Reading Affect in Post-Apartheid Literature Apr 19 2022 This book examines South Africa's post-apartheid culture through the lens of affect theory in order to argue that the socio-political project of the "new" South Africa, best exemplified in their Truth and Reconciliation Commission Hearings, was fundamentally an affective, emotional project. Through the TRC hearings, which publicly broadcast the testimonies of both victims and perpetrators of gross human rights violations, the African National Congress government of South Africa, represented by Nelson Mandela and Archbishop Desmond Tutu, endeavoured to generate powerful emotions of contrition and sympathy in order to build an empathetic bond between white and black citizens, a bond referred to frequently by Tutu in terms of the African philosophy of interconnection: ubuntu. This book explores the representations of affect, and the challenges of generating ubuntu, through close readings of a variety of cultural products: novels, poetry, drama, memoir, documentary film and audio anthology.

The Old Farmer's Almanac 2021 Sep 24 2022 Happy New Almanac Year! It's time to celebrate the 229th edition of The Old Farmer's Almanac! Long recognized as North America's most-beloved and best-selling annual, the handy yellow book fulfills every need and expectation as a calendar of the heavens, a time capsule of the year, an essential reference that reads like a magazine. Always timely, topical, and distinctively "useful, with a pleasant degree of humor," the Almanac is consulted daily by users from all walks of life, throughout the year. The 2021 edition contains the fun facts, predictions, and feature items that have made it a cultural icon: traditionally 80 percent-accurate weather forecasts; notable astronomical events and time-honored astrological dates; horticultural, culinary, fashion, and other trends; historical hallmarks; best fishing days; time- and money-saving garden advice; recipes for refreshment; facts on folklore, farmers, home remedies, and husbandry; amusements and contests, plus too much more to mention—all in the inimitable way that the Almanac has done since 1792. • Beloved by generations for being "useful, with a pleasant degree of humor," The Old Farmer's Almanac features everything under the Sun, including its much-in-demand long-range weather predictions, essential astronomical timetables, 2021 holidays, fascinating trends, best fishing days, valuable gardening information, tantalizing recipes, fun folklore, amusements, contests, and much more! • Exclusive: 32 reference pages, covering such popular topics as full Moon names, hurricane names, flowers that attract birds and butterflies, U.S./metric measurement conversions, and many more! • Includes 112 full-color pages

Political Alternation in the Azores, Madeira and the Canary Islands Jun 21 2022 "In this innovative study, Dr Ruel explores why political alternation—a bedrock of democratic functioning—has been largely absent in three under-studied regions in Portugal and Spain. Focusing on Madeira, the Azores and the Canary Islands, this book explains how party competition, intra-party democracy and regional economic performance have contributed to political party stasis since the return of democracy in the mid-1970s." —Paul M. Heywood, Sir Francis Hill Professor of European Politics seconded 0.5 FTE to Global Integrity, Washington DC (2018-21), Faculty of Social Science, University of Nottingham, UK This book is about political alternation. It's about parties and politicians. It's about power and resources employed to secure longevity in power over time at Azores, Madeira and the Canary Islands. This book explores the phenomenon of political alternation through an in-depth contextual understanding

of the path of regional historical legacies at democratization and decentralization processes started in the 1970s; the institutional architectures and the scope of regional authority endowed in those regions; the specific dynamics of regional politics; and the constellation of political parties and actors and the regional elections results, as well as contextual factors that might explain why some political parties have better performances than other at regional elections. Throughout comparative lessons Ruel seeks to highlight the range of factors that affect regional electoral dynamics and outcomes and to develop a comprehensive understanding of the drivers of long-standing incumbency (Azores and Canary Islands) or the absence of political alternation (Madeira) within regional democracies.

