Fitness CENTRAL! Feb 18 2022 If you're a fitness fanatic, and are truly interested in getting your current levels of strength and conditioning - as well as overall fitness to skyrocket to NEW levels altogether, you're at the right place! This little manual has something for everyone as it were. If you're just starting out, and are 300 lbs and looking to DROP weight quick, then this book is a great, great add on to the 0 Excuses Fitness System available through my website. If you're a seasoned trainee, and are looking to blast past personal best's in pull-ups - - or handstand pushups - - and assuming you've read the manuals I've put out on these, you'll find something that'll help you here as well! If you're a grip monster - - or core training fanatic - - I'll bet you anything you'll find some new and interesting reads in this book. And so forth. This book truly has something for EVERYONE when it comes to fitness, my friend. My name is Rahul Mookerjee, and I've been in the fitness biz for years now. My first book "Fast and Furious Fitness" (currently out of print, but I'm going to bring it back very soon indeed as a "collector's item both on my website and on Amazon etc) was published in 2011, and it became an instant hit thereafter. Folks were getting tired of spending big bucks at gyms, and getting nowhere. Folks were getting tired of all the hype promised by personal trainers and "booby builders" (most of whom were on the juice) in the gym - - and getting very little in the way of actual muscle or results for the hours they spent in the gym. Not to mention the nagging injuries just kept piling up. The "shoulders that hurt when you lift your arm up". The nagging lower back pain. Elbow trouble ... and of course, wrist and neck pain galore. None of this improved to any great degree with the traditional training methods folks were being raised on, and Fast and Furious Fitness was a breath of fresh air in that regard. And now, I'm bringing you all these years of training and "wisdom" in an easy to digest "collated" format that you'll love - and want to read over and over and OVER again for motivation, inspiration, and information galore! What you'll learn from these tips -Finger tip pushups, and what you really need to know about them! -Why the way your muscles "look" aren't the most important - or even a little bit important. -The skinny on grip strength and building rock solid, coruscating levels of "kung fu" like grip strength. My manuals on grip training do a great job here ... and these tips are but the icing on the cake - - but a much needing icing! -The truth about calluses that most people will NOT tell you. -The one exercise combo that will give you explosive gains all over your upper body. Once you go this route, you'll never go back ... trust me! -Achieving the magic 500 in terms of pushups - - and more. -Getting to 500 UPHILL steps a day, and much, much more. -Why being on the heavy side isn't necessarily a disadvantage - and could even be considered an ADVANTAGE! This tip alone is worth it's weight in SPADES, my friend. - Facts on the handstand you likely never thought of, much less considered. -Why you aren't losing weight - despite seemingly doing all the right things. This one tip alone will boggle your mind - dive in, and you'll see what I mean! -How to work the legs with ... get this ... PUSHUPS! -How simple MOVEMENT done correctly can shed more fat than ever before -Can you save your own life if you had to? This little gem of a tip will get even the most seasoned of gym gorillas THINKING ... that is for sho! -What is the ideal length of time to exercise (hint - it's NOT what you've been told). And much, much more, my friend ... Dive in -- and be sure and write me back at info@0excusesfitness.com with your thoughts - we love hearing from YOU! Best, Rahul Mookerjee

Radar Days Jul 31 2020 It is now more than sixty years since radar began in Britain. In the intervening years, airborne radar has become one of the most important branches of civilian and military radar. In Radar Days, "the father of airborne radar," Dr. "Taffy" Bowen recounts his personal story of how the first airborne radars were built and brought into use in the Royal Air Force, and of the Tizard mission to the USA in 1940, of which he was a member. Written from the point of view of the individuals who worked at the laboratory bench, the story begins with the building of the first ground air-warning radar at Orfordness in June 1935. The book proceeds to describe how this equipment was miniaturized to make it suitable for use in aircraft and the lengthy, sometimes hazardous flight trials conducted before radar went into service with the RAF. The author also details the activities of the Tizard mission, which was instrumental in installing the first airborne radars in US aircraft. The greatest achievement of the mission was to pass on the secret of the resonant magnetron to the US only a few months after its invention at Birmingham University. This was the device that brought about a revolution in Allied radar, putting it far ahead of the corresponding German technology for the remainder of the war.
