Engineering Hydrology for Natural Resources Engineers Mar 03 2020 This fully revised edition provides a modern overview of the intersection of hydrology, water quality, and water management at the rural-urban interface. The book explores the ecosystem services available in wetlands, natural channels and ponds/lakes. As in the first edition, Part I examines the hydrologic cycle by providing strategies for quantifying each component: rainfall (with NOAA 14), infiltration, evapotranspiration and runoff. Part II examines field and farm scale water quality with an introduction to erosion prediction and water quality. Part III provides a concise examination of water management on the field and farm scale, emphasizing channel design, field control structures, measurement structures, groundwater processes and irrigation principles. Part IV then concludes the text with a treatment of basin-scale processes. A comprehensive suite of software tools is available for download, consisting of Excel spreadsheets, with some public domain models such as HY-8 culvert design, and software with public domain readers such as Mathematica, Maple and TK solver.

The Routledge History of Disease Oct 22 2021 The Routledge History of Disease draws on innovative scholarship in the history of medicine to explore the challenges involved in writing about health and disease throughout the past and across the globe, presenting a varied range of case studies and perspectives on the patterns, technologies and narratives of disease that can be identified in the past and that continue to influence our present. Organized thematically, chapters examine particular forms and conceptualizations of disease, covering subjects from leprosy in medieval Europe and cancer screening practices in twentieth-century USA to the ayurvedic tradition in ancient India and the pioneering studies of mental illness that took place in nineteenth-century Paris, as well as discussing the various sources and methods that can be used to understand the social and cultural contexts of disease. Chapter 24 of this book is freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license. <https://www.routledgehandbooks.com/doi/10.4324/9781315543420.ch24>

The ATL-98 Carvair May 29 2022 The ATL-98 Carvair is a truly unusual aircraft. Converted from 19 C-54 World War II transport planes and two DC-4 airliners into a small fleet of air ferries by Aviation Traders of Southend, England, the Carvair allowed commercial air passengers to accompany their automobiles onboard the aircraft. The planes were dispersed throughout the world, operating for 75 airlines and transporting cars, royalty, rock groups, refugees, whales, rockets, military vehicles, gold, and even nuclear material. After more than 45 years, two Carvairs were in 2008 still in service. This comprehensive history of the ATL-98 Carvair, begins with corporate histories and profiles of key players, including William Patterson, Donald Douglas, and Freddie Laker. Four chapters illustrate the evolution of the car-ferry as a viable aircraft, the history of Aviation Traders, engineering details incorporated into the Carvair's production, and major Carvair operators. Chapters on each of the fleet's 21 planes provide individual histories and anecdotes. Seven appendices provide several kinds of data and the book is fully indexed.

Religion and the Ku Klux Klan Oct 10 2020 As with other terrorist and extremist organizations, religion forms the basis of the Ku Klux Klan's dogmatic philosophy, providing justification for its beliefs and actions. The Klan represents a link to America's cultural past. While America has undergone tremendous social change, the secretive order has, since the end of the Civil War, kept alive the antiquated values—predicated on racism and religion—of white supremacy. Covering nearly a century of Klan ideology, this book examines the group's religious rhetoric in its literature and songs, from its heyday during the 1920s to 2014.
