China's Examination Hell Oct 20 2021 Written by one of the foremost historians of Chinese institutions, this book focuses on China's civil service examination system in its final and most elaborate phase during the Ch'ing dynasty. All aspects of this labyrinthine system are explored: the types of questions, the style and form in which they were to be answered, the problem of cheating, and the psychological and financial burdens of the candidates, the rewards of the successful and the plight of those who failed. Drawing on a wide range of sources, including Chinese novels, short stories, and plays, this thought provoking and entertaining book brings to vivid life the testing structure that supplied China's government bureaucracy for almost fourteen hundred years. "Professor Miyazaki's informative work is concerned with a system. . . that was, in effect, . . . the basic institution of Chinese political life, the real pillar which supported the imperial monarchy, the effective vehicle for the aspirations and ambitions of the ruling class. Imperial China without the examination system for the past thousand years and more would have developed in an entirely different way and might not have endured as the continuing form of government over a huge empire."--Pacific Affairs "The most comprehensive narrative treatment in any language of [this] enduring achievement of Chinese civilization."--American Historical Review

Civil Examinations and Meritocracy in Late Imperial China Mar 01 2020 During China's late imperial period (roughly 1400-1900 CE), men gathered by the millions every two or three years outside official examination compounds sprinkled across China. Only one percent of candidates would complete the academic regimen that would earn them a post in the administrative bureaucracy. Civil Examinations assesses the role of education, examination, and China's civil service in fostering the world's first professional class based on demonstrated knowledge and skill. Civil examinations were instituted in China in the seventh century CE, but in the Ming and Qing eras they were at the center of a complex social web that held together the intellectual, political, and economic life of imperial China. Local elites and the court sought to influence how the government regulated the classical curriculum and selected civil officials. As a guarantor of educational merit, examinations tied the dynasty to the privileged gentry and literati classes--both ideologically and institutionally. China eliminated its classical examination system in 1905. But this carefully balanced, constantly contested piece of social engineering, worked out over centuries, was an early harbinger of the meritocratic regime of college boards and other entrance exams that undergirds higher education in much of the world today.

[A Cultural History of Civil Examinations in Late Imperial China](#) Mar 13 2021 In this multidimensional analysis, Benjamin A. Elman uses over a thousand newly available examination records from the Yuan, Ming, and Ch'ing dynasties, 1315-1904, to explore the social, political, and cultural dimensions of the civil examination system, one of the most important institutions in Chinese history. For over five hundred years, the most important positions within the dynastic government were usually filled through these difficult examinations, and every other year some one to two million people from all levels of society attempted them. Covering the late imperial system from its inception to its demise, Elman revises our previous understanding of how the system actually worked, including its political and cultural machinery, the unforeseen consequences when it was unceremoniously scrapped by modernist reformers, and its long-term historical legacy. He argues that the Ming-Ch'ing civil examinations from 1370 to 1904 represented a substantial break with T'ang-Sung dynasty literary examinations from 650 to 1250. Late imperial examinations also made "Tao Learning," Neo-Confucian learning, the dynastic orthodoxy in official life and in literati culture. The intersections between elite social life, popular culture, and religion that are also considered reveal the full scope of the examination process throughout the late empire.
