Arguments about Abortion Dec 19 2021 Does the morality of abortion depend on the moral status of the human fetus? Must the law of abortion presume an answer to the question of when personhood begins? Can a law which permits late abortion but not infanticide be morally justified? These are just some of the questions this book sets out to address. With an extended analysis of the moral and legal status of abortion, Kate Greasley offers an alternative account to the reputable arguments of Ronald Dworkin and Judith Jarvis Thomson and instead brings the philosophical notion of 'personhood' to the foreground of this debate. Structured in three parts, the book will (I) consider the relevance of prenatal personhood for the moral and legal evaluation of abortion; (II) trace the key features of the conventional debate about when personhood begins and explore the most prominent issues in abortion ethics literature: the human equality problem and the difference between abortion and infanticide; and (III) examine abortion law and regulation as well as the differing attitudes to selective abortion. The book concludes with a snapshot into the current controversy surrounding the scope of the right to conscientiously object to participation in abortion provision.

[Safe Abortion](#) Feb 09 2021 At a UN General Assembly Special Session in 1999, governments recognised unsafe abortion as a major public health concern, and pledged their commitment to reduce the need for abortion through expanded and improved family planning services, as well as ensure abortion services should be safe and accessible. This technical and policy guidance provides a comprehensive overview of the many actions that can be taken in health systems to ensure that women have access to good quality abortion services as allowed by law.

Rachel Weeping and Other Essays on Abortion Oct 05 2020

Abortion Rights Nov 25 2019 Presents critical and forcefully argued debate between two moral philosophers, setting out strong cases on both sides of the argument.

[Interdisciplinary Views on Abortion](#) May 12 2021 "The first essays set forth sociological, medical, and political points of view, discussing the abortion debate along with various abortion methods. The next essay serves as a bridge to the remaining essays. The remaining essays examine a study of The Cider House Rules; the biological and theological concerns; a case study of abortion; and a feminist Kantian perspective"--Provided by publisher.

[Abortion Parley](#) Dec 07 2020

About Abortion Nov 18 2021 New medical technologies, women's willingness to talk online and off, and tighter judicial reins on state legislatures are shaking up the practice of abortion. As talk becomes more transparent, Carol Sanger writes, women's decisions about whether to become mothers will be treated more like those of other adults making significant personal choices.

Economic Impact of Unsafe Abortion-related Morbidity and Mortality Sep 23 2019 Unsafe abortion-related morbidity and mortality (UARMM) impacts welfare at the individual, household, community and national levels. This report surveys the empirical information available on costing unsafe abortions, to develop an analytical framework for cost estimation, to describe the methodological approaches available, given the constraints of the subject matter, and finally to estimate cost ranges within the limitations of data on unsafe abortions.

International Population Conference, Manila, 1981: Proceedings & selected papers Aug 23 2019

Abortion Law in Transnational Perspective Sep 28 2022 It is increasingly implausible to speak of a purely domestic abortion law, as the legal debates around the world draw on precedents and influences of different national and regional contexts. While the United States and Western Europe may have been the vanguard of abortion law reform in the latter half of the twentieth century, Central and South America are proving to be laboratories of thought and innovation in the twenty-first century, as are particular countries in Africa and Asia. *Abortion Law in Transnational Perspective* offers a fresh look at significant transnational legal developments in recent years, examining key judicial decisions, constitutional texts, and regulatory reforms of abortion law in order to envision ways ahead. The chapters investigate issues of access, rights, and justice, as well as social constructions of women, sexuality, and pregnancy, through different legal procedures and regimes. They address the promises and risks of using legal procedure to achieve reproductive justice from different national, regional, and international vantage points; how public and courtroom debates are framed within medical, religious, and human rights arguments; the meaning of different narratives that recur in abortion litigation and language; and how respect for women and prenatal life is expressed in various legal regimes. By exploring how legal actors advocate, regulate, and adjudicate the issue of abortion, this timely volume seeks to build on existing developments to bring about change of a larger order. Contributors: Luis Roberto Barroso, Paola Bergallo, Rebecca J. Cook, Bernard M. Dickens, Joanna N. Erdman, Lisa M. Kelly, Adriana Lama?ková, Julieta Lemaitre, Alejandro Madrazo, Charles G. Ngwenya, Rachel Rebouché, Ruth Rubio-Marín, Sally Sheldon, Reva B. Siegel, Verónica Undurraga, Melissa Upreti.

