[Robert Ludlum's \(TM\) The Utopia Experiment](#) Feb 21 2022 With U.S. intelligence agencies wracked by internal power struggles and paralyzed by bureaucracy, the president has been forced to establish his own clandestine group--Covert-One. It's activated only as a last resort, when the threat is on a global scale and time is running out. The Utopia Experiment When Dresner Industries unveils the Merge, a device that is destined to revolutionize the world and make the personal computer and smartphone obsolete, Covert-One operative Colonel Jon Smith is assigned to assess its military potential. He discovers that enhanced vision, real-time battlefield displays, unbreakable security, and near-perfect marksmanship are only the beginning of a technology that will change the face of warfare forever--and one that must be kept out of the hands of America's enemies at all costs. Meanwhile, in the mountains of Afghanistan, CIA operative Randi Russell encounters an entire village of murdered Afghans--all equipped with enhanced Merge technology that even the Agency didn't know existed. As Smith and Russell delve into the circumstances surrounding the Afghans' deaths, they're quickly blocked by someone who seems to have access to the highest levels of the military--a person that even the president knows nothing about. Is the Merge really as secure as its creator claims? And what secrets about its development is the Pentagon so desperate to hide? Smith and Russell are determined to learn the truth. But they may pay for it with their lives . . .

[International Migration, Immobility and Development](#) Dec 22 2021 The study of international migration and ethnic relations is rapidly expanding in the social sciences, in the humanities, and in law and medicine at universities around the world. Theories and methods are borrowed from many disciplines, but with little cross-fertilization, thereby leaving many core issues out. This authoritative book fills a gap by providing an expertly integrated overview of international migration from a wide range of disciplinary perspectives. Throughout the book, South to North migration is used as the main example. The authors, leading experts in their fields, ask provocative new questions such as the counterfactual, 'Why do people not migrate?' and address old questions in fresh ways in a language accessible for students in a range of disciplines. Does migration from less developed countries stimulate or obstruct development? Does development reduce or increase the flows of migration? What are the dynamics of a migration process? Geography, economics, political science, social anthropology and sociology all inform this book, which is certain to become an established text in migration studies.
