international economy has undergone a number of phases. Historically, Japanese MNCs learnt from foreign companies, frequently through strategic alliances. After the post-war 'economic miracle', Japanese manufacturers in particular converted themselves into MNCs, transferred their home-grown capabilities to overseas subsidiaries, and made an impact on the world economy. But the period after 1990 marked declining Japanese competitiveness, and asked questions about the ability of Japanese MNCs to be more responsive and global in their strategies, organization, and capabilities. It has been argued that the established management practices of Japanese MNCs inhibited adaptation to recent demands of global competition. This volume presents new case evidence on how Japanese MNCs have responded to the new challenges of the global market place, and it provides examples of how they have transformed strategies and competitive capabilities. This book was originally published as a special issue of *Asia Pacific Business Review*.

Laser TV Feb 23 2022 What Is Laser TV Laser color television, or laser color video display utilizes two or more individually modulated optical (laser) rays of different colors to produce a combined spot that is scanned and projected across the image plane by a polygon-mirror system or less effectively by optoelectronic means to produce a color-television display. The systems work either by scanning the entire picture a dot at a time and modulating the laser directly at high frequency, much like the electron beams in a cathode ray tube, or by optically spreading and then modulating the laser and scanning a line at a time, the line itself being modulated in much the same way as with digital light processing (DLP). **How You Will Benefit (I)** Insights, and validations about the following topics:

Chapter 1: Laser TV Chapter 2: Plasma display Chapter 3: Home cinema Chapter 4: Flat-panel display Chapter 5: LCD projector Chapter 6: Gamut Chapter 7: Liquid crystal on silicon Chapter 8: Video projector Chapter 9: Digital Light Processing Chapter 10: Television set Chapter 11: LCD television Chapter 12: Handheld projector Chapter 13: Comparison of display technology Chapter 14: Active shutter 3D system Chapter 15: Wobulation Chapter 16: CRT projector Chapter 17: Large-screen television technology Chapter 18: Rear-projection television Chapter 19: Electronic visual display Chapter 20: Digital micromirror device Chapter 21: 3LCD (II) Answering the public top questions about laser tv. (III) Real world examples for the usage of laser tv in many fields. (IV) 17 appendices to explain, briefly, 266 emerging technologies in each industry to have 360-degree full understanding of laser tv' technologies. Who This Book Is For Professionals, undergraduate and graduate students, enthusiasts, hobbyists, and those who want to go beyond basic knowledge or information for any kind of laser tv.

Robotic Systems for Handling and Assembly Apr 03 2020 Although parallel robots are known to offer many advantages with respect to accuracy, dynamics, and stiffness, major breakthroughs in industrial applications have not yet taken place. This is due to a knowledge gap preventing fast and precise execution of industrial handling and assembly tasks. This book focuses on the design, modeling, and control of innovative parallel structures as well as the integration of novel machine elements. Special attention is paid to the integration of active components into lightweight links and passive joints. In addition, new control concepts are introduced to minimize structural vibrations. Although the optimization of robot systems itself allows a reduction of cycle times, these can be further decreased by improved path planning, robot programming, and automated assembly planning concepts described by 25 contributions within this book. The content of this volume is subdivided into four main parts dealing with Modeling and Design, System Implementation, Control and Programming as well as Adaptronics and Components. This book is aimed at researchers and postgraduates working in the field of parallel robots as well as practicing engineers dealing with industrial robot development and robotic applications.

Multinationals, Technology and Localization in Automotive Firms in Asia Oct 10 2020 East Asia has led rapid economic growth in the last few decades with India joining them over the last five years. Automotive parts manufacturers have been an important component of domestic production in all these economies. Experts with several years of multi-disciplinary research experience on the field examine the actual and potential technological and localization implications of MNC operations in East Asia and India. The rich collection of country experiences are both original and incisive. This volume includes: Case studies from China, Japan, India, Thailand and Malaysia A study of the role of multinationals in Asian technology building An examination of the growing Chinese automobile sector Featuring leading academics from across Asia, this title is essential reading for those studying industrial growth in the continent's major economies.