Abortion and Sterilization Jan 08 2021 *Abortion and Sterilization: Medical and Social Aspects* investigates the medical and social aspects of abortion and sterilization. Its aim is to legitimate abortion and sterilization for the sake of those who need and seek the service. The best techniques are presented in the proper medical perspective. The social and political history, epidemiology, and public health aspects of abortion and sterilization are also discussed. Comprised of 23 chapters, this book begins with a review of abortion legislation and practices in historical perspective amidst changing sociocultural contexts in diverse geographic areas. Liberalization trends are surveyed chronologically in terms of selected highlights demonstrating legislative progress and frustrations along with advances in abortion technology. A classified listing of abortion statutes and/or court decisions in 140 countries is given. Subsequent chapters deal with the epidemiology of induced abortion; abortions for teenagers; the link between abortion and mental health; and hysterotomy and hysterectomy as abortion techniques. Vasectomy as a family planning option is also examined. This monograph is intended for students, teachers, clinicians, research workers, administrative and nursing personnel, and those with interest in reproductive control.

Abortion Politics, Women's Movements, and the Democratic State Aug 03 2020 *Abortion Politics, Women's Movements and the Democratic State* examines the impact of women's movements since the 1960s on the policy-making processes determining abortion laws. The impact of women's movements is assessed in terms of their success in increasing the democratic representation of women generally and movement organizations specifically. Rather than asking 'how many women are in political office' this study asks 'to what extent are women included in the day to day process of making decisions?' Of special interest in this project is the extent to which states, through establishment of women's policy agencies, have assisted, opposed, or ignored the demands of movement activists for access to power and for feminist abortion policies. Researchers have examined these questions in policy debates over the last four

decades in 11 advanced industrial democracies: Austria, Belgium, Canada, France, Germany, Great Britain, Ireland, Italy, the Netherlands, Spain, and the United States. The findings of this cross-national longitudinal study document that women's movements have been successful in gaining both substantive and descriptive representation on abortion policy in a majority of the 32 debates studied. The ability of women's policy offices to provide a necessary and effective linkage between women's movement activism and increased democratic representation in policy-making varies both cross-nationally and over time. The openness of policy subsystems and the status of the parties on the left are factors that interact with variations in movement cohesion and resources to account for these variations.

Democracy: Papers presented on Thursday, July 14 (2 pts.) Sep 04 2020

Abortion and Martyrdom Jun 13 2021 The horror presented by the increasing institutionalisation of abortion in contemporary society poses some of the strongest moral and theological questions of our time. The innocent suffering of children killed in the womb raises fundamental questions. This book explores issues raised by the place of these children in the plan of Salvation.

Euthanasia, Abortion, Death Penalty and Religion - The Right to Life and its Limitations Mar 30 2020 This book considers how the termination of life might be accepted in the view of a general obligation to protect life. It features more than 10 papers written by scholars from 14 countries that offer international comparative empirical research. Inside, readers will find case studies from such areas as: India, Chile, Germany, Italy, England, Palestine, Lithuania, Nigeria, and Poland. The papers focus on three limitations of the right to life: the death penalty, abortion, and euthanasia. The contributors explore how young people understand and evaluate the right to life and its limitations. The book presents unique empirical research among today's youth and reveals that, among other concepts, religiosity matters. It provides insight into the acceptance, perception, and legitimation of human rights by people from different religious and cultural backgrounds. This investigation rigorously tests for inter-individual differences regarding political and judicial rights on religious grounds, while controlling for other characteristics. It will help readers better understand the many facets of this fundamental, yet controversial, philosophical question. The volume will be of interest to students, researchers, as well as general readers searching for answers.

The Turnaway Study Jun 25 2022 "Now with a new afterword by the author"--Back cover.

