Geographical Psychology Aug 29 2019 "This volume attempts to make the case that our understanding of psychological phenomena can be greatly informed by a geographical perspective--one that explores the spatial organization of psychological phenomena and considers how individual characteristics, social entities, and physical features of the environment contribute to their organization. The chapters in the book highlight the ways in which social and physical features of the environment, such as local demography, political and economic institutions, topography, and climate, influence and interact with psychological processes. The perspectives described herein complement and extend theory and research in several areas of psychology, including social, personality, cultural, environmental, evolutionary, and comparative. By bringing together streams of research at the intersection of geographical psychology, I have tried to show how widely studied psychological constructs relate to and are influenced by broad social, ecological, economic, and political forces. At the same time, this research demonstrates the relevance of psychology for understanding macro-level processes. Ultimately, this book is designed to inform researchers about the value of examining psychological

phenomena and their spatial components"--Introduction. (PsycINFO Database Record (c) 2013 APA, all rights reserved).

Media Psychology May 31 2022 *This book examines media psychology as a field of study and provides a fundamental understanding of its emergence and application. It covers various key themes such as consumer behavior, mass media and advertising, media and culture, media messages and their effects on individual and group behavior in the Indian context. It highlights the role of media psychology with reference to citizenship and pedagogy and studies the emerging concept of digital altruism. The author also discusses various research methods used in this field that help to objectively evaluate the impact of mass media messages on people and people's effect on the functioning of mass media. This comprehensive book will be useful to students and researchers of psychology, media psychology, mass-communication, consumer behavior, digital marketing, corporate communication, and media studies.*

Introduction to Psychology Sep 30 2019

Psychology - an Exploration Nov 05 2022 *"[A] comprehensive introductory Psychology text for South African students. It applies established global theories in a South African and African context ..."--Back cover.*

STUDYGUIDE FOR PSYCHOLOGY ES 9 Oct 12 2020 *Never HIGHLIGHT a Book Again! Includes all testable terms, concepts, persons, places, and events. Cram101 Just the FACTS101 studyguides gives all of the outlines, highlights, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Women's Lives Apr 17 2021 *This cutting-edge and comprehensive fourth edition of Women's Lives: A Psychological Perspective integrates the most current research and social issues to explore the psychological diversity of girls and women varying in age, ethnicity, social class, nationality, sexual orientation, and ableness. Written in an engaging and accessible manner, its use of vignettes, quotes, and numerous pedagogical tools effectively fosters students' engagement, active learning, critical thinking, and social activism. New information covered includes: neoliberal feminism, standpoint theory, mujerista psychology (Chapter 1) LGBT individuals and individuals with disabilities in media (Chapter 2) testosterone testing of female athletes, precarious manhood (Chapter 3) raising a gender non-conforming child, impact of social media on body image (Chapter 4) gender differences in narcissism and Big Five personality traits, women video-game designers (Chapter 5) asexuality, transgender individuals, sexual agency, "Viagra for women" controversy (Chapter 6) adoption of frozen embryos controversy (Chapter 7) intensive mothering, integrated motherhood, "living apart together", same-sex marriage (Chapter 8) single-sex schooling controversy (Chapter 9) combat roles opened to U.S. women, managerial derailment (Chapter 10) work-hours dilemmas of low-wage workers (Chapter 11) feminist health care model, health care for transgender individuals, Affordable Care Act (Chapter 12) feminist critique of CDC guidelines on women and drinking (Chapter 13) cyberharassment, gendertrolling, campus sexual assault (Chapter 14) transnational feminism, men and feminism (Chapter 15) Women's Lives stands apart from other texts on the psychology of women because it embeds within each topical chapter a lifespan approach and robust coverage of the impact of social, cultural, and economic factors in shaping women's lives around the world. It provides extensive information on women with disabilities, middle-aged and older women, and women in transnational contexts. Its up-to-date coverage reflects current scientific and social developments, including over 2,200 new references. This edition also adds several new boxed features for student engagement. In The News boxes present current, often controversial, news items to get students thinking critically about real-life applications of course topics. Get Involved boxes encourage students to actively participate in the research process. What You Can Do boxes give students applied activities to promote a more egalitarian society. Learn About the Research boxes expose students to a variety of research methods and highlight the importance of diversity in research samples by including studies of underrepresented groups.*

Religious Motivation and the Origins of Buddhism Dec 02 2019 *Why did people in North India from the 5th century BC choose to leave the world and join the sect of the Buddha? This is the first book to apply the insights of social psychology in order to understand the religious motivation of the people who constituted the early Buddhist community. It also addresses the more general and theoretically controversial question of how world religions come into being, by focusing on the conversion process of the individual believer.*