Innovation Acceptance Nov 30 2019 Advanced Driver-Assistance Systems (ADAS) provide the opportunity to increase road safety and driving comfort. Reviewing existing empirical work on comparable innovations, Patrick Planing derives potential acceptance constructs, which together with the results of thirty-two semi-structured interviews, have constituted the basis for a survey instrument that was consequently administered to a sample of over 400 participants from the target population. The resulting regression model shows that perceived safety and comfort benefits are most decisive for the acceptance of ADAS, while desire to exert control was found to most strongly support resistance to this technology.

Focus On: 100 Most Popular Compact Cars Nov 03 2022

New Developments in the Brewing Industry Dec 12 2020 Institutions and ownership play a central role in the transformation and development of the beer market and brewing industry. Institutions set the external environment of the brewery through both formal requirements and informal acceptance of company operations by the public. On the other hand, owners and managers adapt to these external challenges while following their own strategic agenda. This book explores the implications of this dynamic for the breweries, discussing how changes in institutions have contributed to the restructuring of the industry and the ways in which breweries have responded, including a craft beer revolution with a surge in demand of special flowered hops, a globalization strategy from the macro breweries, outsourcing by contract brewing, and knowledge exchange for small sized breweries. Structured in two parts, with a focus on institutions (Part I) and ownership (Part II) respectively, this book examines the link between institutions and governance in one of the most dynamic and innovative industries.

Unconventional Monetary Policy and Financial Stability Jan 13 2021 Since the financial crisis of 2008-09, central bankers around the world have been forced to abandon conventional monetary policy tools in favour of unconventional policies such as quantitative easing, forward guidance, lowering the interest rate paid on bank reserves into negative territory, and pushing up prices of government bonds. Having faced a crisis in its banking sector nearly a decade earlier, Japan was a pioneer in the use of many of these tools. Unconventional Monetary Policy and Financial Stability critically assesses the measures used by Japan and examines what they have meant for the theory and practice of economic policy. The book shows how in practice unconventional monetary policy has worked through its impact on the financial markets. The text aims to generate an understanding of why such measures were introduced and how the Japanese system has subsequently changed regarding aspects such as

governance and corporate balance sheets. It provides a comprehensive study of developments in Japanese money markets with the intent to understand the impact of policy on the debt structures that appear to have caused Japan's deflation. The topics covered range from central bank communication and policymaking to international financial markets and bank balance sheets. This text is of great interest to students and scholars of banking, international finance, financial markets, political economy, and the Japanese economy.

Responses to Regionalism in East Asia Sep 20 2021 In the decade following the Asian financial crisis, the East Asian political economy has experienced a radical transformation. This book thus investigates the responses of Japanese automotive makers to the processes of regionalism and regionalization by locating firm-level analysis in a broader political economy context.

Plunkett's Automobile Industry Almanac 2009 Oct 02 2022 The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. Plunkett's Automobile Industry Almanac will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce; and much, much more. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. This book also includes statistical tables, an automobile industry glossary, industry contacts and thorough indexes. The corporate profile section of the book includes our proprietary, in-depth profiles of the 400 leading companies in all facets of the automobile industry. Purchasers may also receive a free copy of the company profiles database on CD-ROM.

Certain Lightweight Thermal Paper from China, Germany, and Korea, Invs. 701-TA-451 and 731-TA-1126-1128 (Preliminary) Jul 07 2020

Questions about the \$700 Billion Emergency Economic Stabilization Funds Nov 10 2020

Business Periodicals Index Jun 05 2020

Kenya Gazette Jun 29 2022 The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

United States Civil Aircraft Register Apr 15 2021

Plunkett's Transportation, Supply Chain & Logistics Industry Almanac 2009 Aug 27 2019 The immense, global transportation and logistics sector is vital to businesses of all types. This carefully-researched book covers exciting trends in supply chain and logistics management, transportation, just in time delivery, warehousing, distribution, intermodal shipment systems, logistics services, purchasing and advanced technologies such as RFID. This reference tool includes thorough market analysis as well as our highly respected trends analysis. You'll find a complete overview, industry analysis and market research report in one superb, value-priced package. It contains thousands of contacts for business and industry leaders, industry associations, Internet sites and other resources. This book also includes statistical tables, an industry glossary and thorough indexes. The corporate profiles section of the book includes our proprietary, in-depth profiles of the 500 leading companies in all facets of the transportation and logistics industry. Here you'll find complete profiles of the hot companies that are making news today, the largest, most successful corporations in the business. Purchasers of either the book or PDF version can receive a free copy of the company profiles database on CD-ROM, enabling key word search and export of key information, addresses, phone numbers and executive names with titles for every company profiled.