Breast Cancer Mar 18 2022 Of all cancers, probably breast cancer is one of the most emotive. Increasingly patients with breast cancer are participating in the surgical and/or medical decision about their treatment. This involvement raises ethical issues about the rights of patients and their ability to give an informed consent, concerns about the process of communication between the medical staff and the patient, and also issues about the psychology of not only the woman with breast cancer, but also the doctor. This book addresses these issues relating to shared decision making and in particular those areas where a choice of treatment option involves some degree of risk/benefit analysis. It covers the ethical principles and then looks at the evidence that women who wish to participate and who are fully informed and who have taken part in the decision making process regarding their treatment, and who have a positive attitude towards their illness, tend to do better in the long run. Appropriate experts have contributed sections on the different treatment options to provide a brief overview of the treatments available and highlight the issues that should be considered by the woman and the doctor in the decision making process. There is also a section on the patients perspective and vignettes throughout to illustrate dilemmas the patient faces and the importance of communication. Written for the surgical, medical and clinical oncologists who deal with breast cancer patients and senior nurses in breast cancer units, this book will also be of interest to trainees practising oncologists, and the women themselves who are interested in the shared decision making process in oncology generally.

Overrun Dec 15 2021 Intelligent investigative writing meets experiential journalism in this important look at one of North America's most voraciously invasive species. Politicians, ecologists, and government wildlife officials are fighting a desperate rearguard action to halt the onward reach of Asian Carp, four troublesome fish now within a handful of miles from entering Lake Michigan. From aquaculture farms in Arkansas to the bayous of Louisiana; from marshlands in Indiana to labs in Minnesota; and from the Illinois River to the streets of Chicago where the last line of defense has been laid to keep Asian carp from reaching the Great Lakes, Overrun takes us on a firsthand journey into the heart of a crisis. Along the way, environmental journalist Andrew Reeves discovers that saving the Great Lakes is only half the challenge. The other is a radical scientific and political shift to rethink how we can bring back our degraded and ignored rivers and waterways and reconsider how we create equilibrium in a shrinking world. With writing that is both urgent and wildly entertaining, Andrew Reeves traces the carp's explosive spread throughout North America from an unknown import meant to tackle invasive water weeds to a continental scourge that bulldozes through everything in its path.

The Oxford Handbook of Organizational Decision Making Mar 06 2021 The Oxford Handbook of Decision-Making comprehensively surveys theory and research on organizational decision-making, broadly conceived. Emphasizing psychological perspectives, while encompassing the insights of economics, political science, and sociology, it provides coverage at the individual, group, organizational, and inter-organizational levels of analysis. In-depth case studies illustrate the practical implications of the work surveyed. Each chapter is authored by one or more leading scholars, thus ensuring that this Handbook is an authoritative reference work for academics, researchers, advanced students, and reflective practitioners concerned with decision-making in the areas of Management, Psychology, and HRM. PT 109 Feb 17 2022 The extraordinary World War II story of shipwreck and survival that paved John F. Kennedy's path to power – hailed as a “breathtaking account” by James Patterson, “masterfully written” by historian Douglas Brinkley, and “the finest book” ever written on the subject by Lt. Commander William Liebenow, the man who rescued JFK and the PT 109 crew in August 1943. In the early morning darkness of August 2, 1943, during a chaotic nighttime skirmish amid the Solomon Islands, the Japanese destroyer Amagiri barreled through thick fog and struck the U.S. Navy's motor torpedo boat PT 109, splitting the craft nearly in half and killing two American sailors instantly. The sea erupted in flames as the 109's skipper, John F. Kennedy, and the ten surviving crewmen under his command desperately clung to the sinking wreckage; 1,200 feet of ink-black, shark-infested water loomed beneath. "All hands lost," came the reports back to the Americans' base: no rescue was coming for the men of PT 109. Their desperate ordeal was just beginning—so too was one of the most remarkable tales of World War II, one whose astonishing afterlife would culminate two decades later in the White House. Drawing on original interviews with the last living links to the events, previously untapped Japanese wartime archives, and a wealth of archival documents from the Kennedy Library, including a lost first-hand account by JFK himself, bestselling author William Doyle has crafted a thrilling and definitive account of the sinking of PT 109 and its shipwrecked crew's heroics. Equally fascinating is the story's second act, in which Doyle explores in new detail how this extraordinary episode shaped Kennedy's character and fate, proving instrumental to achieving his presidential ambitions: "Without PT 109, there never would have been a President John F. Kennedy," declared JFK aide David Powers. Featuring castaways on a deserted island, a spy network of Solomon Island natives, an Australian coast watcher hidden on the side of a volcano, an S.O.S. note carved into a coconut, and a daring rescue attempt led by Kennedy's fellow American PT boats, PT 109 is an unforgettable American epic of war and destiny.