Completing the Fertility Transition Nov 06 2020 This series focuses on population studies carried out by the United Nations, its specialized agencies and other organizations. This issue deals with the guidelines for the projection of fertility. The publication aims to increase understanding of likely fertility trends in the diverse countries of the world.

Interdisciplinary Views on Abortion Sep 16 2021 This book examines issues surrounding abortion and abortion practices in the United States through the perspectives of multiple disciplines, including sociology, anthropology, philosophy, community health, theology, and political science. The essays parallel the interdisciplinary nature of feminist and women's studies, situating abortion within a wider understanding of the impact of reproduction on women's lives and their health. The contributing authors provide an accessible summary of the numerous topics surrounding abortion, and the essays reflect both original research and scholarly discourse on existing research and literature. Instructors considering this book for use in a course may request an examination copy here.

The Abortion Papers, Ireland Jul 26 2022 "In these essays, Irish feminist scholars and activists explore the politics of abortion in one of the most profoundly Catholic and traditional countries in Europe. Writing from a wide range of historical and contemporary perspectives, the authors consider the social, ethical and political dimensions of the abortion debate and its implications for women's freedom and life-choices." (Excerpt)

When Life and Choice Collide Jun 20 2019

Abortion in the Ancient World May 24 2022 In this important new study, Kapparis extrapolates the views of ancient physicians on abortion from a detailed investigation of the medical facts, medical and philosophical theories concerning the human status of the unborn in antiquity, the Hippocratic Oath, and other documents on Greek medical ethics.

Abortion in India Jan 28 2020 India was a pioneer in legalizing induced abortion, or Medical Termination of Pregnancy (MTP) in 1971. Yet, after three decades, morbidity and mortality due to unsafe abortion remain a serious problem. There is little public debate on the issue despite several national campaigns on safe motherhood. Instead, discussion on abortion has mainly centred around declining sex ratio, sex-selective abortion, and the proliferation of abortion clinics in urban areas. Adding to the problem is that abortion continues to be a sensitive, private matter, often with ethical/moral/religious connotations that sets it apart from other reproductive health-seeking behaviour. This book fills a gap in our understanding of the ground realities with respect to induced abortion in India to create an evidence-based body of knowledge. Using both quantitative and qualitative research methods, the case studies show why and under what circumstances women seek abortion and the quality of services available to them. They also explore inter-generational differences in attitudes and practices, the perceptions and selection of providers, female-selective abortion, and informal abortion practitioners. Among other issues, the contributors show that strong preference for sons, availability of modern techniques for diagnostic tests, widespread acceptance of the small family norm, and heavy reliance on female sterilisation as the primary method of contraception lead women to abort unwanted pregnancies. A book that goes beyond the smokescreen of data and regulations to unravel the human story behind elective abortion, it will be of interest to those studying health, public policy, and gender, apart from the general reader.

Abortion Wars Jun 01 2020 A "pro-rights" collection of essays by abortion providers, journalists, legal strategists, and philosophers includes a timeline of events from 1940 to the present

Abortion Oct 17 2021 Presents opposing viewpoints on the legality, morality, responsibility for, and justification of abortion, and includes critical thinking skills activities.

The Abortion Papers Ireland Jan 20 2022 A collection of key reflections and scholarship on abortion in Ireland between 1992 and 2013. It is intended to offer a valuable resource for those currently advancing legal and social change in order to offer women living in Ireland, North and South, access to abortion on the island.

Collected Papers Dec 27 2019

Women Creating Women Apr 30 2020 Women Creating Women is a pioneering exploration of contemporary Irish women poets that should provide a frame of reference for all future discussion of this topic. Patricia Haberstroh focuses on five poets in particular, beginning with Eithne Strong and Nuala Ní Dhomhnaí, both of whom still write in the Irish language—each emphasizing the importance of the female perspective on the human experience. She then turns her attention to three of the best-known contemporary poets: Eavan Boland, the most highly esteemed; Medbh McGuckian, the most difficult and original; and Eilean Ni Chuilleanain, whose poems make some of the stronger statements about the need to balance a male with a female perspective to broaden the human vision. Drawing on a wide reading of the poets' works and extensive personal interviews with them, Haberstroh demonstrates the emergence of a more self-conscious and self-confident female poet who is ready to rewrite the story of Irish women and redefine and explore female identity and the image of women in Irish history, culture, and literature. Her final chapter explores Irish women's poetry since 1980. This book is a celebration of poets, poetry, and Ireland that allows the reader to discover the works of these fine poets.

