[Cricket in Colonial India 1780 - 1947](#) Nov 25 2019 This is an exacting social history of Indian cricket between 1780 and 1947. It considers cricket as a derivative sport, creatively adapted to suit modern Indian socio-cultural needs, fulfil political imperatives and satisfy economic aspirations. Majumdar argues that cricket was a means to cross class barriers and had a healthy following even outside the aristocracy and upper middle classes well over a century ago. Indeed, in some ways, the democratization of the sport anticipated the democratization of the Indian polity itself. Boria Majumdar reveals the appropriation, assimilation and subversion of cricketing ideals in colonial and post-colonial India for nationalist ends. He exposes a sport rooted in the contingencies of the colonial and post-colonial context of nineteenth- and twentieth-century India. Cricket, to put it simply, is much more than a 'game' for Indians. This study describes how the genealogy of their intense engagement with cricket stretches back over a century. It is concerned not only with the game but also with the end of cricket as a mere sport, with Indian cricket's commercial revolution in the 1930s, with ideals and idealism and their relative unimportance, with the decline of morality for reasons of realpolitik, and with the denunciation, once and for all, of the view that sport and politics do not mix. This book was previously published as a special issue of the International Journal of the History of Sport

[Notions of Nationhood in Bengal](#) Jun 01 2020 This book reopens the debate on colonial nationalisms, going beyond derivative, borrowed, political and modernist paradigms. It introduces the conceptual category of samaj to demonstrate how indigenous socio-cultural origins in Bengal interacted with late-colonial discourses to produce the notion of a nation. Samaj (a historical society and an idea-in-practice) was a site for reconfiguring antecedents and negotiating fragmentation. Drawing on indigenous sources, this study shows how caste, class, ethnicity, region and community were refracted to conceptualise wider unities. The mapping of cultural continuities through change facilitates a more nuanced investigation of the ontology of nationhood, seeing it as related to, but more than political nationalism. It outlines a fresh paradigm for recalibrating postcolonial identities, offering interpretive strategies to mediate fragmentation.

Islam and Development Oct 05 2020 The study of Islam since the advent of 9/11 has made a significant resurgence. However, much of the work produced since then has tended to focus on the movements that not only provide aid to their fellow Muslims, but also have political and at times violent agendas. This tendency has led to a dearth of research on the wider Muslim aid and development scene. Focusing on the role and impact of Islam and Islamic Faith Based Organisations (FBOs), an arena that has come to be regarded by some as the 'invisible aid economy', Islam and Development considers Islamic theology and its application to development and how Islamic teaching is actualized in case studies of Muslim FBOs. It brings together contributions from the disciplines of theology, sociology, politics and economics, aiming both to raise awareness and to function as a corrective step within the development studies literature.

[Pedagogy for Religion](#) Jul 02 2020 Offering a new approach to the study of religion and empire, this innovative book challenges a widespread myth of modernity—that Western rule has had a secularizing effect on the non-West—by looking closely at missionary schools in Bengal. Parna Sengupta examines the period from 1850 to the 1930s and finds that modern education effectively reinforced the place of religion in colonial India. Debates over the mundane aspects of schooling, rather than debates between religious leaders, transformed the everyday definitions of what it meant to be a Christian, Hindu, or Muslim. Speaking to our own time, Sengupta concludes that today's Qur'an schools are not, as has been argued, throwbacks to a premodern era. She argues instead that Qur'an schools share a pedagogical frame with today's Christian and Muslim schools, a connection that plays out the long history of this colonial encounter.

Domesticity in Colonial India Feb 21 2022 By the 1880s, Hindu domestic life and its most intimate relationships had become contested ground. For urban, middle-class Indians, the Hindu woman was at the center of a debate over colonial modernity and traditional home and family life. This book sets this debate within the context of a nineteenth-century world where bourgeois, European ideas on the home had become part of a transnational, hegemonic domestic discourse, a 'global domesticity.' But Walsh's interest is more in hybridity than hegemony as she explores what women themselves learned when men sought to teach them through the Indian advice literature of the time. As a younger generation of Indian nationalists and reformers attempted to undercut the authority of family elders and create a 'new patriarchy' of more nuclear and exclusive relations with their wives, elderly women in extended Hindu families learned that their authority in family life (however contingent) was coming to an end.