P.O.W.E.R. Learning and Your Life: Essentials of Student Success Jun 09 2021 P.O.W.E.R. Learning and Your Life is the only first-year experience text created specifically for the non-residential, commuter student and campus. These students face unique challenges and as they typically work full- or part-time, juggle work and family obligations with school, and they may be the first person in their families attempting a post-secondary education. The focus of P.O.W.E.R. Learning and Your Life is on real application of P.O.W.E.R. strategies in a program-specific approach through the use of photos, examples, and activities tied to general education courses (such as math, English, etc.) and careers through the use of P.O.W.E.R. principles.

Pain of Mind Oct 13 2021 Depression is the common cold of emotional struggle. The broad use of the term depression, and the confusing and conflicting approaches to depression have created a need for a Biblical perspective of depression among the Christian community. This book addresses that need. By implementing the results of this study, pastors and Christian counselors can be more specific in giving Bible-based counsel with the comfort of defined Biblical authority. Also, by providing clear Biblical direction for suffering believers, the confusion is addressed. This study affirms to the suffering the fact that Scriptures have the answers for life. By providing Biblical tools, this study promotes the ministry of the body of Christ by addressing the emotional needs of its members.

Prince2 Foundation Training Manual Aug 23 2022 Thank you for reading our PRINCE2 Foundation Training Manual. The main objective of this book is to provide an easy-to-read and easy-to-understand PRINCE2(R) Foundation training manual. The official PRINCE2 manual, "Managing Successful Projects with PRINCE2," is an excellent reference manual, but it is not a training manual and should not be used as one, as it is very difficult to comprehend and understand if you are new to project management. The official PRINCE2 manual also covers the complete Practitioner Syllabus, and it's impossible to know which parts are just focused on the PRINCE2 Foundation syllabus, so you have to read everything, which is not good if you are just studying for the foundation exam. Henceforth, this book is meant to be (and is) an easy introduction to PRINCE2 based on the Foundation syllabus, and it's quickly becoming the most read book for people wishing to learn about PRINCE2 and prepare for the foundation exam.

Leadership and Uncertainty Management in Politics Sep 12 2021 Through a range of international case studies from the USA, UK, France, Germany and Italy, this text assesses the conditions necessary for effective leadership and emphasizes the part played by uncertainty and division amongst followers.

Particle-Stabilized Emulsions and Colloids Jan 16 2022 There has been much scientific interest in the behaviour of colloidal particles at liquid interfaces. From a research aspect they provide model systems for fundamental studies of condensed matter physics. From a commercial aspect they provide applications for making new materials in the cosmetics, food and paint industries. In many cases of colloidal particles at interfaces, the mechanism of particle interactions is still unknown. Particle-Stabilized Emulsions and Colloids looks at recent studies on the behaviour of particles at liquid interfaces. The book first introduces the basic concepts and principles of colloidal particles at liquid-liquid interfaces including the interactions and conformations. The book then discusses the latest advances in emulsions and bicontinuous emulsions stabilized by both solid and soft particles and finally the book covers applications in food science and oil extraction. With contributions from leading experts in these fields, this

book will provide a background to academic researchers, engineers, and graduate students in chemistry, physics and materials science. The commercial aspects will also be of interest to those working in the cosmetics, food and oil industry.