Abortion in America Jul 14 2021 Ziegler documents a shift to debates on policy costs and benefits that deepened polarization on abortion in this first legal history of the period.

Rights and Wrongs of Abortion Apr 23 2022 During its first two years of publication, Philosophy & Public Affairs contributed to the public debate on abortion a set of remarkable and brilliant articles which examine the basic philosophical issues posed by this controversial subject: whether the fetus is a person, whether it has a right to life, whether a woman has a right to decide what happens in and to her body, whether there is an ethical connection between abortion and infanticide, whether there is any point after conception where it is possible to draw the line beyond which killing is impermissible. These five essays, together here for the first time in a single volume, offer radically differing points of view; they provide the best sustained discussion of these philosophical issues available anywhere. Contents: Judith Jarvis Thomson, "A Defense of Abortion"; Roger Wertheimer, "Understanding the Abortion Argument"; Michael Tooley, "Abortion and Infanticide"; John Finnis, "The Rights and Wrongs of Abortion"; and Judith Jarvis Thomson, "Rights and Deaths."

Abortion Policies and Reproductive Health Around the World Mar 22 2022 The report on "Abortion Policies and Reproductive Health Around the World" provides up-to-date information on Government policies on abortion and related reproductive health issues for all 193 Member States, 2 Observer States and 2 non-member States of the United Nations. The report provides changes between 1996 and 2013 in legal grounds on which induced abortion is

permitted in each country. Seven legal grounds for abortion are included, namely: (1) to save the life of a woman; (2) to preserve a woman's physical health; (3) to preserve a woman's mental health; (4) in case of rape or incest; (5) because of foetal impairment; (6) for economic or social reasons; and (7) on request. The report also includes latest available information on Government policies and programmes related to fertility, family planning, access to reproductive health services, and maternal mortality. In addition, the report provides information on how abortion policies are associated with selected reproductive health indicators.

The Ethics of Abortion Aug 15 2021 Appealing to reason rather than religious belief, this book is the most comprehensive case against the choice of abortion yet published. The Ethics of Abortion critically evaluates all the major grounds for denying fetal personhood, including the views of those who defend not only abortion but also infanticide. It also provides several (non-theological) justifications for the conclusion that all human beings, including those in utero, should be respected as persons. This book also critiques the view that abortion is not wrong even if the human fetus is a person. The Ethics of Abortion examines hard cases for those who are pro-life, such as abortion in cases of rape or in order to save the mother's life, as well as hard cases for defenders of abortion, such as sex selection abortion and the rationale for being "personally opposed" but publically supportive of abortion. It concludes with a discussion of whether artificial wombs might end the abortion debate. Answering the arguments of defenders of abortion, this book provides reasoned justification for the view that all intentional abortions are morally wrong and that doctors and nurses who object to abortion should not be forced to act against their consciences.

Sessional Papers Mar 10 2021

Complications Feb 21 2022 "This book... arises out of a concern that the steadily growing body of information about the harmful complications of abortion for women and their subsequent children should become widely known. These complications are physical, psychological, social, and spiritual." --

The Abortion Papers Oct 29 2022

The Safety and Quality of Abortion Care in the United States Aug 27 2022 Abortion is a legal medical procedure that has been provided to millions of American women. Since the Institute of Medicine first reviewed the health implications of national legalized abortion in 1975, there has been a plethora of related scientific research, including well-designed randomized clinical trials, systematic reviews, and epidemiological studies examining abortion care. This research has focused on examining the relative safety of abortion methods and the appropriateness of methods for different clinical circumstances. With this growing body of research, earlier abortion methods have been refined, discontinued, and new approaches have been developed. The Safety and Quality of Abortion Care in the United States offers a comprehensive review of the current state of the science related to the provision of safe, high-quality abortion services in the United States. This report considers 8 research questions and presents conclusions, including gaps in research.