The Fat Lady Sings Feb 02 2020 *Rooted in analytical psychology, The Fat Lady Sings challenges the notion that*

the fat patient must change to fit into a thin world. For years we have been bombarded by warnings about the Obesity Epidemic, a concern rivaling that about terrorism. Curiously, the depth psychological literature is mostly silent about this preoccupation, its origins, meaning, and the psychotherapeutic treatment issues involved. Almost everything written about fat and being fat comes from the world of the slender. Fat people are rarely consulted about their lives, how they eat and move and live. They are too often not seen as credible, or as reliable witnesses to their own experience. The Fat Lady Sings is an exploration of fat and our culture, the fat complex that grips our culture, how the war on obesity is fought in the clinical setting, and how being fat is an ongoing traumatic experience. The book grows out of the author's life as a fat woman, her work as a Jungian psychotherapist, and as a patient in analysis.

Introduction to Psychology Feb 13 2021

The Psychology of Superheroes Nov 24 2021 This latest installment in the Psychology of Popular Culture series turns its focus to superheroes. Superheroes have survived and fascinated for more than 70 years in no small part due to their psychological depth. In The Psychology of Superheroes, almost two dozen psychologists get into the heads of today's most popular and intriguing superheroes. Why do superheroes choose to be superheroes? Where does Spider-Man's altruism come from, and what does it mean? Why is there so much prejudice against the X-Men, and how could they have responded to it, other than the way they did? Why are super-villains so aggressive? The Psychology of Superheroes answers these questions, exploring the inner workings our heroes usually only share with their therapists.

The Problem of Evil Jun 27 2019 Annotation Comprises 18 revised studies based on presentations and discussions at the Fourth Conference of the International Society for Philosophy and Psychotherapy held in Montreal, Canada in June 1994. Contributions to the five sections address evil in Asian thought, Western theories of evil, evil and cosmic order, the psychology of evil, and the practice of evil. Annotation copyrighted by Book News Inc., Portland, OR.

Toolkit for a Space Psychologist Jan 03 2020 This book captures the official reports from the European Space Agency (ESA) study, Technologies and Techniques for Psychological Support of astronauts during exploration missions to the Moon and Mars. The study was commissioned by the ESA in 2005 even before the UK Space Agency was formed in 2010. The need for the European Space Agency study of technologies and techniques for psychological support during long-duration exploration missions comes from a human desire for space exploration, which can be realised in the near future. This undertaking is honourable and exciting but is challenging even for the most mentally prepared and trained astronauts and cosmonauts. The crew will travel to where no human has been before, to farther parts of the solar system, and the crew will need to be dependent on each other and aware that they will be without any hope of rescue in case of an unforeseen mentally challenging or life-threatening event. Hence, the challenge extends to scientists and industry to devise techniques and technologies that can support and help the crew on exploration missions. Long-duration exploration missions to the Moon or Mars will pose new critical psychological issues to space crews, compared to Low Earth Orbit flights. Most psychological support measures in use today are employed in-flight. Examples are regular private conferences with psychologists, regular conferences with family, resupplies, uplink of news, visiting crews etc. However due to communication delays and mission characteristics these measures will be possible only in a limited way. Human space exploration is a test of human abilities, specifically, extending our knowledge and understanding of human capabilities and limitations. Therefore much more emphasis will have to be placed on support measures that reduce the risk of mission critical psychological problems. Space mission is also a test of technology and how this can provide efficient support throughout the duration of a long mission. The book consists of three parts: - The first part describes psychological challenges, constraints, existing solutions and their applicability for Mars and Moon missions. - The focus of the second part is a formulation of a global baseline concept for future psychological support. - The third part of the book consolidates information in a global baseline concept for psychological support during exploratory missions with the recommendations and development plan. www.iyawhiteley.com www.biotriz.com

The Psychology of Space Exploration Mar 17 2021 This short book grapples with two vast questions: the nature of our minds, and our place in the wider universe. It considers how one mutually influences the development of the other. The changes and challenges that will accompany the first humans to leave Earth and travel to another

planet, or even further, will not only impact our technical capabilities, but will also represent a watershed moment within our individual and collective human psychology. Many of the problems of resource use, environmental degradation, and waste or destructive processes are contained in the larger process of exploring another environment and planet. But This book also offers a shift in perspective that allows us to consider humanity from an alternative, more holistic perspective, reappraising our own minds both individually and within dynamic social processes. The Psychology of Space Exploration considers our place and purpose in the widest possible perspective, that of space exploration and the natural universe. It doesn't seek to answer these questions, but provides a perspective to explore even further.

The Child and the Book Oct 24 2021 This study considers the appeal of popular children's books from both a psychological and a literary viewpoint. It covers a range of reading matter including: picture books; fairy stories; myths and legends; comics and books for teenagers and adolescents.