Oversight Concerns Regarding Treasury Department Conduct of the Troubled Assets [sic] Relief Program Feb 11 2021

March 2022 - Surplus Record Machinery & Equipment Directory May 05 2020 SURPLUS RECORD, is the

leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. March 2022 issue. Vol. 99, No. 3

Kenya Gazette Jan 31 2020 The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Financial Disclosure Reports of Members of the U.S. House of Representatives for the Period Between January 1, 2008 and December 31, 2008 Oct 22 2021

On-Line Trajectory Generation in Robotic Systems Aug 20 2021 By the dawn of the new millennium, robotics has undergone a major transformation in scope and dimensions. This expansion has been brought about by the maturity of the field and the advances in its related technologies. From a largely dominant industrial focus, robotics has been rapidly expanding into the challenges of the human world. The new generation of robots is expected to safely and dependably co-habitat with humans in homes, workplaces, and communities, providing support in services, entertainment, education, health care, manufacturing, and assistance. Beyond its impact on physical robots, the body of knowledge robotics has produced is revealing a much wider range of applications reaching across - verse research areas and scientific disciplines, such as: biomechanics, haptics, neurosciences, virtual simulation, animation, surgery, and sensor networks among others. In return, the challenges of the new emerging areas are providing an abundant source of stimulation and insights for the field of robotics. It is indeed at the intersection of disciplines that the most striking advances happen. The goal of the series of Springer Tracts in Advanced Robotics (STAR) is to bring, in a timely fashion, the latest advances and developments in robotics on the basis of their significance and quality. It is our hope that the wider dissemination of research developments will stimulate more exchanges and collaborations among the research community and contribute to further advancement of this rapidly growing field.

News Releases Jul 27 2019

Towards a new order in the global automotive industry: How Asian companies catch up to their western peers Jul 19 2021 The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by leapfrogging several steps in their development process. This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

Historical Dictionary of Japanese Business May 29 2022 This second edition of Historical Dictionary of Japanese Business contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 800 cross-referenced entries on important personalities, Japanese businesses, politics, and economy.. This book is an excellent access point for students, researchers, and anyone wanting to know more about Japanese Business.

Subsonic versus Supersonic Business Jets - Full Concept Comparison considering Technical, Environmental and Economic Aspects Oct 29 2019 Inhaltsangabe: Introduction: On the 26th of August 2010 the new ultra-large-cabin ultra-long-range Gulfstream G650 business jet reached Mach 0.995 during its flight test campaign (1). This is almost the speed of sound (Mach 1) and inspires one to say, why not fly faster than the speed of sound! Reduce travelling time in the commercial business aviation segment. This is, however not a completely new vision. Many companies and research facilities have already spent a lot of time and investment in studies to investigate the feasibility of supersonic flight. Entry Into Service (EIS) for the new Gulfstream G650 is scheduled for 2012. In the following the main performance parameter of the G650 aircraft will be summarised. The parameters range, cruise speed, MTOW, etc. have been selected and serve as a basis to allow an appropriate comparison between the G650 as the latest high end Subsonic Business Jet and potential in future Supersonic Business Jets (SSBJ) within this subject Master Thesis. With the impressive maximum range of nearly 13,000 km the G650 can connect Dubai with New York or London with Buenos Aires within almost 14 hours. Maximum Range @ Normal Cruise Speed: 7,000 nm/12,964 km. Normal Cruise Speed Mach: 0.85/904 km/h. Mmo (Maximum Operating Mach Number): Mach 0.925. Maximum Cruise Altitude: 51,000 ft/15,545 m. Maximum Takeoff Weight (MTOW): 99,600 lb/45,178 kg. Maximum Fuel Weight:

44,200 lb/20,049 kg. Passengers: 11-18. Price: approx. 60-70 million USD. Gulfstream business rival Bombardier Aerospace also announced in October 2010 two new high end models, the Global 7000 and 8000 with a maximum range of 7,300 nm (13,520 km) and 7,900 nm (14,631 km) at cruise speed Mach 0.85. Entry Into Service is scheduled for 2016 (Global 7000) and 2017 (Global 8000). A comprehensive overview of business jets in service and in development is given in attachment 13.1. A Supersonic Business Jet flying at Mach 2 cruise speed could virtually halve the travelling time, which would enormously enhance the mobility and flexibility. In order to achieve this ambition a paradigm shift is required. New technologies must be established, the impact on the environment must be understood and minimised, existing regulations must be changed to permit overland flight restrictions and the product still needs to be economically viable. All of the above aspects must be considered and will be subject for discussion within this Master Thesis (See also figure [...])