Human Rights and Common Good Apr 11 2021 This central volume in the Collected Essays brings together John Finnis's wide-ranging contribution to central issues in political philosophy. The volume begins by examining the general theory of political community and social justice. It includes the powerful and well-known Maccabean Lecture on Bills of Rights — a searching critique of Ronald Dworkin's moral-political arguments and conclusions, of the European Court of Human Rights' approach to fundamental rights, and of judicial review as a constitutional institution. It is followed by an equally searching analysis of Kant's thought on the intersection of law, right, and ethics. Other papers in the book's opening section include an early assessment of Rawls's A Theory of Justice, a radical re-interpretation of Aquinas on limited government and the significance of the private/public distinction, and a challenging paper on virtue and the constitution. The volume then focuses on central problems in modern political communities, including the achievement of justice in work and distribution; the practice of punishment; war and justice; the public control of euthanasia and abortion; and the nature of marriage and the common good. There are careful and vigorous critiques of Nietzsche on morality, Hart on punishment, Dworkin on the enforcement of morality and on euthanasia, Rawls on justice and law, Thomson on the woman's right to choose, Habermas on abortion, Nussbaum and Koppelman on same-sex relations, and Dummett and Weithman on open borders. The volume's previously unpublished papers include a foundational consideration of labour unions, a fresh statement of a new grounding for the morality of sex, a surprising reading of C.S. Lewis's Abolition of Man on contraception, and an introduction reviewing some of the remarkable changes in private and public morality over the past half-century.

After Roe Feb 27 2020 In the decade after the 1973 Supreme Court decision on abortion, advocates on both sides sought common ground. But as pro-abortion and anti-abortion positions hardened over time into pro-choice and pro-life, the myth was born that Roe v. Wade was a ruling on a woman's right to choose. Mary Ziegler's account offers a corrective.

Contemporary Bioethics Jul 22 2019 This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitra (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice – the maqasid – which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

Will Abortion Make Me Happy? Oct 25 2019 In the early twenty-first century a philosophy instructor faced with the assignment of teaching a "Moral Issues" course decided to engage in an experiment in how to teach ethics. Rather than asking whether a given issue was right or wrong he decided to ask his students whether engaging, or not engaging, in certain actions would make them happy? In doing so he was tapping in on the wisdom of classical ethics and changing the subject of such discussions from divisive arguments over competing moral codes to, what the ancients have always insisted ethics really is, a conversation about personal happiness. So begins this unique book about the abortion issue. It also features real life letters to the editor on the topic, a look at some historical aspects of the issue, and a look at how modern science has changed the way young people think about abortion. Perhaps the most unique look at the issue in a long time, "Will Abortion Make Me Happy?" is worth a place on the reading list of anyone interested in moral issues, ethics, or the abortion issue.

Agency, Pregnancy and Persons Jul 02 2020 This book provides extensive and critical engagement with some of the most recent and compelling arguments favoring abortion choice. It features original essays from leading and emerging philosophers, bioethicists and medical professionals that present philosophically sophisticated and novel arguments against abortion choice. The chapters in this book are divided into three thematic sections. The first set of essays focuses primarily on unborn human individuals--zygotes, embryos and fetuses. In these chapters it is argued, for example, that human organisms begin to exist at conception and that zygotes, embryos and fetuses are persons. These chapters also explore questions about whether or not zygotes, embryos and fetuses are part of their mothers' bodies. The second set of essays focuses primarily on elective abortion and the debates surrounding it. These chapters consider whether or not opponents of abortion are commonly hypocritical, how opponents of abortion should think about adoption, how emerging technologies may affect the current debate and whether or not those participating in the debate should rely on analogies to support their case. Finally, the third set of essays shifts focus from the legal and moral status of elective abortion to its place in medical practice. In these chapters it is argued that elective abortion embodies a kind of ableism, and that elective abortion is medically unnecessary, harmful to women's mental health and that telemedicine abortion poses significant risks to women's health. Agency, Pregnancy and Persons offers an up-to-date examination of unborn human beings, the debates surrounding elective abortion and the place of elective abortion within medical practice. It will be of interest to medical professionals and those who work in philosophy, bioethics and medical ethics alike.
