PROC REPORT by Example Sep 04 2020
PROC REPORT by Example: Techniques for Building Professional Reports Using SAS provides real-world examples using PROC REPORT to create a wide variety of professional reports. Written from the point of view of the programmer who produces the reports, this book explains and illustrates creative techniques used to achieve the desired results. Clarifying solutions to common, everyday programming challenges and typical daily tasks that programmers encounter, what seemed complex will become a matter of practice.

Prevention of Water Pollution by Agriculture and Related Activities Jun 20 2019
The Expert Consultation dealt with pollution problems, mainly in the Latin America and the Caribbean Region, focusing on an assessment of the extent of water pollution by agriculture and related activities; the understanding of the mechanisms of pollution by agriculture and related activities; and policy, legislation and technical guidelines to prevent agricultural water pollution. Twelve case-studies on Latin America and the Caribbean were presented and discussed, as were 12 technical documents prepared by well-known specialists from developed countries. Four

discussion groups were formed: Water Quality Assessment and Protection; Agricultural Chemicals and Activities related to Water Pollution; Policy and Legislation; and Prevention of Water Pollution. An Action Statement was drafted providing recommendations for FAO.

An Assessment of the Small Business Innovation Research Program Dec 27 2019
In response to a Congressional mandate, the National Research Council conducted a review of the SBIR program at the five federal agencies with SBIR programs with budgets in excess of \$100 million (DOD, NIH, NASA, DOE, and NSF). The project was designed to answer questions of program operation and effectiveness, including the quality of the research projects being conducted under the SBIR program, the commercialization of the

research, and the program's contribution to accomplishing agency missions. This report describes the proposed methodology for the project, identifying how the following tasks will be carried out: 1) collecting and analyzing agency databases and studies; 2) surveying firms and agencies; 3) conducting case studies organized around a common template; and 4) reviewing and analyzing survey and case study results and program accomplishments. Given the heterogeneity of goals and procedures across the five agencies involved, a broad spectrum of evaluative approaches is recommended.
