**Black Sheep: The Hidden Benefits of Being Bad** Aug 03 2020 Richard Stephens became the focus of international media attention in 2009 for his research on the psychological benefits of swearing as a response to pain. Now, fresh from winning the 2014 Wellcome Trust Science Writing Prize, Richard's first popular science book uncovers other pieces of surprising and occasionally bizarre scientific enquiry showing that what we at first perceive as bad can, in fact, be good. More pub conversation than science book, Richard's writing style is very accessible - both engaging and humorous. Think wasting time is bad? Not always! Research shows that taking time out can help you solve difficult problems. And if you can't be bothered tidying up, well fine, research shows that people are more creative in a messy environment. Swearing is rude but research shows that in some situations it can be a form of politeness. Swearing can also be used as a tool of persuasion. *Black Sheep* casts a slant on a range of human experiences from life to death, sex to romance, from speed thrills to halting boredom and from drinking alcohol (in moderation) to headily excessive bad language. This is a fascinating left-field tour of the world of psychological science. Get ready for the many hidden benefits of being bad that you really won't have seen coming.

*Dodge Challenger & Charger* Jul 26 2022 The new Dodge Charger, Challenger, and other LX-platform cars bring modern V-8 performance to unparalleled heights, and the new Challenger and Charger Hellcats are the most powerful American production cars today. The outrageous performance and audacious styling has earned a large and dedicated following. However, you can tune and modify the Chrysler 300, Dodge Magnum, Charger, and Challenger for more performance, and for many owners, fast is not fast enough. In the pursuit of a higher-performing LX-platform car, former Mopar Muscle editor Randy Bolig has created this book to show you how to extract ultimate performance from these cars. Chrysler has built more than one million Chargers, Challengers, and other full-size-platform cars starting with the Dodge Magnum and Chrysler 300. These cars offer competent handling, braking, and suspension performance, but they can be made much better through a set of targeted upgrades using better aftermarket equipment. Bolig gives you a comprehensive guide to the cars and engines. He details the features, benefits, and drawbacks of each package or set of upgrades, so you select the best modification for your car, application, and budget. He also covers basic to extreme modifications for the R/T and SRT8 models with the 5.7-, 6.1-, and 6.4-liter Hemi engines. Guidance for installing heads, rotating assemblies, ignition upgrades, higher-performance injectors, and many other parts are provided. But, this book doesn't just discuss performance; it shows you how to do it with comprehensive, step-by-step product installs for a cat-back exhaust system, hand-held ignition tuner, cold-air intake, and supercharger. If you have been searching for the best performance package to make your Charger, Challenger, or full-size Chrysler car stand out from the crowd, you need this book. It has the latest information, so you can learn how to install all the products and get your car back out on the road.

**Grindhouse** Nov 25 2019 The pervasive image of New York's 42nd Street as a hub of sensational thrills, vice and excess, is from where "grindhouse cinema," the focus of this volume, stemmed. It is, arguably, an image that has remained unchanged in the mind's eye of many exploitation film fans and academics alike. Whether in the pages of fanzines or scholarly works, it is often recounted how, should one have walked down this street between the 1960s and the 1980s, one would have undergone a kaleidoscopic encounter with an array of disparate "exploitation" films from all over the world that were being offered cheaply to urbanites by a swathe of vibrant movie theatres. The contributors to *Grindhouse: Cultural Exchange on 42nd Street*, and *Beyond* consider "grindhouse cinema" from a variety of cultural and methodological positions. Some seek to deconstruct the

etymology of “grindhouse” itself, add flesh to the bones of its cadaverous history, or examine the term's contemporary relevance in the context of both media production and consumerism. Others offer new inroads into hitherto unexamined examples of exploitation film history, presenting snapshots of cultural moments that many of us thought we already knew.

**Eclipse of the Blue** Jan 08 2021 For the "Retired Blues Crew", a small group of retired LAPD police officers that meet once a month to share old war stories and enjoy each other's company, accepting retirement was a hard pill to swallow. Once considered savvy street warriors who risked life and limb protecting the good citizens of Los Angeles, they were now the forgotten hero's whose past heroic deeds were now only remembrances visited through their colorful story telling during their once a month get-togethers. Like all things in life, they were all expendable and the guys in the "Retired Blues Crew" had been replaced by a new generation of street warriors. To the old dogs who were put out to pasture, the new centurions were taking their places with new technology and a confidence that bordered on disrespect for those who had paved the way before them. The argument that the old days of crushing crime without the benefit of all the new-fangled gadgets was more rewarding than the technology of the future was a misconception of the new breed that were now in charge of protecting the citizens of Los Angeles. For the select group of old story tellers, they needed to add one more chapter in their lives, something for the street warriors of the present to remember them by when their time finally came and they were reduced to second class citizens too old to do the job anymore. This small tight knit group of old street warriors had enough and it was time to prove beyond a shadow of a doubt that they weren't too old to out-smart and out-wit the high tech rouses who have now taken their places. Proving that computers and gadgets could never replace the wisdom and experience that the old dogs were blessed with wouldn't be an easy task, but they were determined to challenge the new breed and beat them at their own game. They knew whatever it was they were going to do couldn't replicate anything like the violent movies you see were people die, get hurt or cars get wrecked and buildings are blown up, after all they were cops or at least they were once. That being said, the old dogs had to pull off the perfect caper and they had to do it without claiming any of the bragging rights they so much yearned for. It would have to be for no other reason than "For Greater Glory." In that one of their own had been diagnosed with cancer with less than six months to live, they only had a small window of opportunity to get it done. Since he was the architect behind the perfect crime referred to as "Operation Blue Eclipse," their success would depend on how well the plan was executed with no room for error. If all went as planned and after all was said and done, the Retired Blues Crew would truly know who the best of the best was.