Psychology of Space Exploration: Contemporary Research in Historical Perspective Jan 27 2022 *Through essays on topics including survival in extreme environments and the multicultural dimensions of exploration, readers will gain an understanding of the psychological challenges that have faced the space program since its earliest days. An engaging read for those interested in space, history, and psychology alike, this is a highly relevant read as we stand poised on the edge of a new era of spaceflight. Each essay also explicitly addresses the history of the psychology of space exploration.*

Fieldnotes from a Depth Psychological Exploration of Evil Sep 22 2021 In Fieldnotes from a Depth Psychological Exploration of Evil, Robin L. Gordon presents an accessible account of an attempt to define and understand the nature of evil. Gordon takes on the role of guide to this confusing land, tying together threads of Jungian theory, philosophy, etymology, neuroscience and history, as we are led on a personal journey of discovery. Gordon begins by analysing what a twelfth-century meeting between Chinggis Khan and Taoist priest Ch'ang-Ch'un can tell us about the presence of opposing traits and the nature of evil in human beings. We learn what depth psychology has said about evil and the shadow part of our psyches, and examine examples of human behaviour throughout history to understand the etymological, philosophical and historical understandings and definitions of evil. Gordon's own relationship with her work, and the feelings that arise when researching the psychological framework of Nazi doctors, genocide in Rwanda, Bosnia and Syria, and the functionality of serial killers, are interrogated. We then return to Chinggis Khan's and Ch'ang-Ch'un's relationship, attempting to build a real and practical definition of "evil", and assessing their dialogues as a metaphor for Jung's views of the transcendent function. Fieldnotes from a Depth Psychological Exploration of Evil will be essential reading for academics and students of Jungian and post-Jungian studies, sociology, criminology and philosophy. It will also be a key resource for Jungian analysts and psychotherapists interested in the study of evil and its impact on society and the psyche, as well as anyone investigating and redefining their own meanings of evil, past and present.

Decolonizing Psychology May 07 2020 *In Decolonizing Psychology: Globalization, Social Justice, and Indian Youth Identities, Sunil Bhatia explores how the cultural dynamics of neo-liberal globalization shape urban Indian youth identities and, in particular, he articulates how Euro-American psychological science continues to prevent narratives of self and identity in non-Western nations from entering the broader conversation.*

Children's Exploration and Cultural Formation Mar 05 2020 *This open access book examines the educational conditions that support cultures of exploration in kindergartens. It conceptualises cultures of exploration, whether those cultures are created through children's own engagement or are demanded of them through undertaking specific tasks within different institutional settings. It shows how the conditions for children's exploration form a web of activities in different settings with social relationships, local landscapes and artefacts. The book builds on the understanding of cultural traditions as deeply implicated in the developmental processes, meaning that local considerations must be reflected in education for sustainable futures. Therefore*

the book examines and conceptualises exploration and cultural formation through locally situated cases and navigates toward global educational concepts. The book provides different windows into how children may explore in everyday practice settings in kindergarten, and contributes to a loci-based, ecological, integral knowledge relevant for early childhood education.

A New Psychology of Human Well-Being: An Exploration of the Influence of Ego-Soul Dynamics on Mental and Physical Health Jul 09 2020 Richard Barrett is one of the most profound integrative thinkers of our day. Bringing together numerous strands of research and theory with his visionary perspective he succeeds in "building a theory of human well-being that unites psychology with spirituality and science". A brilliant synthesis of the psychology of the future. This book redefines the meaning of well-being for the 21st century.

The Emotional Self Oct 31 2019 `This addition to a growing number of texts which approach emotions and emotionality from a social constructionist perspective is well written, scholarly, accessible and interesting.... There is both breadth and depth to this work.' - Feminism and Psychology This broad-ranging and accessible book brings together social and cultural theory with original empirical research into the nature of the emotional self in contemporary western societies. The emphasis of the analysis is on the emotional self as a dynamic project that is continually shaped and reshaped via discourse, embodied sensations, memory, personal biography and interactions with others and objects. Using an interdisciplinary approach

Fat Lives Apr 29 2022 Ever caught somebody – or yourself – checking out the content of a ‘fat’ person’s supermarket trolley? Ever wondered what lies behind this behaviour, or what it might be like to be at the receiving end of this judging gaze? Within the context of the current ‘obesity debate’, this book investigates the embodied experience of ‘being large’ from a critical psychological perspective. Using poststructuralist and feminist theories, the author explores the discourses available to and used by self-designated ‘fat’ individuals, as well as the societal power relationships that are produced by these. Using the issues of body size and ‘fat’ as an illustration, the book describes the benefits of exploring psychological and social matters from a poststructuralist perspective, and the dangers inherent in taking reductionist approaches to public health and other social issues. As such, this book should be of particular interest to anyone working within the disciplines of psychology, sociology, and health studies, as well as those involved in the study of health, gender issues and appearance.

