**Veterans and Agent Orange** Mar 17 2021 From 1962 to 1971, the US military sprayed herbicides over Vietnam to strip the thick jungle canopy that could conceal opposition forces, to destroy crops that those forces might depend on, and to clear tall grasses and bushes from the perimeters of US base camps and outlying fire-support bases. Mixtures of 2,4-dichlorophenoxyacetic acid (2,4-D), 2,4,5-trichlorophenoxyacetic acid (2,4,5-T), picloram, and cacodylic acid made up the bulk of the herbicides sprayed. The main chemical mixture sprayed was Agent Orange, a 50:50 mixture of 2,4-D and 2,4,5-T. At the time of the spraying, 2,3,7,8-tetrachlorodibenzo-p-dioxin (TCDD), the most toxic form of dioxin, was an unintended contaminant generated during the production of 2,4,5-T and so was present in Agent Orange and some other formulations sprayed in Vietnam. Because of complaints from returning Vietnam veterans about their own health and that of their children combined with emerging toxicologic evidence of adverse effects of phenoxy herbicides and TCDD, the National Academy of Sciences (NAS) was asked to perform a comprehensive evaluation of scientific and medical information regarding the health effects of exposure to Agent Orange, other herbicides used in Vietnam, and the various components of those herbicides, including TCDD. Updated evaluations are conducted every two years to review newly available literature and draw conclusions from the overall evidence. **Veterans and Agent Orange: Update 2012** reviews peer-reviewed scientific reports concerning associations between health outcomes and exposure to TCDD and other chemicals in the herbicides used in Vietnam that were published in October 2010-September 2012 and integrates this information with the previously established evidence database. This report considers whether a statistical association with herbicide exposure exists, taking into account the strength of the scientific evidence and the appropriateness of the statistical and epidemiological methods used to detect the association; the increased risk of disease among those exposed to herbicides during service in the Republic of Vietnam during the Vietnam era; and whether there exists a plausible biological mechanism or other evidence of a causal relationship between herbicide exposure and the disease.

**Biotechnology of Medicinal Plants** Dec 14 2020 This book provides comprehensive and useful information on the medicinal plants especially those used as food supplement in the form of health vitalizers and invigorators. A subjective approach is attempted for the first time in this book with all the information available in one single volume. Separate chapters are devoted to the medicinal values

**BuNos! Disposition of World War II USN, USMC and USCG Aircraft Listed by Bureau Number** May 19 2021 A snapshot in time. After thousands of hours of research and data entry over a 35-year period, the information on the disposition of some 25,000 US Navy, US Marine Corps and US Coast Guard aircraft needs to be published. These aircraft mainly represent those built and lost during World War II - between 7 December 1941 and 15 August 1945 - but this book also contains aircraft built before WWII that were lost during WWII or disposed of after WWII (lost during the Korean War, lost on training exercises, sold to private investors, currently located in museums and even some still proudly sitting as "gate guards" across the US, etc.).

**Pt Platinum** Mar 29 2022 This volume describes the isotopes, atoms, atomic ions, molecules, and clusters of the six platinum group elements Ru, Rh, Pd, Os, Ir, and Pt. It starts with a compilation of the properties of the isotopes, followed by the description of the formation and separation of the radioactive isotopes. The chapters on the atoms and atomic ions deal with the configuration of the outer-shell electrons, manifested by optical terms and spectra, ionization energy, and electron affinity, as well as with the energy levels of the inner-shell electrons, manifested by X-ray spectra and Auger electron spectra. The last section gives information on the formation and the physical properties of the platinum group molecules and clusters. Most of the contributions are written by external experts (for details, see the back of the title page). One of the authors (Prof. Y. Cauchois) thanks Dr. M. Othmane for his constant and efficient cooperation in the treatment of the drafts and the checking of the proofs. **2012 Collector Car Price Guide** Sep 22 2021 The Authority for Collector Car Pricing With 760 pages of pricing at your fingertips, the 2012 Collector Car Price Guide is the ultimate resource for car hobbyists. Whether you're looking to find a price on a blue ribbon show car, or a beater station wagon, you can find out what it's worth, and what people are paying for it, in the most comprehensive price guide on the market. • More than 250,000 accurate price listings for cars of all eras • Exclusive 1 to 6 condition grading places values in all conditions, from show car to parts car • Covers every mass-produced U.S. car, light trucks, and select imported cars and trucks • Explanation of the 1 through 6 condition rating system This is the only resource with pricing back to 1901! About the Author Ron Kowalke is a respected author and price analyst in the collector vehicle hobby. He is the editor of Old Cars Report Price Guide and technical/auction editor of Old Cars Weekly News & Marketplace. Kowalke analyzes and reports on the results of approximately 100 collector vehicles auctions annually.

