Manual of Panic Focused Psychodynamic Psychotherapy - Extended Range Jun 22 2022 "This manual presents a carefully researched, detailed psychodynamic treatment program for the alleviation of a transdiagnostic range of primary Axis I anxiety disorders, including panic disorder, generalized anxiety disorder, social anxiety disorder, posttraumatic stress disorder, and related psychological problems. First exploring the principles of psychodynamic theory and formulation, the authors then present a three-phased process of panic-focused psychodynamic psychotherapy-extended range (PFPP-XR): initial evaluation, interpretation of central conflicts and defense mechanisms, and termination. Each phase is discussed in depth and relies on central case illustrations to demonstrate techniques and results. A subsequent chapter explores how to address complex issues that may arise during the course of treatment. Altogether, this manual not only provides a demonstrated, adaptable approach for anxiety disorders, but also clearly embodies a spirit of research and empiricism heretofore rare in psychodynamic psychotherapies, with an eye toward future development"--Provided by publisher.