How Art Works Mar 29 2022 "How Art Works explores puzzles that have preoccupied philosophers as well as

the general public: Can art be defined? How do we decide what is good art? Why do we gravitate to sadness in art? Why do we devalue a perfect fake? Could 'my kid have done that'? Does reading fiction enhance empathy? Drawing on careful observations, probing interviews, and clever experiments, Ellen Winner reveals surprising answers to these and other artistic mysteries. We may come away with a new understanding of how art works on us.'--Jacket.

Women's Lives Nov 12 2020 Women's Lives: A Psychological Exploration, 3rd Edition draws on a wealth of the literature to present a rich range of experiences and issues of relevance to girls and women. This text offers the unique combination of a chronological approach to gender that is embedded within topical chapters. Cutting-edge and comprehensive, each chapter integrates current material on women differing in age, ethnicity, social class, nationality, sexual orientation and ableness. The third edition reflects substantial changes in the field while maintaining its empirical focus through engaging writing, student activities, and critical thinking exercises. With over 2,100 new references emphasizing the latest research and theories, the authors continue to pique interests in psychology of women.

The Exploration of Happiness Jun 19 2021 This specially selected collection of landmark work from the Journal of Happiness Studies maps the current contours, and the likely future direction, of research in a field with a fast-rising profile. This volume, which inaugurates a series aiming to explore discrete topics in happiness and wellbeing studies, features selected articles published in the Journal of Happiness Studies during its first decade, which culminated in an 'impact factor' in 2011. As the introductory work in the series, it provides readers with a vital overview of the prominent issues, problems and challenges that well-being and happiness research has had to overcome since its appearance on the scientific stage. The journal's very success evinces both the high scientific quality of the research covered, and the steadily growing interest in a subject that draws responses from a vast range of epistemological aiming points, taking in economics, sociology, psychology, philosophy, education and medicine. The series of volumes following this debut publication will represent a unique contribution to the literature in their multidisciplinary focus on particularized topics. It is reckoned that this will help strengthen cross-disciplinary synergies among authors investigating the same topic, as well as whet the appetite for happiness research among professionals and experts inhabiting a variety of academic domains. This volume addresses the theory of well-being and happiness, the different research approaches now probing their features and components, and the socio-economic and cultural issues that impact on their promotion..

The Age of Artificial Intelligence: An Exploration Dec 14 2020 With worldwide spending estimates of over \$97 billion by 2023, it is no surprise that Artificial Intelligence (A.I.) is one of the hottest topics at present in both the private and public spheres. Comprising of vital contributions from the most influential researchers in the field, including Daniel Dennett, Roman V. Yampolskiy, Frederic Gilbert, Stevan Harnad, David Pearce, Natasha Vita-More, Vernon Vinge and Ben Goertzel, 'The Age of Artificial Intelligence: An Exploration' discusses a variety of topics ranging from the various ethical issues associated with A.I. based technologies in terms of morality and law to subjects related to artificial consciousness, artistic creativity and intelligence. The volume is organized as follows: Section I is dedicated to reflections on the Intelligence of A.I., with chapters by Soenke Ziesche and Roman V. Yampolskiy, Stevan Harnad, Daniel Dennett and David Pearce. Next, Section II discusses the relationship between consciousness, simulation and artificial intelligence, with chapters by Gabriel Axel Montes and Ben Goertzel, Cody Turner, Nicole Hall and Steven S. Gouveia. Section III, dedicated to aesthetical creativity and language in artificial intelligence, includes chapters by Caterina Moruzzi, René Mogensen, Mariana Chinellato Ferreira and Kulvinder Panesar. The subsequent Section IV is on the Ethics of the Bionic Brain with the participation of Peter A. DePergola II, Tomislav Miletic and Frederic Gilbert, Anibal M. Astobiza, Txetxu Ausin, Ricardo M. Ferrer and Stephen Rainey and Natasha Vita-More. Finally, Section V follows on the Ethics of Artificial Intelligence with chapters by Federico Pistono and Roman V. Yamploskiy, Hasse Hämmäläinen, Vernon Vinge and Eray Özkural. The Age of Artificial Intelligence is imminent, if not here already. We should ensure that we invest in the right people and the right ideas to create the best possible solutions to the problems of the present and prepare for those of the future. This edited volume will be of particular interest to researchers in the field of A.I. as well of those in Cognitive Science (Philosophy of the Mind, Neuroscience, and Linguistics), Aesthetics and Arts, Applied Ethics and Political Philosophy / Law.

Students studying the aforementioned topics can also benefit from its contents.