Rediscovering Japanese Business Leadership Jun 17 2021 Who are Asia's biggest business leaders? What kind of leadership skills and philosophies do they possess that have put them at the forefront of their respective industries? What makes these business leaders, in particular, best-equipped to meet the challenges of a 21st century global economy? In *Rediscovering Japanese Business Leadership*, we gain insights into the leadership strategies of Japan's most successful global brands, including Toyota, Canon, and Nintendo. This book will be the first title in a series on Asian business leaders, leading companies and corporate philosophies in the 21st century. The inaugural volume will focus on business leaders and strategies at Japanese companies that are not only driving and reshaping their respective industries in the 21st century, but are demonstrating a knack for consistently meeting the various challenges of today's rapidly changing world.

Motor Vehicles, the Environment, and the Human Condition Sep 08 2020 This book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises. Humanity needs to move beyond motor vehicles as much as possible as part and parcel of the larger process of radical social structural changes.

Screenless Video Jan 25 2022 What Is Screenless Video Screenless video is any system for transmitting visual information from a video source without the use of a screen. Screenless computing systems can be divided into three groups: Visual Image, Retinal Direct, and Synaptic Interface. How You Will Benefit (I) Insights, and validations about the following topics: Chapter 1: Screenless video Chapter 2: Computer monitor Chapter 3: Video Chapter 4: Stereoscopy Chapter 5: Overhead projector Chapter 6: Head-up display Chapter 7: Stereo display Chapter 8: Volumetric display Chapter 9: Thin-film-transistor liquid-crystal display Chapter 10: Head-mounted display Chapter 11: Virtual retinal display Chapter 12: Intrinsically photosensitive retinal ganglion cell Chapter 13: Laser TV Chapter 14: Retinohypothalamic tract Chapter 15: Large-screen television technology Chapter 16: Technology of television Chapter 17: Holographic display Chapter 18: Electronic visual display Chapter 19: Input device Chapter 20: Displair Chapter 21: See-through display (II) Answering the public top questions about screenless video. (III) Real world examples for the usage of screenless video in many fields. (IV) 17 appendices to explain, briefly, 266 emerging technologies in each industry to have 360-degree full understanding of screenless video' technologies. Who This Book Is For Professionals, undergraduate and graduate students, enthusiasts, hobbyists, and those who want to go beyond basic knowledge or information for any kind of screenless video.

Knowledge Integration Dynamics Mar 27 2022 Presents an analysis of the business model unique to Japanese firms, emphasising four special features: the vertical value chain model, cross-industry collaboration, dynamic knowledge integration, and strategic innovation capability. This book also emphasises on inter- and intra-organizational collaboration as a source of strategic innovation.

Evolution of International Aviation Nov 22 2021 The purpose of this book is twofold. First, it lays out the forces that shaped the international aviation industry and that changed all the rules in the drive for liberalization. Second, it looks at the many interesting and difficult choices ahead that the airline industry in general and the international aviation industry in particular face. These choices include many dichotomies: pulling back from the trend toward liberalization or embracing the liberalization trend, merging in search of profitability or fragmenting the industry in search of economies. These possible futures are explored including the pros and cons of each future from a national, consumer, employer, and employee perspective. As with the previous two editions, *Evolution of International Aviation* reviews the historical development of the international aviation system. From this foundation it then provides an updated and expanded account of the current state of the aviation and aerospace industry including profitability, consolidation, and merger activity. New to this edition, the book broadens the coverage of the industry segments - airlines, air cargo, and manufacturing - to include the emerging commercial space sector. It also emphasizes the relationship between aviation and the political process, exploring the sustainability of this mode of transportation in a world of climate change, high oil prices, and political instability. Because this book is intended for both the interested amateur and the more serious student, references are provided in the text and at the end of each chapter to allow for further in-depth study. The third edition also adds to each chapter a set of learning objectives and a concluding series of questions for discussion.