**Electrochemistry of Nucleic Acids and Proteins** May 07 2020 "This book is concerned with the electron transfer between electrodes on one hand and DNA, RNA and proteins on the other hand and with the use of electrochemistry and electrochemical sensors in DNA and protein analyses. Electrochemical bioassays involve newly emerging fields of genomic, proteomics, biomedicine and biotechnology. DNA and protein chips with electrochemical detection represent new tools of science, medicine and other areas of practical life in this century."--BOOK JACKET.

**Woody Plants and Woody Plant Management** Feb 25 2022 A presentation of strategies for managing woody plants and using research data to select the most appropriate control methods. It analyzes the responses of over 370 North American woody plants to commercially available herbicides. The authors provide methods to manage woody plants that interfere with recreation, watershed yield, animal and plant diversity, resource conservation, wildlife and livestock needs, and wood production on grazing, forest, and related land.

**Nutrient Requirements of Dairy Cattle** Apr 17 2021 This widely used reference has been updated and revamped to reflect the changing face of the dairy industry. New features allow users to pinpoint nutrient requirements more accurately for individual animals. The committee also provides guidance on how nutrient analysis of feed ingredients, insights into nutrient utilization by the animal, and formulation of diets to reduce environmental impacts can be applied to productive management decisions. The book includes a user-friendly computer program on a compact disk, accompanied by extensive context-sensitive "Help" options, to simulate the dynamic state of animals. The committee addresses important issues unique to dairy science-the dry or transition cow, udder edema, milk fever, low-fat milk, calf dehydration, and more. The also volume covers dry matter intake, including how to predict feed intake. It addresses the management of lactating dairy cows, utilization of fat in calf and lactation diets, and calf and heifer replacement nutrition. In addition, the many useful tables include updated nutrient composition for commonly used feedstuffs.

**Double Fertilization** Jan 27 2022 "Double Fertilization" provides a comprehensive overview of all aspects of this central event in the reproduction and development of flowering plants. Written by Val Raghavan, The Ohio State University, an acknowledged expert in plant developmental biology, the book vividly describes the molecular and cellular steps of the unique and complex fertilization process that culminates in the formation of embryo and endosperm, focusing on the latest results from the model plant Arabidopsis. The text is complemented by excellent illustrations, including 16 color plates. Since embryo and endosperm constitute the edible parts of many seeds and grains widely used in human and animal nutrition, an understanding of the fertilization process has great relevance for genetic engineering aimed at improving the nutritional quality of crop plants. This book is ideally suited to researchers and graduate students seeking a coherent view of current perspectives on embryogenesis and endosperm development in flowering plants.

**Biology of Root Formation and Development** Aug 29 2019 This book contains the majority of the presentations of the Second International Symposium on the Biology of Root Formation and Development that was held in Jerusalem, Israel, June 23--28, 1996. Following the First Symposium on the Biology of Adventitious Root Formation, held in Dallas, USA, 1993, we perceived the need to include all kinds of roots, not only the shoot-borne ones. The endogenous signals that control root formation, and the subsequent growth and development processes, are very much alike, regardless of the sites and sources of origin of the roots. Therefore, we included in the Second Symposium contributions on both shoot-borne (i.e., adventitious) roots and root-borne (i.e., lateral) roots. Plant roots have remained an exciting and an intriguing field of science. During the years that followed the first symposium, an exceptional proliferation of interest in root biology has developed, associated with the intensive research activity in this field and the contemporary developments in the understanding of root function and development. New methods have been applied, and old ideas and interpretations were reexamined. Altogether, it became necessary to update our viewpoints and to expand them.

**Plant Propagation by Tissue Culture** Feb 13 2021 For researchers and students, George's books have become the standard works on in vitro plant propagation. For this, the third edition of the classic work, authors with specialist knowledge have been brought on board to cover the hugely expanded number of topics in the subject area. Scientific knowledge has expanded rapidly since the second edition and it would now be a daunting task for a single author to cover all aspects adequately. However, this edition still maintains the integration that was characteristic of the previous editions. The first volume of the new edition highlights the scientific background of in vitro propagation. The second volume covers the practice of micropropagation and describes its various applications.

**A Handbook of Magnetochemical Formulae** Jul 01 2022 Magnetochemistry is concerned with the study of magnetic properties in materials. It investigates the relationship between the magnetic properties of chemical compounds and their atomic and molecular structure. This rapidly growing field has a number of applications, and the measuring and interpreting of magnetic properties is often conducted by scientists who are not specialists in the field. Magnetochemistry requires complex mathematics and physics and so can be daunting for those who have not previously studied it in depth. Aimed at providing a single source of information on magnetochemistry, this book offers a comprehensive and contemporary review of the mathematical background and formula for predicting or fitting magnetic data, including a summary of the theory behind magnetochemistry to help understand the necessary calculations. Along with tables listing the key formula, there is also a model of the magnetic functions showing the effect of individual magnetic parameters. The clear structure and comprehensive coverage of all aspects of magnetochemistry will make this an essential book for advanced students and practitioners. Provides comprehensive overview of the mathematical background of magnetochemistry Uses clear and accessible language so scientists in a variety of fields can utilize the information Detailed explanations of equations and formula