Historical Dictionary of Postwar Japan Apr 27 2022 The Historical Dictionary of Historical Dictionary of Postwar Japan relates the history of postwar Japan through a chronology, an introductory essay, a bibliography, and

hundreds of cross-referenced dictionary entries on significant persons, events, places, organizations.

Multi-point Cooperative Communication Systems: Theory and Applications Mar 15 2021 Multi-point Cooperative Communication Systems: Theory and Applications mainly discusses multi-point cooperative communication technologies which are used to overcome the long-standing problem of limited transmission rate caused by the inter-point interference. Instead of combating the interference, recent progress in both academia and industrial standardizations has evolved to adopt the philosophy of “exploiting” the interference to improve the transmission rate by cooperating among multiple points. This book addresses the multi-point cooperative communication system systematically giving the readers a clear picture of the technology map and where the discussed schemes may fit. This book includes not only the theories of the paradigm-shifting multi-point cooperative communication, but also the designs of sub-optimal cooperative communication schemes for practical systems. Ming Ding is a senior researcher at Sharp Laboratories of China; Hanwen Luo is a professor at Shanghai Jiao Tong University.

Globalisation, the State and Regional Australia Jan 01 2020 ‘If we are to understand global capital, neoliberalism and the state in meaningful ways, we must understand them as they operate in, and on, particular places and people.’ Amanda Walsh Globalisation is an inescapable term in the 21st century, but its real meaning is often difficult to pin down. This book sheds new light on the political and economic implications of globalisation by examining the lived experience of a particular region: the Shoalhaven area of New South Wales, where two iconic Australian industries – dairying and manufacturing – struggled to survive in the face of global competition. Drilling down through layers of theory, policy and politics, Amanda Walsh surveys how globalisation has played out in regional Australia. Using industry case studies, she explores how decisions made at a national level have affected regional communities, and considers the role of the state in promoting and mediating globalising forces.

September 2022 - Surplus Record Machinery & Equipment Directory Jun 25 2019 SURPLUS RECORD, is the leading independent business directory of new and used capital equipment, machine tools, machinery, and industrial equipment, listing over 95,000 industrial assets; including metalworking and fabricating machine tools, chemical and process equipment, cranes, air compressors, pumps, motors, circuit breakers, generators, transformers, turbines, and more. Over 1,100 businesses list with the SURPLUS RECORD. September 2022 issue. Vol. 99, No. 9

The Military Balance 2009 Dec 24 2021 The Military Balance is The International Institute for Strategic Studies annual assessment of the military capabilities and defence economics of 170 countries worldwide. It is an essential resource for those involved in security policymaking, analysis and research. The book is a region-by-region analysis of the major military and economic developments affecting defence and security policies, and the trade in weapons and other military equipment. Comprehensive tables detail major military training activities, UN and non-UN deployments, and give data on key equipment holdings and defence-expenditure trends over a ten year period. Key Features: Region-by-region analysis: major military issues affecting each region, changes in defence economics, weapons and other military equipment holdings and the trade in weapons and military equipment Comprehensive tables: key data on weapons and defence economics, such as comparisons of international defence expenditure and military manpower Analysis: significant military and economic developments Wallchart: detailed world map that shows current areas of conflict, with explanatory tables. This new edition of The Military Balance provides a unique compilation of data and information enabling the reader to access all required information from one single publication.

Competitiveness of the ASEAN Countries Sep 28 2019 In an age in which it is increasingly necessary for nations to consider their competitiveness and at a time when the world economy is facing recession, this book explores the possible trajectory of ASEAN arguably one of the most dynamic areas in the world as a regional economic and political bloc. This important and timely study focuses on the role of foreign direct investment in advancing the performance of ASEAN and the competitiveness of its firms, whereas other studies typically focus solely on the role of trade. The expert contributors an interdisciplinary assembly of economists, lawyers and political scientists present a comprehensive view of ASEAN's experiences over the past decade, addressing the industrial competitiveness of ASEAN and analysing the role of MNEs against the background of the challenges of integration. They illustrate that regional integration will only be a success if ASEAN's linkages are broadened with global partners through negotiations of Free Trade Agreements. The book concludes that although much still remains to be done, and many promises are still to be unveiled, ASEAN's coming of age is an historic milestone. Competitiveness of the ASEAN Countries will appeal to a broad readership including students, academics and researchers with an interest in Asian studies, international business, international economics and international law.
